# Certificate of Achievement for Excellence in Financial Reporting

Presented to

## State of Maryland

For its Comprehensive Annual  
Financial Report  
for the Fiscal Year Ended  
June 30, 2009

A Certificate of Achievement for Excellence in Financial Reporting is presented by the Government Finance Officers Association of the United States and Canada to government units and public employee retirement systems whose comprehensive annual financial reports (CAFRs) achieve the highest standards in government accounting and financial reporting.

President

Executive Director

# A Message from Comptroller Peter Franchot

For the past year, we have seen our State and nation, our neighbors and friends, struggle in these uncertain economic times. Like families across Maryland, government too has had to tighten its belt while continuing to provide fundamental services.

As we begin to see signs of improvements in the economy, I continue to urge restraint and caution to my fellow public servants. Our economy remains volatile and some, including myself, have recognized the need to change the way we do business as we enter the age of austerity. Though I remain cautiously optimistic that Maryland will rebound sooner than most states, we must look for ways to do more with less and operate with the utmost efficiency. That is why I'm proud of the accomplishments of my office in the last 12 months including:

- Providing excellent customer service through the use of technology to return money to citizens, protect taxpayers and make tax filing easier.
- Working diligently to ensure every tax dollar is collected fairly among individuals and businesses.
- Protecting State dollars by opposing wasteful and indiscriminate spending as a member of the Board of Public Works.
- Expanding economic opportunities for small businesses and advocating for women and minority-owned firms.

As the State's chief fiscal officer, I pledge to continue streamlining our agency's operations and oppose imprudent spending. I believe every individual and business should pay its fair share, and those that do, should be rewarded. Maryland remains fiscally strong, and I, as Comptroller, will secure Maryland's finances to create a stronger State for generations to come.

A handwritten signature in black ink that reads "Peter Franchot". The signature is fluid and cursive, with the first name "Peter" and last name "Franchot" clearly visible.

*Comptroller Peter Franchot*

# Taxpayer Service.

Providing the best service to all Maryland taxpayers through expanded use of technology continues to be a priority for the Comptroller's Office. The agency is dedicated to making the process of paying taxes simpler, faster and more efficient for individuals and businesses. Additionally, the Comptroller's Office remains committed to returning unclaimed property to Marylanders and protecting consumers from unscrupulous tax preparers.

**E-FILING.** Thanks to Comptroller Franchot's unprecedented marketing and outreach efforts, more than 1.7 million Marylanders filed their taxes electronically in 2010, a majority of all income tax returns and an all-time high for this agency. Each taxpayer who files an electronic instead of a paper return saves the State \$1.60, and can generally expect to receive their refund checks deposited into their bank account in three business days!

**ONLINE SERVICES.** A growing number of Maryland taxpayers took advantage of our innovative online services. More than 145,000 individual taxpayers used I-File, our free online filing service, while thousands of taxpayers continue to take advantage of our free B-File and online Bill Pay services.

**UNCLAIMED PROPERTY.** Comptroller Franchot's aggressive efforts to reunite Marylanders with unclaimed property continue to prove successful. Thanks to our online and traditional media outreach, as well as a strong presence at community events throughout the State, we paid 49,000 claims with a dollar value of \$47.8 million in Fiscal Year 2010.

**CONSUMER PROTECTION.** Comptroller Franchot is protecting taxpayers from unscrupulous tax preparers and led the effort to pass the Tax Preparer's Act of 2008 and is now working to implement and enforce this important consumer protection measure. He also actively worked to pass successful legislation that will rein in the abuses associated with Refund Anticipation Loans and created a Bill of Rights and consumer guide for taxpayers.

# Tax Fairness.

Ensuring every individual and business pays its fair share, the Comptroller's Office is implementing a new tax system, furthering innovative federal partnerships and cracking down on corporate scofflaws. Through these cutting-edge initiatives, the agency is returning millions of dollars to state coffers and leveling the playing field for all Marylanders.

**DATA WAREHOUSE.** The State's new data warehouse continues to exceed our expectations. In the second year since contract approval, it has enabled the Comptroller's Office to identify and collect \$69 million in delinquent tax payments.

**FEDERAL VENDOR OFFSET.** Since implementing the nation's first federal vendor offset program, the State of Maryland has recovered more than \$51 million from federal contractors with unsatisfied State liabilities.

**CORPORATE COMPLIANCE.** The Comptroller's Office is making large corporations pay their fair share, recovering hundreds of millions to date as a result of our successful efforts to crack down on Delaware Holding Companies and \$24 million thanks to our efforts to disallow the Captive REIT deduction.

# Fiscal Responsibility.

As the state's chief fiscal officer, the Comptroller takes his role as fiscal steward seriously. Through the agency's efforts to streamline vendor payments and increase the scope of the State's purchasing card program, substantial savings have resulted for Maryland. As a member of the Board of Public Works, the Comptroller also watches out for taxpayer dollars by opposing imprudent spending. Additionally, the Comptroller has become a fierce advocate for ensuring all our young people have basic financial literacy.

**VENDOR PAYMENTS.** The Comptroller's Office is working with private vendors who receive more than \$50,000 per year or more than six checks annually to sign up for electronic payments, which will save the State of Maryland as much as \$110,000 in postage and envelope costs per year.

#### **CORPORATE PURCHASING CARDS.**

The Comptroller's Office has increased the limit for the State's corporate purchasing card from \$2,500 to \$5,000. As a result of the increase, the State will save more than \$54,000 in postage and envelopes each year as well as earn more than \$700,000 in rebates.

**PREVENTING WASTEFUL SPENDING.** A member of the Board of Public Works, Comptroller Franchot has routinely opposed wasteful and indiscriminate

spending while using his position to support cost effective initiatives such as geothermal energy and improved school maintenance.

**FINANCIAL LITERACY.** Stressing the necessity for young people to understand the fundamentals of personal finance, Comptroller Franchot has launched a campaign to promote financial literacy to students across all grade levels. Studies illustrating the staggering costs of not educating the next generation on sound financial principles highlights the importance of erecting a statewide graduate requirement in financial literacy.

# Economic Opportunity.

A consummate champion for Maryland's economic expansion, the Comptroller recognizes the importance of small business success in stimulating our State's economy. He has also fought for greater investment in green technologies, broadband access for rural counties and improved equality for Maryland's wineries.

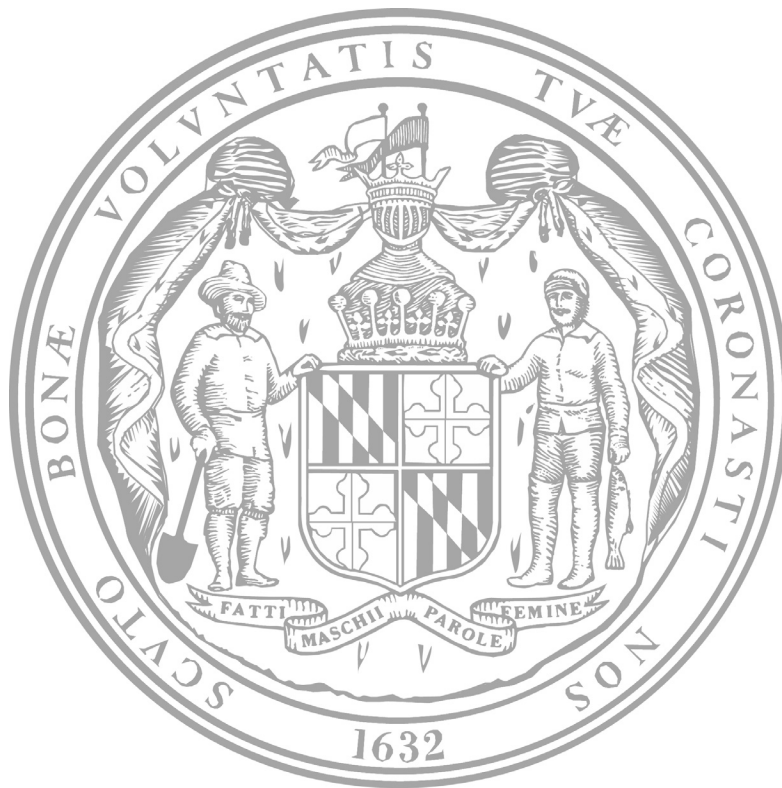

**SMALL BUSINESS.** A vice-chairman of the State Retirement and Pension System of Maryland, Comptroller Franchot has helped lead the effort to hire women and minority-owned investment firms to manage system assets. Under his leadership, the “Terra Maria” fund -- designed to create an opportunity for emerging investment firms -- now exceeds \$2.5 billion in overall earnings and last year outperformed the system as a whole.

**GOING GREEN.** Comptroller Franchot has called for new investment in green technology and the life sciences. Doing so will further diversify the short-term portfolio while positioning our State for long-term investment gain in a sector in which our State is a national leader.

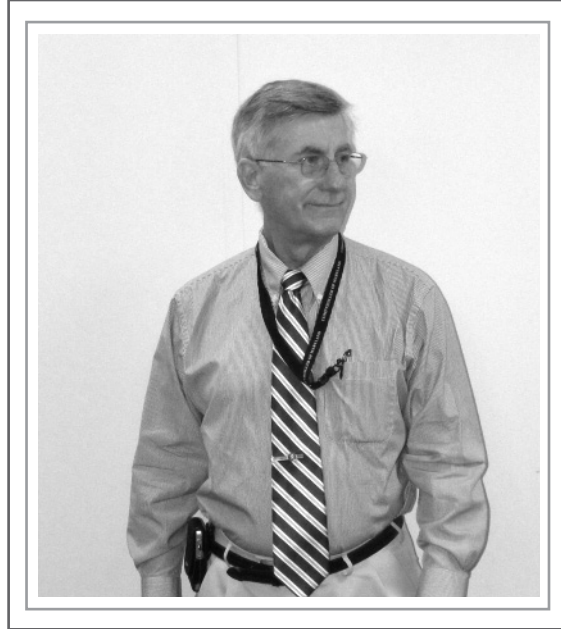

**BROADBAND.** A member of the Board of Public Works, Comptroller Franchot successfully fought to remove bureaucratic hurdles that hampered efforts to provide Maryland's rural areas with broadband technology.

**WINERIES.** The Comptroller has worked hard to promote Maryland's burgeoning winery industry by raising awareness and advocating for the wineries. He brought together a broad coalition of stakeholders to help write and pass the Maryland Wineries Act of 2010 which created a uniform statewide structure for wineries to host events, conduct tastings and other activities that will lead to increased sales, more tourist trade and greater recognition for Maryland wineries.

# Dr. Roland L. Unger

*Director, General Accounting Division*

*1949 - 2010*

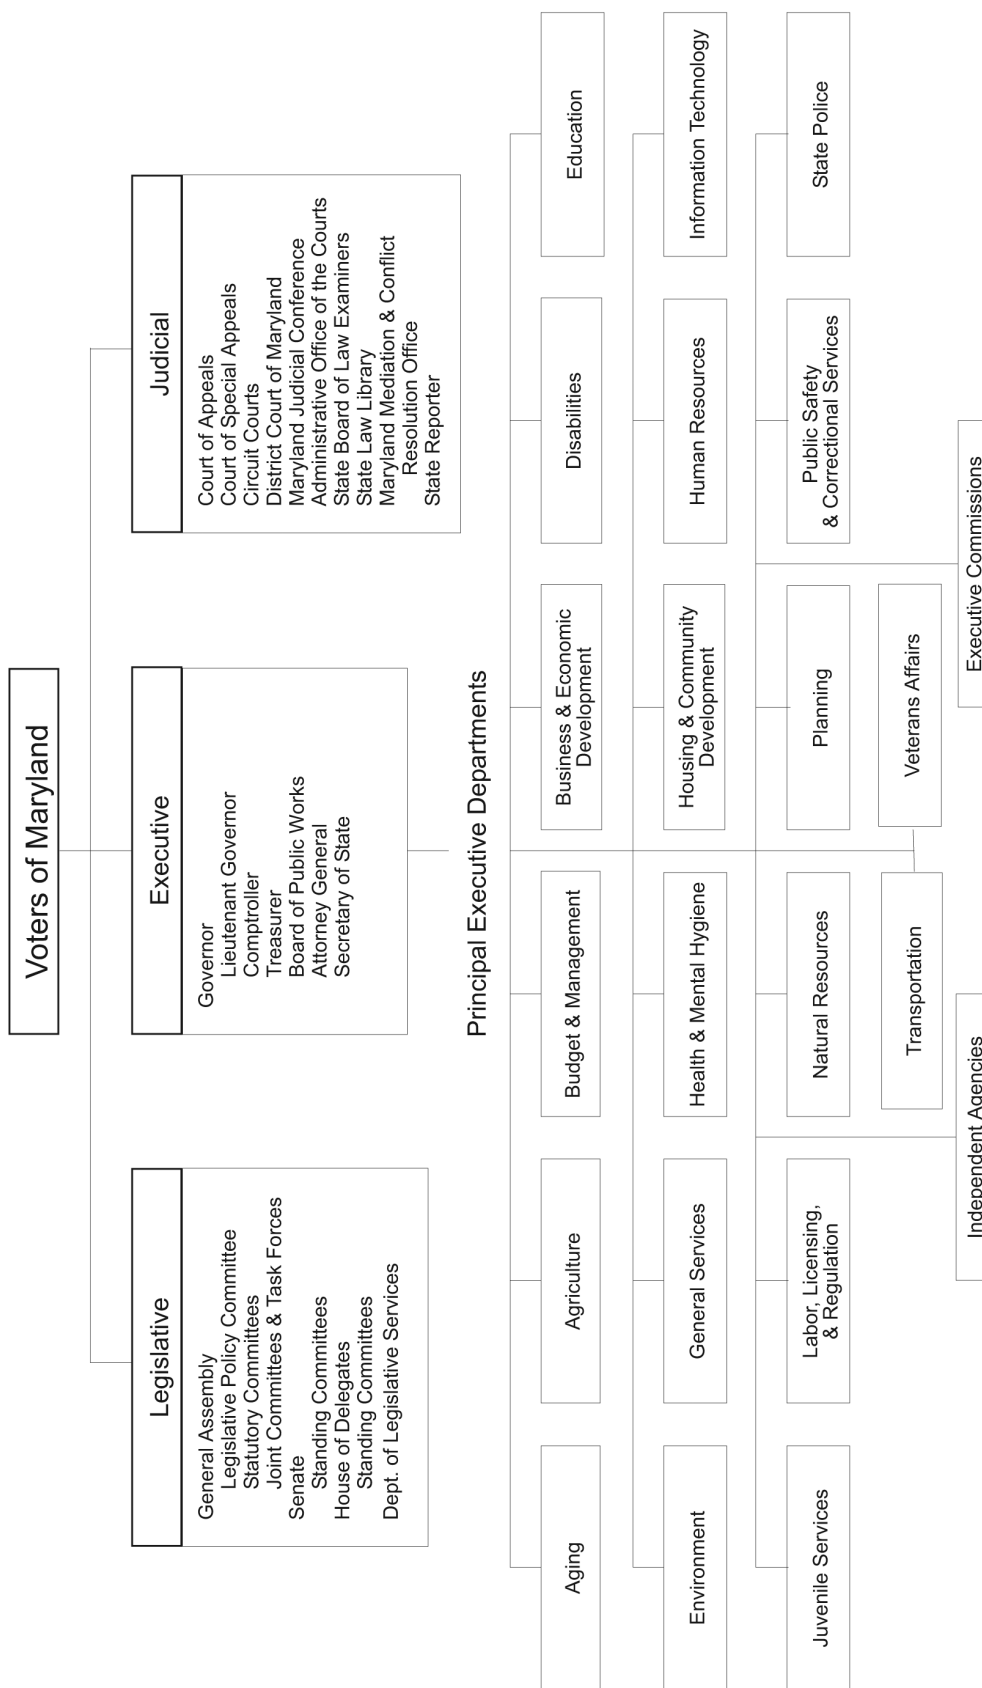

The Comptroller's Office lost a key member of its executive management team in September 2010 with the death of Dr. Roland L. Unger, head of the agency's General Accounting Division.

Although Dr. Unger had only been with the Comptroller's Office since June 2009, he became an integral part of team making many efficiency improvements resulting in significant savings for the State. He was beloved by his employees for his easy going nature and compassion.

Before joining the agency, Dr. Unger served as the city of Westminster's director of finance managing a \$40 million budget. Prior to that post, Dr. Unger was the chief financial officer for the Maryland Supplemental Retirement Plans supervising \$2 billion in assets for 66,000 employee participants. He also served as a Certified Public Accountant in his own firm and others. Before entering the financial world, Dr. Unger protected the citizens of Baltimore City and county as a SWAT team leader and foot patrol officer.

He is survived by his wife Ann and their four children Christian, Christine, Jonathan and Sarah.

STATE OF MARYLAND  
Comprehensive Annual Financial Report

# INTRODUCTORY SECTION

**Peter Franchot**  
Comptroller

Honorable Members of the General  
Assembly and the Governor,  
State of Maryland

December 10, 2010

The Comprehensive Annual Financial Report (CAFR) of the State of Maryland (State), for the fiscal year ended June 30, 2010, includes the financial statements of the State as well as information required by Title 2, Section 102 of the State Finance and Procurement Article of the Annotated Code of Maryland. Responsibility for both the accuracy of the presented data and the completeness and fairness of the presentation, including all disclosures, rests with the Office of the Comptroller.

The statutes of the State require an audit of every unit of the Executive and Judicial branches of government, including the Comptroller of Maryland's records, by the Legislative Auditor at least every three years. The Legislative Auditor is required to be and is a certified public accountant. The Legislative Auditor makes fiscal, compliance and performance audits of the various agencies and departments of the State and issues a separate report covering each of those audits. The primary purpose of the reports is to present the Legislative Auditor's findings relative to the fiscal management of those agencies and departments.

Additionally, my office requires an audit of the State's basic financial statements by a firm of independent auditors selected by an audit selection committee composed of members from the Executive and Legislative branches of State government. This requirement has been complied with, and the opinion of SB & Company, LLC, has been included in the financial section of this report. SB & Company, LLC is also performing an audit to meet the requirements of the Office of Management and Budget (OMB) Circular A-133, "Audits of States, Local Governments and Non-Profit Organizations," and such information will be contained in another reporting package.

The State has issued guidelines to its agencies for establishing effective internal controls. As a recipient of Federal assistance, the State is responsible for ensuring compliance with laws and regulations related to such assistance. This compliance is accomplished through the internal control guidelines. Because the cost of internal control should not exceed anticipated benefits, the objective is to provide reasonable, rather than absolute, assurance that the financial statements are free of any material misstatements.

The accompanying financial statements include all funds of the State (primary government), as well as all component units. Component units are legally separate entities for which the primary government is financially accountable. The various colleges and universities, the College Savings Plans of Maryland, and the Maryland Stadium Authority are reported as major component units. The Maryland Environmental Service, the Maryland Industrial Development Financing Authority, the Maryland Food Center Authority and the Maryland Technology Development Corporation are combined and presented as non-major component units.

Accounting principles generally accepted in the United States of America require that management provide a narrative introduction, overview and analysis to accompany the basic financial statements in the form of Management's Discussion and Analysis (MD&A). This letter of transmittal is designed to complement the MD&A and should be read in conjunction with it. The MD&A can be found immediately following the report of the independent public accountants.

## **Background Information on the State:**

Maryland ratified the United States Constitution on April 28, 1788. Its capitol is Annapolis, where the principal activities of state government are centered. Its employment is based largely in services, trade and government. These sectors, along with finance, insurance and real estate are the largest contributors to the gross state product. The State has a bicameral legislature, the General Assembly,

composed of the Senate with 47 members and the House of Delegates with 141 members. The General Assembly meets annually for a 90-day session beginning on the second Wednesday in January.

The Maryland Constitution requires the Governor to submit to the General Assembly a balanced budget for the following year. The General Assembly cannot increase the budget except in certain organizational units. The budget currently uses a legally mandated budgetary fund structure. Each State agency is provided appropriations at a program level, which is the level at which expenditures cannot legally exceed the appropriations. The State also utilizes an encumbrance system to serve as a tool for managing available appropriations. Maryland maintains its accounts to conform with the legally mandated budget and also to comply with generally accepted accounting principles. Financial control is generally exercised under the budgetary system.

There is a Spending Affordability Committee which consists of certain designated officers of the General Assembly and other members as may be appointed by the President of the Senate and the Speaker of the House of Delegates. Each year the Committee must submit a report to the General Assembly's Legislative Policy Committee and to the Governor recommending the level of State spending, the level of new debt authorization, the level of State personnel and the use of any anticipated surplus funds.

Also, the General Assembly created a Capital Debt Affordability Committee, the members of which are the Treasurer, the Comptroller, the Secretary of Budget and Management, the Secretary of Transportation, and one person appointed by the Governor. This Committee is required to submit to the Governor by September 10 of each year an estimate of the maximum amount of new general obligation debt that prudently may be authorized. The Committee's recent reports encompass all tax supported debt, including in addition to general obligation debt, bonds issued by the Department of Transportation, bonds issued by the Maryland Stadium Authority and capital lease transactions. Although the Committee's responsibilities are advisory only, the Governor is required to give due consideration to the Committee's finding in preparing a preliminary allocation of new general obligation debt authorizations for the next ensuing fiscal year.

## **Information on the State's Economic Condition:**

Damage caused to Maryland's economy by the recent recession will likely not be undone for an extended period of time. At peak levels of employment in February 2008, there were over 2.6 million jobs in the State; at the trough, exactly two years later, there were 139,000 fewer jobs. The unemployment rate has more than doubled, from 3.5% at the onset of the recession to a peak of 7.7%. Both wage income and total personal income have seen their worst extended periods of growth in over five decades, declines in capital gains have exceeded those experienced ten years ago, home prices continue to fall and home sales have, in recent months, resumed double-digit declines. Nevertheless, Maryland's economy is showing signs of the emerging national recovery.

Since late Spring, many measures of Maryland's economy have shown stabilization, if not a resumption of growth. On a year-over-year basis, employment has increased four consecutive months, adding almost 50,000 jobs to the rolls. Several industries have added jobs through the first three quarters of the year, including federal government (up 5.8% partly due to temporary Census employment), professional and business services (up 1.5%), education and health services (up 1.4%) and leisure and hospitality services (up 3.5%). In terms of size of the industry and average pay, the former three are likely the most important industries in the State. All four have shown strong acceleration throughout the year, as has every major industry except manufacturing, transportation and utilities, and state and local government. Through September, total employment has declined 0.5% for the year, much improved over the 3.1% decline of calendar year 2009.

As is the case nationwide, however, the unemployment rate has not fallen much from its peak and, in fact, in recent months the unemployment rate has crept upwards. In September, the unemployment rate stood at 7.5%, up from 7.1% in June and July. Nationally, the unemployment rate was at 9.6%, down slightly from its peak of 10.1% in October 2009. A broader measure of unemployment, including those who have not looked for a job in the past four weeks and those who are working part-time who would like to be employed full-time, has continued to increase, rising from 6.3% at the start of the recession to 10.2% at the end of the recession, in June 2009, to 13.0% in mid-2010. While employment growth has resumed, the labor market is a long way from healthy.

With the troubles in the labor market, growth in personal income has suffered. All four quarters of 2009 saw growth of 0.7% or less. The only comparable period is 1954, during which personal income increased 0.46%, slightly better than the 0.44% growth of 2009. The next lowest annual rate of growth in the intervening period was 3.4% in 1958. Personal income has rebounded in 2010,

but only to a degree, with growth of about 2.4% for the first two quarters of the year. The primary cause for the slowdown in personal income is the falloff in employment; wage and salary income declined 2.0% in the first quarter of 2009, and fell 0.8% over the course of the year. Wage and salary income is roughly half of total personal income. Both wage income and total personal income have recovered in the first quarter of 2010, increasing roughly 2.4% and 1.4% respectively, although this recovery is weak indeed.

One current bright spot is the impact on Maryland of the Base Realignment and Closure (BRAC) process. While a rough idea of the impact of BRAC has existed since 2005, it is only in recent months that these defense-related jobs have actually been moving into the State. Through the third quarter of 2010, roughly 1,200 jobs have been moved into Maryland, primarily at Aberdeen Proving Ground. Another 5,000 or so defense contractors and similar positions have moved into or been created in the State. Preparation for these moves has created about 4,300 temporary construction jobs. Through September 2011, a total of 21,400 military and related jobs will move into the State, and at least as many contractor positions are expected. These changes will help to improve an otherwise sluggish job market.

While Maryland's economy may be, in many respects, in a better position than most other states, a strong rebound is not expected. Troubles in the housing market have locked many homeowners into place, in Maryland and elsewhere, limiting the flexibility necessary to bring equilibrium to the labor market. Troubles in the housing market, as well as lingering uncertainty about job stability, are keeping growth in consumer spending to low levels. And tightening government budgets, possibly even at the federal level in the near future, may counterbalance some growth in the private sector. It does now appear, though, that slow growth—perhaps not steady—of Maryland's economy is the most reasonable expectation through 2011.

## **Major Initiatives and Long Term Financial Planning:**

Under current economic conditions, the State will continue to work through its agencies to identify budget reductions and take other actions to bring the budget into balance in fiscal year 2011. General fund spending will be \$265 million below fiscal year 2010 and, most significantly, below fiscal year 2007. Total spending will be \$32.1 billion, \$249 million less than fiscal year 2010. The budget balancing strategy includes bonding, within the limits of the Capital Debt Affordability Committee, expenditures previously supported by special funds and transferring the special funds to the general fund.

Budget priorities include maintaining progress in programs that protect Maryland families. Medicaid will receive \$5.9 billion in fiscal year 2011 and together with the Maryland Children's Health Program will provide access to medical care for more than 800,000 Marylanders – 214,000 more than in fiscal year 2007. More than 250,000 Maryland households will receive energy assistance in fiscal year 2011, a 27% increase over fiscal year 2007. Maryland will continue to prioritize funding for public education. Local school systems will receive \$5.7 billion in fiscal year 2011, the most funding ever for primary and secondary education. In addition, \$250 million will be provided for public school construction.

The State will invest in industries and activities that create and retain jobs in Maryland. In fiscal year 2011, the new Job Creation and Recovery Tax Credit is allocated \$20 million to help businesses hire unemployed Marylanders, while the State's capital budget will support more than 20,000 construction jobs. Maryland will continue its commitment to economic development. The Bio 2020 Initiative, including funds for advance stem cell research, Maryland's biotechnology tax credit, and development of capital facilities, is funded at \$43.3 million in fiscal year 2011. The fiscal year 2011 capital budget includes \$85.8 million for full funding of land preservation programs. Continuing a commitment to restore the Chesapeake Bay, the 2010 Chesapeake Bay Trust Fund will receive \$20 million in fiscal year 2011, doubling the amount provided in either of its first two years. As the State plans for the significant growth from BRAC, the fiscal year 2011 capital budget and capital transportation program provide \$823 million for BRAC projects, bringing the State's total investment in BRAC readiness to more than \$3.5 billion.

The Government Finance Officers Association of the United States and Canada (GFOA) awarded a Certificate of Achievement for Excellence in Financial Reporting to the State of Maryland for its Comprehensive Annual Financial Report for the fiscal year ended June 30, 2009. The Certificate of Achievement is a prestigious national award recognizing conformance with the highest standards for preparation of state and local government financial reports.

In order to be awarded a Certificate of Achievement, a government unit must publish an easily readable and efficiently organized comprehensive annual financial report. This report must satisfy both generally accepted accounting principles and applicable legal requirements.

A Certificate of Achievement is valid for a period of one year only. The State of Maryland has received a Certificate of Achievement for the last 30 consecutive years (fiscal years ended 1980-2009). We believe that our current comprehensive annual financial report continues to conform to the Certificate of Achievement Program requirements, and we are submitting it to the GFOA to determine its eligibility for another certificate.

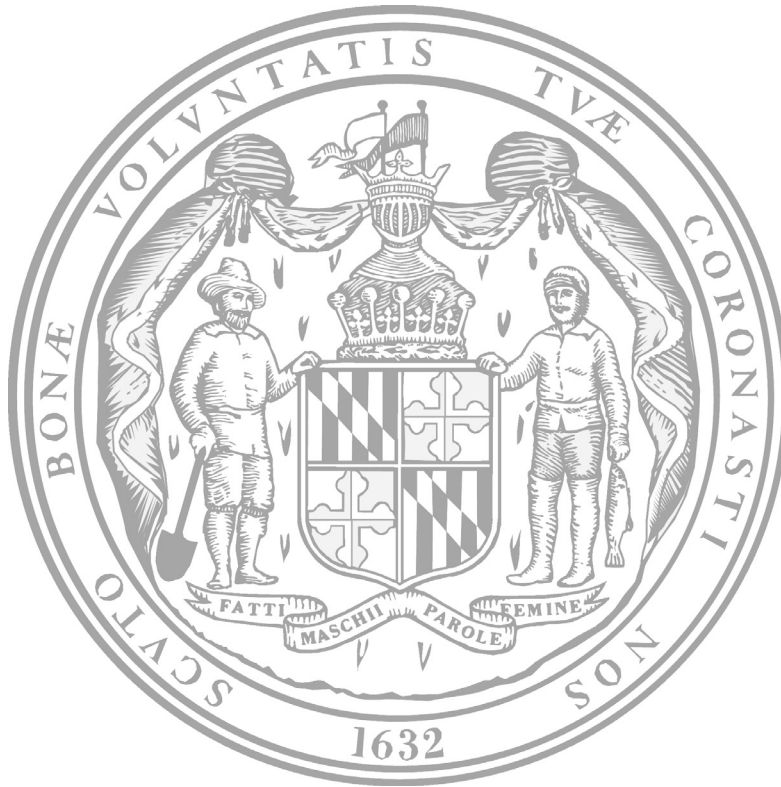

The preparation of the Comprehensive Annual Financial Report on a timely basis could not have been accomplished without the efforts and dedication of the staff of the General Accounting Division with assistance from other personnel from the various departments and agencies of the State.

I will be pleased to furnish additional information on the State's finances upon request.

Sincerely,

A handwritten signature in black ink, reading "Peter Franchot". The signature is written in a cursive, flowing style with a large initial "P" and a long, sweeping underline.

Peter Franchot,  
Comptroller of Maryland

STATE OF MARYLAND  
Comprehensive Annual Financial Report

## FINANCIAL SECTION

## REPORT OF INDEPENDENT PUBLIC ACCOUNTANTS

The Honorable Peter Franchot  
Comptroller of Maryland

We have audited the accompanying financial statements of the governmental activities, the business-type activities, the aggregate discretely presented component units, each major fund, and the aggregate remaining fund information of the State of Maryland (the State), as of and for the year ended June 30, 2010, which collectively comprise the State's basic financial statements as listed in the table of contents. These financial statements, schedules and supplementary information are the responsibility of the State's management. Our responsibility is to express an opinion on these financial statements based on our audit.

We did not audit the financial statements of (1) certain Economic Development Loan Programs; (2) the Maryland State Lottery Agency; (3) the Maryland Transportation Authority; (4) the Economic Development Insurance Programs; (5) certain foundations included in the higher education component units; (6) the Maryland Food Center Authority; (7) the Maryland Technology Development Corporation; and (8) the Investment Trust Fund, which represent the percentages of the total assets, total net assets, and total operating revenues or additions included in the accompanying financial statements.

	Percentage of Opinion Unit		
	Total Assets	Total Net Assets	Total Operating Revenues
<b>Business-Type Activities</b>

Those financial statements were audited by other auditors whose reports thereon have been furnished to us, and our opinion, insofar as it relates to the amounts included for the above-mentioned funds and component units, is based on the reports of the other auditors.

We conducted our audit in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit and the reports of the other auditors provide a reasonable basis for our opinion.

In our opinion, based on our audit and the reports of the other auditors, the financial statements referred to above present fairly, in all material respects, the respective financial position of the governmental activities, the business-type activities, the aggregate discretely presented component units, each major fund, and the aggregate remaining fund information of the State, as of June 30, 2010, and the respective changes in financial position and cash flows, where applicable, thereof for the year then ended in conformity with accounting principles generally accepted in the United States of America.

The management's discussion and analysis; required supplemental schedules of funding progress and employer contributions for the Maryland Pension and Retirement System, the Maryland Transit Administration Pension Plan, and Other Post-employment Benefits Plan; and the respective budgetary comparison for the budgetary general, special and Federal funds as listed in the table of contents are not a required part of the basic financial statements but are supplementary information required by the accounting principles generally accepted in the United States of America. We and the other auditors have applied certain limited procedures, which consisted principally of inquiries of management regarding the methods of measurement and presentation of the required supplementary information. However, we did not audit the information and express no opinion on it.

Our audit was conducted for the purpose of forming an opinion on the financial statements that collectively comprise the State's basic financial statements. The combining financial statements, schedules, introductory and statistical sections, and financial schedules required by law, as listed in the table of contents, are presented for purposes of additional analysis and are not a required part of the basic financial statements. The combining financial statements and schedules have been subjected to the auditing procedures applied by us and the other auditors in the audit of the basic financial statements and, in our opinion, based on our audit and the reports of the other auditors, are fairly stated in all material respects in relation to the basic financial statements taken as a whole. The introductory and statistical sections of this report and the financial schedules required by law have not been subjected to the auditing procedures applied by us or the other auditors in the audit of the basic financial statements and, accordingly, we express no opinion on them.

# STATE OF MARYLAND

## Management's Discussion and Analysis

Management of the State of Maryland provides this narrative overview and analysis of the financial activities of the State for the fiscal year ended June 30, 2010. Please read it in conjunction with the Comptroller's letter of transmittal, which can be found in the Introductory Section of this report, and the State's financial statements which follow this section.

### ***Financial Highlights***

#### *Government-wide*

- Maryland reported net assets of \$12.6 billion in fiscal year 2010 and \$14.5 billion in fiscal year 2009.
- Of the net assets in fiscal year 2010, a deficit balance of \$5.2 billion was reported as total unrestricted net assets, which includes a \$6.7 billion deficit balance in governmental activities and a \$1.5 billion balance in business-type activities.
- The State's total net assets decreased by \$2.0 billion as a result of this year's operations. The net assets for governmental activities decreased by \$2.1 billion (22.1%). Net assets of business-type activities increased by \$117 million (2.3%).
- The State's governmental activities had total expenses of \$29.9 billion, total revenues of \$27.2 billion and net transfers from business-type activities of \$615 million for a net decrease of \$2.1 billion.
- Business-type activities had total expenses of \$3.9 billion, program revenues of \$4.6 billion, and transfers out of \$615 million for a net increase in net assets of \$117 million.
- Total State revenues were \$31.8 billion, while total costs for all programs were \$33.8 billion.

#### *Fund Level*

- Governmental funds reported a combined fund balance of \$1.8 billion, a decrease of \$155 million (7.8%) from the prior year.
- The General Fund reported an unassigned fund balance deficit of \$341 million and a remaining fund balance (nonspendable, restricted, and committed) of \$1.6 billion, compared to an unreserved fund balance of \$147 million and a reserved fund balance of \$1.4 billion last year. This represents a net decrease of \$261 million in General Fund, fund balance. The total unassigned fund balance deficit in the governmental funds was \$700 million, compared to the unreserved fund balance of \$42 million in the prior year.
- Governmental funds reported a total nonspendable, restricted, and committed fund balance of \$2.5 billion in 2010, compared to a total reserved fund balance of \$1.9 billion in the prior year.

#### *Long-term Debt*

- Total bonds and obligations under long-term leases at year end was \$15.4 billion, a net increase of \$1.4 billion (9.9%) over the prior year.
- \$1.9 billion General Obligation Bonds of which, \$798 million were refunding bonds, and \$140 million Transportation Bonds were issued during the year.

### ***Overview of the Financial Statements***

This discussion and analysis is intended to serve as an introduction to the State of Maryland's basic financial statements. The State's basic financial statements comprise three components: 1) government-wide financial statements, 2) fund financial statements, and 3) notes to the financial statements. This report also contains additional required supplementary information and other supplementary information in addition to the basic financial statements.

## ***Government-wide Financial Statements (Reporting the State as a Whole)***

The government-wide financial statements provide a broad overview of the State's operations in a manner similar to a private-sector business. The statements provide both short-term and long-term information about the State's financial position, which assists readers in assessing the State's economic condition at the end of the fiscal year. The statements include all fiscal year revenues and expenses, regardless of whether cash has been received or paid. The government-wide financial statements include the following two statements.

The *Statement of Net Assets* presents all of the State's assets and liabilities, with the difference between the two reported as "net assets". Over time, increases and decreases in the State's net assets may serve as a useful indicator of whether the financial position of the State is improving or deteriorating.

The *Statement of Activities* presents information showing how the State's net assets changed during the most recent fiscal year. All changes in net assets are reported as soon as the underlying event giving rise to the change occurs, regardless of the timing of related cash flows. Thus, revenues and expenses are reported in this statement for some items that will not result in cash flows until future fiscal periods (such as uncollected taxes and earned but unused vacation leave). This statement also presents a comparison between direct expenses and program revenues for each function of the State.

The above financial statements distinguish between the following three types of state programs or activities:

*Governmental Activities* - The activities in this section are typically supported by taxes and intergovernmental revenues, i.e., federal grants. Most services normally associated with State government fall into this category, including the Legislature, Judiciary and the general operations of the Executive Department.

*Business-Type Activities* – These functions normally are intended to recover all or a significant portion of their costs through user fees and charges to external users of goods and services. These business-type activities of the State include insurance and loan programs for economic development, the Unemployment Insurance Program, the Lottery, the Transportation Authority and Maryland Correctional Enterprises, a program which constructs office furnishings utilizing the prisons' inmate population.

*Discretely Presented Component Units* – The government-wide statements include operations for which the State has financial accountability, but are legally separate entities. Financial information for these component units is reported separately from the financial information presented for the primary government. The component unit activities include Higher Education, the Maryland Prepaid College Trust, the Maryland Stadium Authority and other non-major proprietary activities. All of these entities operate similarly to private sector business and to the business-type activities described above. The component unit Higher Education consists of the University System of Maryland, Morgan State University, St. Mary's College and Baltimore City Community College and certain affiliated foundations. The non-major component units include the Maryland Food Center Authority, Maryland Environmental Service, Maryland Industrial Development Financing Authority and the Maryland Technology Development Corporation.

Complete financial statements of the individual component units can be obtained from the Comptroller of Maryland, LLG Treasury Building, Annapolis, Maryland 21404.

This report includes two schedules (pages 29 and 31) that reconcile the amounts reported on the governmental fund financial statements (modified accrual accounting) with governmental activities (accrual accounting) on the government-wide statements. The following summarizes the impact of transitioning from modified accrual to accrual accounting:

- Capital assets used in governmental activities are not reported on governmental fund statements.
- Certain tax revenues that are earned and other assets that are not available to pay for current period expenditures are deferred in governmental fund statements, but are recognized on the government-wide statements.
- Deferred bond issuance costs are capitalized and amortized on the government-wide statements, but reported as expenditures in governmental funds.

- Unless currently due and payable, long-term liabilities, such as capital lease obligations, compensated absences, litigation, and bonds and notes payable, only appear as liabilities in the government-wide statements.
- Capital outlays result in capital assets on the government-wide statements, but are reported as expenditures on the governmental fund statements.
- Bond and note proceeds result in liabilities on the government-wide statements, but are recorded as other financing sources on the governmental fund statements.
- Certain other transactions represent either increases or decreases in liabilities on the government-wide statements, but are reported as expenditures on the governmental fund statements.

The government-wide financial statements can be found on pages 24-27 of this report.

## ***Fund Financial Statements***

A fund is a grouping of related accounts that is used to maintain control over resources that have been segregated for specific activities or objectives. The State, like other state and local governments, uses fund accounting to ensure and demonstrate compliance with finance-related legal requirements. The State's funds can be divided into three categories: governmental, enterprise, and fiduciary. Each of these categories uses a different accounting approach.

*Governmental funds* – Most of the basic services provided by the State are financed through governmental funds. Governmental funds are used to account for essentially the same functions reported as governmental activities in the government-wide financial statements. However, unlike the government-wide financial statements, the governmental fund financial statements focus on near-term inflows and outflows of spendable resources and on the balances of spendable resources available at the end of the fiscal year. Such information may be useful in evaluating the State's near-term financing requirements. These statements provide a detailed short-term view of the State's finances that assists in determining whether there will be adequate financial resources available to meet the current needs of the State.

Because the focus of governmental funds is narrower than that of the government-wide financial statements, it is useful to compare the information presented for governmental funds with similar information presented for governmental activities in the government-wide financial statements. By doing so, readers may better understand the long-term impact of the State's near-term financing decisions. Both the governmental fund balance sheet and the governmental fund statement of revenues, expenditures and changes in fund balances provide a reconciliation to facilitate this comparison between governmental funds and governmental activities. These reconciliations are presented on the pages immediately following the governmental funds financial statements.

The State maintains five governmental funds. Information is presented separately in the governmental fund balance sheet and in the governmental fund statement of revenues, expenditures and changes in fund balances for the General Fund and the Department of Transportation-special revenue fund, both of which are considered to be major funds. Data from the remaining three governmental funds are combined into a single, aggregated presentation. Data for the non-major governmental funds, namely, the debt service fund for general obligation bonds, the debt service fund for transportation revenue bonds and the capital projects fund, is provided in the form of combining statements elsewhere in this report. These funds are reported using modified accrual accounting, which measures cash and all other assets which can be readily converted to cash. The basic governmental funds financial statements can be found on pages 28 and 30 of this report.

*Enterprise funds* – Enterprise funds are used to show activities that operate similar to activities of commercial enterprises. These funds charge fees for services provided to outside customers including local governments. Enterprise funds provide the same type of information as the government-wide financial statements, only in more detail. There is no reconciliation needed between the government-wide financial statements for business-type activities and the enterprise fund financial statements because they both utilize accrual accounting, the same method used for businesses in the private sector.

The State has six enterprise funds, four of which are considered to be major enterprise funds. These funds are: Economic Development Loan Programs, the Unemployment Insurance Program, the Lottery Agency and the Transportation Authority. Data

for the non-major enterprise funds, Economic Development Insurance Programs and Maryland Correctional Enterprises, are combined into a single aggregated presentation. Individual fund data for these non-major enterprise funds is provided in the form of combining statements elsewhere in this report.

The basic enterprise funds financial statements can be found on pages 34 - 38 of this report.

*Fiduciary funds* – Fiduciary funds are used to account for resources held for the benefit of parties outside the state government. Fiduciary funds are not reflected in the government-wide financial statements because the resources of these funds are restricted in purpose and are not available to support the State's own programs. Fiduciary funds use accrual accounting.

The State's fiduciary funds include the Pension and Other Employee Benefits Trust Funds (Pension Trust), the Investment Trust Fund, the Postretirement Health Benefits Trust Fund (OPEB Trust) and Agency Funds. The Pension and Other Employee Benefits Trust Funds consist of the Retirement and Pension System, the Maryland Transit Administration Pension Plan and the Deferred Compensation Plan. The Postretirement Health Benefits Trust Fund accumulates funds to assist with the costs of the State's postretirement health insurance subsidy. The Investment Trust Fund accounts for the transactions, assets, liabilities and fund equity of an external investment pool. Agency funds account for the assets held for distribution by the State as an agent for other governmental units, organizations or individuals. Individual fund detail for the fiduciary funds can be found in the combining financial statements.

The basic fiduciary funds financial statements can be found on pages 39 - 40 of this report.

*Combining Financial Statements, Component Units* – The government-wide financial statements present information for the component units in a single aggregated column in the Statement of Net Assets and the Statement of Activities. Combining Statement of Net Assets and Combining Statement of Activities have been provided for the Component Unit Proprietary Funds and provide detail for each major proprietary component unit, with a combining column for the non-major component units. Individual financial statement information for the non-major component units is provided elsewhere in this report.

The combining financial statements for the component units can be found on pages 42 - 44 of this report.

## ***Notes to the Financial Statements***

The notes provide additional information that is essential to a full understanding of the data provided in the government-wide and the fund financial statements. The notes to the financial statements can be found on pages 46 - 102 of this report.

## ***Required Supplementary Information***

The required supplementary information includes budgetary comparison schedules for the budgetary general, special revenue and federal funds, along with a reconciliation of the statutory and Accounting Principles Generally Accepted in the United States of America (GAAP) General and Special Revenue Fund, fund balances at fiscal year end. This report also presents certain required supplementary information concerning the State's progress in funding obligations to provide pension benefits and other post-employment benefits and includes a footnote concerning budgeting and budgetary control. Required supplementary information immediately follows the notes to the financial statements.

## ***Other Supplementary Information***

### ***Combining Financial Statements***

The combining financial statements referred to earlier in connection with non-major governmental, enterprise, and fiduciary funds and non-major component units are presented immediately following the required supplementary information.

## Government-Wide Financial Analysis

The State's combined net assets (government and business-type activities) totaled \$12.6 billion at the end of 2010 and \$14.5 billion at the end of 2009.

### Net Assets as of June 30, (Expressed in Millions)

	Governmental Activities		Business-type Activities		Total	
	2010	2009	2010	2009	2010	2009
Current and other assets	\$ 5,951	\$ 5,342	\$ 8,201	\$ 8,053	\$ 14,152	\$13,395
Capital assets	19,252	19,265	3,894	3,207	23,146	22,472
Total assets	25,203	24,607	12,095	11,260	37,298	35,867
Long-term liabilities	13,195	11,369	5,930	5,375	19,125	16,744
Other liabilities	4,722	3,882	875	697	5,597	4,579
Total liabilities	17,917	15,251	6,805	6,072	24,722	21,323
Net assets:						
Invested in capital						
assets, net of related debt	13,796	14,381	1,555	1,368	15,351	15,749
Restricted	155	127	2,281	2,321	2,436	2,448
Unrestricted	(6,665)	(5,152)	1,454	1,499	(5,211)	(3,653)
Total net assets	\$ 7,286	\$ 9,356	\$ 5,290	\$ 5,188	\$ 12,576	\$14,544

The largest portion of the State's net assets, \$15.4 billion, reflects investment in capital assets such as land, buildings, equipment and infrastructure, less any related debt to acquire those assets that is still outstanding. The State uses these capital assets to provide services to citizens. Consequentially, these assets are not available for future spending. Although the State's investment in capital assets is reported net of related debt, it should be noted that the resources needed to repay this debt must be provided from other sources, since the capital assets themselves cannot be used to liquidate these liabilities.

In addition, a portion of the State's net assets, \$2.4 billion, represents resources that are subject to external restrictions or enabling legislation on how they may be used. The remaining balance for unrestricted net assets, a deficit of \$5.2 billion, reflects the State's expenses over revenues.

The following condensed financial information was derived from the government-wide Statement of Activities and reflects how the State's net assets changed during the fiscal year.

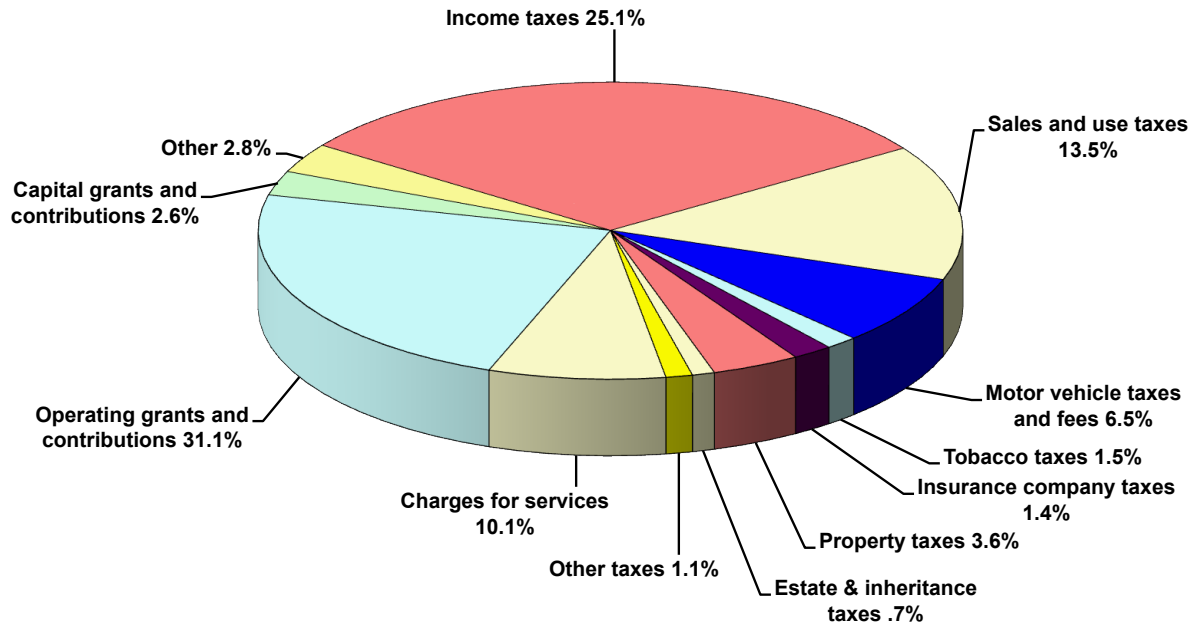

## Changes in Net Assets

For the Year Ended June 30,

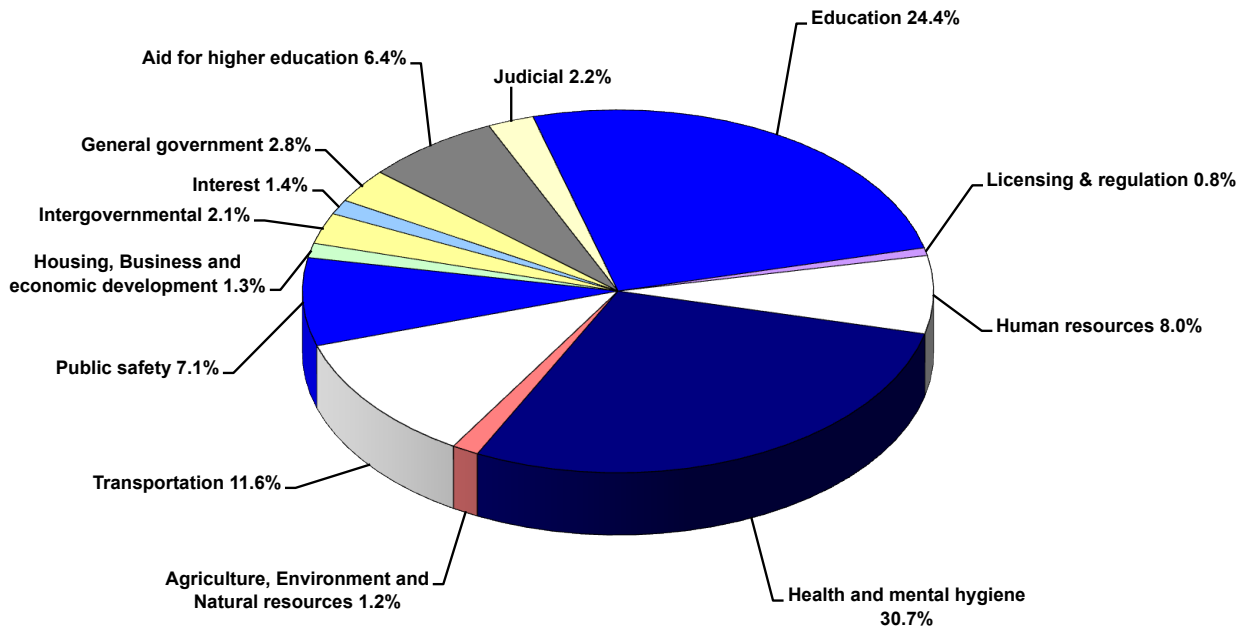

(Expressed in Millions)

	Governmental Activities		Business-type Activities		Total	
	2010	2009	2010	2009	2010	2009
Revenues:						
Program revenues:						
Charges for services	\$ 2,819	\$ 2,405	\$3,613	\$2,932	\$ 6,432	\$ 5,337

Change in net assets	(2,070)	(2,548)	117	(312)	(1,953)	(2,860)
Net assets - beginning (as restated)	9,356	11,904	5,173	5,500	14,529	17,404
Net assets - ending	\$ 7,286	\$ 9,356	\$5,290	\$5,188	\$12,576	\$14,544

## 2010 REVENUES BY SOURCE - GOVERNMENTAL ACTIVITIES

## 2010 EXPENSES BY FUNCTION - GOVERNMENTAL ACTIVITIES

### Governmental Activities

Comparing current year activities to the prior year discloses that revenues increased by \$1.8 billion or 6.9%, while expenses increased by \$1.4 billion or 5.1%. The revenue increase was primarily due to an increase of \$1.6 billion or 22.3% in operating grants and an increase of \$414 million or 17.2% in charges for services. The increase in operating grants was primarily due to increases in federal revenues for Medicaid expenses, due to the economy – driven growth in enrollment; education; and temporary assistance programs in human resources. A significant portion of this increase includes growth in American Recovery and Reinvestment Act funds.

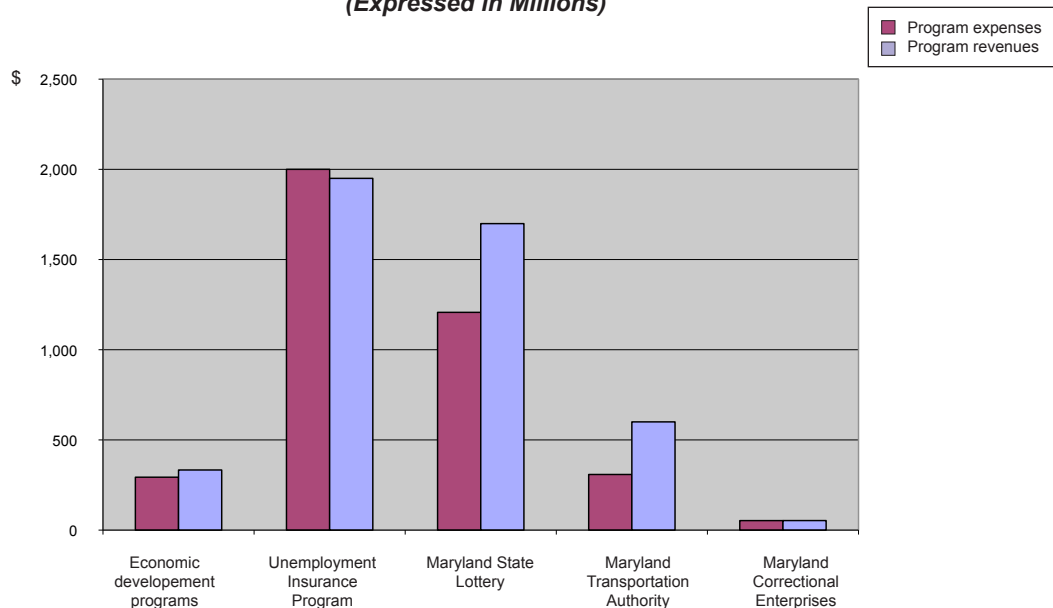

These increases were offset by a decrease of \$165 million or 2.3% in income taxes and a decrease of \$96 million or 2.5% in sales and use taxes. The decrease in taxes was primarily due to the continued declining economy nationwide. The increase in expenses was primarily due to increases of \$775 million or 9.2% in health care programs, \$258 million or 8.1% for transportation, and \$238 million or 11.0% for human resources.

### Business-type Activities

Business-type activities increased the State's net assets by \$732 million before transfers of \$615 million to governmental activities, for a net increase of \$117 million in net assets. The increase compares to an increase of \$149 million before transfers of \$461 million in the prior year. Key elements of this increase are as follows:

- The change in net assets for the Maryland Transportation Authority was an increase of \$293 million compared to an increase of \$125 million in the prior year. Net operating income was \$237 million compared to \$116 million in the prior year. Operating revenues increased by \$145 million (38.9%), including an increase in intergovernmental revenue of \$100 million of which \$55 million was received from the State of Maryland for reimbursement of construction costs for the Inter-County Connector. Operating expenses increased by \$24 million (9.4%) due primarily to increases in depreciation and insurance. Non-operating revenues and expenses increased by \$47 million, primarily for the gain on the sale of land at the Seagirt Marine Terminal (\$59 million), offset by a reduction in investment revenue (\$17 million).
- The change in net assets for the Unemployment Insurance Program was a decrease of \$68 million compared to a decrease of \$486 million in the prior year. Operating activities produced a deficit of \$1.1 billion compared to the prior year's operating deficit of \$890 million. While the Program's charges for services increased by \$503 million (114.3%), benefit payments increased by \$674 million (50.6%) due to the continued increase in the number of Marylanders collecting unemployment benefits. Federal payments for extended benefits and other programs increased by \$611 million (164.4%).

**Expenses and Program Revenues - Business-type Activities**  
(Expressed in Millions)

- Economic Development Loan Programs had a decrease of \$96 million in net assets compared to an increase of \$54 million in the prior year. The difference between years is primarily due to an increase of \$129 million in net transfers to the general fund.
- Lottery ticket sales were \$1.7 billion, an increase of \$8 million (.5%) over last year. Operating expenses decreased by \$2 million (.2%) and transfers to governmental activities increased to \$511 million in 2010, from \$493 million in 2009, an increase of 3.5%. Video Lottery Terminal (VLT) applicant fees increased by \$3 million in 2010 compared to 2009. This increase is the result of the expansion of the VLT Program. During 2010, the Video Lottery Commission approved the award of two VLT operator licenses.

## ***Financial Analysis of the State's Funds***

As of the end of the current fiscal year, the State's governmental funds reported a combined fund balance of \$1.8 billion, a decrease of \$155 million from the prior year. The combined fund balance includes a deficit of \$700 million in unassigned, including a deficit of \$341 million for the general fund and a deficit of \$359 million for the other governmental funds. The remainder of the fund balance is nonspendable, restricted, or committed based on the constraints on the specific purposes for which amounts in that fund can be spent. The remainder of fund balance is 1) unspendable because it is in the form of prepaid items, inventories and long-term loans and notes receivable (\$620 million); 2) restricted by outside parties or to pay debt service on general obligation bonds from specific taxes (\$155 million); or 3) committed to legislated purposes or to liquidate contracts and purchase orders of the prior period (\$1.7 billion). Included in committed fund balance is \$615 million in the "State Reserve Fund" which is set aside to meet future financial needs. By law, the governor must appropriate to the State Reserve Fund, the general fund surplus of the second preceding fiscal year that exceeds \$10,000,000. The unassigned general fund deficit plus the amount in the State Reserve Fund, is approximately .9 % of the total annual expenditures in governmental funds, compared with 3.0% for the prior year.

### ***General Fund***

The general fund is the major operating fund of the State. At the end of the current fiscal year, the unassigned fund balance deficit of the general fund was \$341 million, while total fund balance was \$1.2 billion. The fund balance of the State's general fund decreased by \$261 million during 2010, compared to a decrease of \$1.4 billion for 2009. Although increases in revenues, \$1.7 billion (7.7%), were greater than increases in expenditures, \$1.2 billion (5.0%), there was a deficiency of revenues compared to expenditures of \$1.0 billion in the current year.

Revenues increased by \$1.7 billion over the prior year, primarily due to increases in federal revenues, \$1.6 billion (22.5%) and charges for services, \$390 million (47.0%), and despite revenue decreases for income taxes, \$198 million (2.8%), and sales and use taxes, \$97 million (2.5%).

General fund expenditures increased by \$1.2 billion. Expenditures for education, health and mental hygiene and human resources increased by \$250 million (3.0%), \$755 million (9.1%) and \$229 million (11.1%), respectively. These increases were the result of continued increased funding for education, and continued increases in Medicaid costs and funding for food stamps and temporary assistance due to the worsening economy.

Transfers out from the general fund were \$510 million this year compared to \$475 million for the prior year. This increase was due primarily to an increase of \$26 million to the Economic Development Loan Programs.

### ***Special Revenue Fund***

The Maryland Department of Transportation special revenue fund accounts for resources used for operation of the State's transportation activities, not including debt service and pension activities. The fund balance of the Department's special revenue fund was \$336 million as of June 30, 2010, an increase of \$7 million (2.1%) from the prior fiscal year. Revenues increased by \$67 million (2.2%), expenditures decreased by \$329 million (9.7%), and other sources of financial resources decreased by \$568 million. The increase in revenues was primarily from an increase in federal revenue, and the decrease in expenditures was primarily in

intergovernmental grants and revenue sharing and capital outlays. The decrease in other sources of financial resources was due to reductions in bonds issued and an increase in transfers to the general fund.

## ***Budgetary Highlights***

Differences between the original budget and final amended budget, and the final budget and actual expenditures for the general fund for the year are summarized as follows. The budgetary schedule may be found in the Required Supplementary Information Section.

Overall, the change between the original and final general fund budget was a decrease of \$336 million or 2.4 %. The Department of Health and Mental Hygiene appropriations decreased by \$180 million primarily due to cost containment actions, partially offset by deficiency appropriations related to Medicaid enrollment growth. In addition, there were cost containment reductions due to reduced revenue estimates throughout all functions of the general fund budget.

The difference between the final budget, \$13.6 billion and actual expenditures, \$13.5 billion was \$96 million, or .7%. This amount was encumbered for future spending. The variance was primarily due to the cancellation of current and prior year encumbrances. Appropriations were cancelled primarily for legislative, judicial, health, education, and business and economic development functions.

## ***Capital Asset and Debt Administration***

### *Capital assets*

At June 30, 2010, the State had invested \$23.1 billion (net of accumulated depreciation) in a broad range of capital assets (see table below). Depreciation expense for the fiscal year totaled \$1.1 billion (\$1.0 billion for governmental activities and \$53 million for business-type activities). The increase in the State's investment in capital assets, net of depreciation expense, for the current fiscal year was \$674 million (a decrease of \$13 million for governmental activities and an increase of \$687 million for business-type activities).

### **Capital Assets as of June 30,** *(Net of Depreciation, Expressed in Millions)*

	Governmental Activities		Business-type Activities		Total	
	2010	2009	2010	2009	2010	2009
Land and improvements	\$ 3,081	\$ 2,995	\$ 404	\$ 396	\$ 3,485	\$ 3,391
Art and historical treasures	9	28			9	28
Structures and improvements	3,700	3,541	24	24	3,724	3,565
Equipment	803	788	30	30	833	818
Infrastructure	9,310	8,457	1,259	1,376	10,569	9,833
Construction in progress	2,349	3,456	2,177	1,381	4,526	4,837
Total	\$ 19,252	\$ 19,265	\$ 3,894	\$ 3,207	\$ 23,146	\$22,472

Major capital asset events during the current fiscal year for governmental activities include continued widening and/or expansion of existing highways and bridges, various transit, port and motor vehicle administration construction projects; and software development for modernized integrated tax system. Elements of the increases in capital assets of business-type activities include the Inter-County Connector and electronic toll lane projects, which resulted in increases in land and improvements and construction in progress, and the restoration of existing facilities.

Additional information on the State's capital assets can be found in footnote 10 of this report.

### *Long-term debt*

The State is empowered by law to authorize, issue and sell general obligation bonds, which are backed by the full faith and credit of the State. The State also issues dedicated revenue bonds for the Department of Transportation and various business-type activities. The payment of principal and interest on revenue bonds comes solely from revenues received from the respective activities. This dedicated revenue debt is not backed by the State's full faith and credit.

At June 30, 2010, the State had outstanding bonds totaling \$14.3 billion. Of this amount, \$6.5 billion were general obligation bonds, backed by the full faith and credit of the State. The remaining \$7.8 billion were secured solely by the specified revenue sources.

### **Outstanding Bond Debt as of June 30,**

*(Expressed in Millions)*

	Governmental Activities		Business-type Activities		Total	
	2010	2009	2010	2009	2010	2009
General Obligation Bonds (backed by the State)	\$ 6,523	\$ 5,874			\$ 6,523	\$ 5,874
Transportation Bonds (backed by specific revenues)	1,645	1,583			1,645	1,583
Revenue Bonds (backed by specific revenues)			\$ 6,162	\$ 5,423	6,162	5,423
Total	\$ 8,168	\$ 7,457	\$ 6,162	\$ 5,423	\$ 14,330	\$ 12,880

The total increase in bonded debt in the current fiscal year was \$1.5 billion (\$649 million increase related to general obligation bonds, and \$62 and \$739 million increase related to transportation and revenue bonds, respectively). The State's general obligation bonds are rated Aaa by Moody's and AAA by Standard and Poors and Fitch. During fiscal year 2010, the State issued general obligation debt totaling \$1.9 billion at a premium of \$196 million. Of this amount, \$798 million and related premium of \$130 million was for refunding bonds. On August 10, 2010 (fiscal year 2011), the State issued general obligation bonds aggregating \$485 million for capital improvements.

State law limits the amount of Consolidated Transportation Bonds, dedicated revenue debt that may be outstanding as of June 30 to the amount authorized in the budget, and this amount may not exceed \$2.6 billion. The aggregate principal amount of these bonds that was authorized to be outstanding as of June 30, 2010, was \$1.8 billion. The actual amount in Consolidated Transportation Bonds outstanding was \$1.6 billion.

Additional information on the State's long-term debt can be found in footnote 11 of this report.

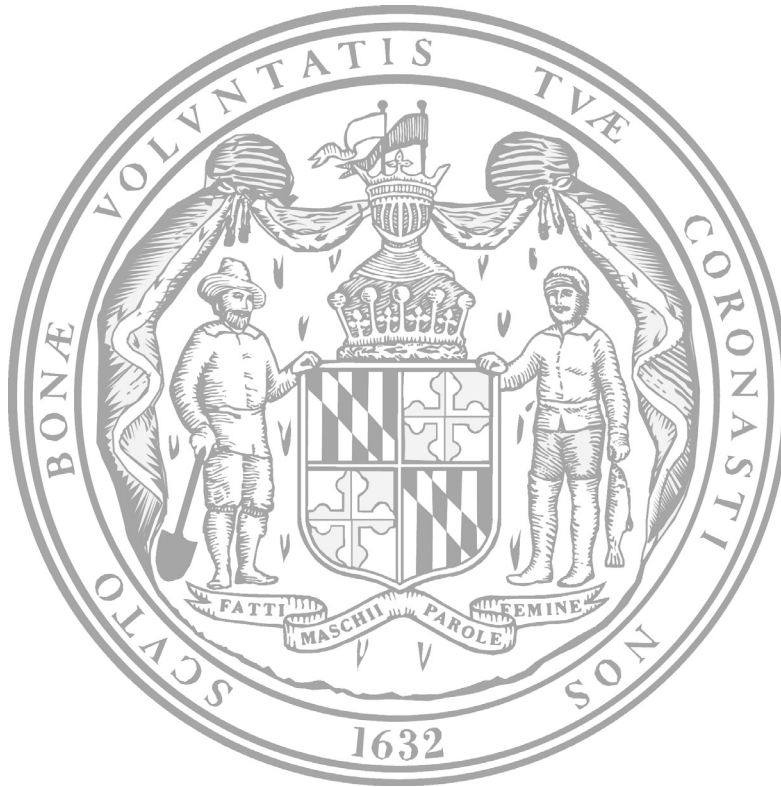

### ***Economic Factors and Next Year's Budget***

The recent national recession has slowed Maryland's economy and its effects will likely continue to be felt for an extended period of time. Economic indicators in employment, personal income and housing continued to show deterioration from the start of the recession and, in some areas, historic declines from recent decades. In this environment, the budget will be balanced in fiscal year 2011 by reducing general fund spending by \$265 million and total spending by \$249 million from fiscal year 2010.

Nevertheless, Maryland's economy is showing signs of the emerging national recovery. The Base Realignment and Closure process has begun to create defense-related jobs and should accelerate new jobs through September 2011. This and other factors such as a highly skilled workforce, employment in growth sectors such as health services, and a strong Federal government presence, should accelerate the emergence of Maryland's economy.

## ***Requests for Information***

This financial report is designed to provide a general overview of the State's finances for all those with an interest in the State's finances. Questions concerning any of the information provided in this report or requests for additional financial information should be addressed to the General Accounting Division, Office of the Comptroller, P.O. Box 746, Annapolis, Maryland 21404.

# STATE OF MARYLAND

## Reconciliation of the Statement of the Revenues, Expenditures, and Changes in Fund Balances of Governmental Funds to the Statement of Activities

For the Year Ended June 30, 2010

(Expressed in Thousands)

Amounts reported for governmental activities in the Statement of Activities (pages 26-27) are different from the amounts reported in the Statement of Revenues, Expenditures, and Changes in Fund Balances of Governmental Funds because of the following:

Net change in fund balances - total governmental funds (page 30) .....		\$ (154,851)
--	--	--------------

Governmental funds report capital outlays as expenditures. However, in the Statement of Activities, the cost of those assets is allocated over their estimated useful lives and reported as depreciation expense. This is the amount by which capital outlays exceed depreciation in the current period.

Capital outlays.....	\$1,448,945	
Depreciation expense.....	<u>(1,026,089)</u>	422,856

The net effect of various miscellaneous transactions involving capital assets (i.e., sales, trade-ins, and donations) is to decrease net assets.

Net loss on disposals and trade-ins.....	<u>(435,953)</u>	(435,953)
--	------------------	-----------

Revenues in the Statement of Activities that do not provide current financial resources are not reported as revenues in the governmental funds:

Deferred revenues for taxes are recognized, net of revenue already recognized in the prior year.....	52,132	
Deferred revenues for other revenues are recognized, net of revenue already recognized in the prior year.....	(108,538)	
Revenues from other assets are recognized, net of revenue already recognized in the prior year.....	<u>501</u>	(55,905)

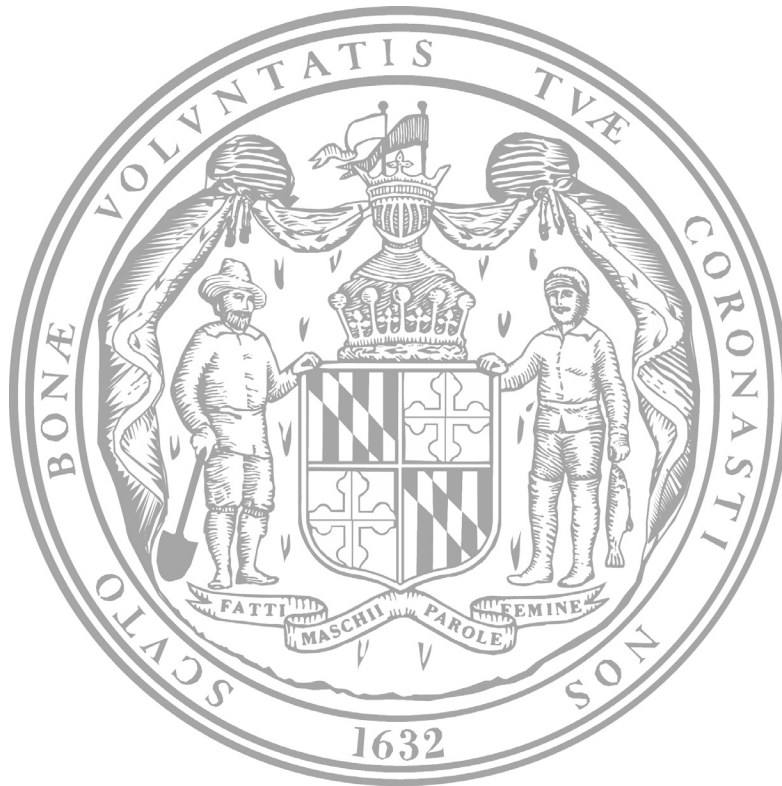

The issuance of long term debt (e.g. bonds, leases) provides current financial resources to governmental funds, while the repayment of the principal of long term debt consumes current financial resources of governmental funds. Neither transaction, however, has any effect on net assets. Also, the governmental funds report the effect of issuance costs, premiums, discounts and similar items when debt is first issued, whereas these amounts are deferred and amortized in the Statement of Activities. This amount is the net effect of these differences in the treatment of long term debt and related items.

Debt issued, General Obligation Bonds .....	(1,126,770)	
Debt issued, Transportation Bonds.....	(140,000)	
Capital lease financing.....	(15,472)	
Premiums, discounts and issuance costs.....	(35,734)	
Principal repayments:		
General Obligation Bonds.....	482,754	
Transportation Bonds .....	77,595	
Capital leases .....	<u>83,124</u>	(674,503)

Some expenses reported in the Statement of Activities do not require the use of current financial resources and, therefore, are not reported as expenditures in the governmental funds:

Accrued interest.....	798	
Compensated absences.....	(16,121)	
Self-insurance.....	(4,873)	
Net pension obligation.....	(209,820)	
Other post-employment benefits liability .....	(951,972)	
Pollution remediation liabilities .....	<u>10,556</u>	(1,171,432)
Change in net assets of governmental activities (page 27) .....		<u>\$(2,069,788)</u>

The accompanying notes to the financial statements are an integral part of this financial statement.

STATE OF MARYLAND  
ENTERPRISE FUND FINANCIAL STATEMENTS

## **Major Funds**

---

### **Economic Development Loan Programs**

This fund includes the direct loan programs of the Maryland Departments of Housing and Community Development, Business and Economic Development and Environment.

### **Unemployment Insurance Program**

This fund reflects the transactions, assets, liabilities and net assets of the Unemployment Insurance Program and is used to account for the unemployment assessments collected from employers, Federal revenue received and remittance of benefits to the unemployed.

### **Maryland State Lottery Agency**

This fund accounts for the operation of the State Lottery.

### **Maryland Transportation Authority**

This fund accounts for the activity of the Maryland Transportation Authority, which is responsible for the operation and maintenance of toll roads, bridges and tunnels in the State.

## **Non-major Funds**

---

### **Other Enterprise Funds**

Individual non-major enterprise funds are presented in the combining section following the footnotes.

**STATE OF MARYLAND**  
**COMPONENT UNIT FINANCIAL STATEMENTS**

## **Major Component Units**

---

### **Higher Education**

Higher education consists of the University System of Maryland, Morgan State University, St. Mary's College of Maryland and Baltimore City Community College and certain of their foundations. Because the universities and colleges are similar in nature and function, they have been combined and presented as a single component unit. The financial information for certain foundations affiliated with the universities and colleges has not been included in this fund in accordance with GASB Statement No. 14 as amended by GASB Statement No. 39.

### **Maryland Prepaid College Trust**

The Maryland Prepaid College Trust is a program of the College Savings Plans of Maryland and directed by the Board to provide a means for payment of the cost of tuition and mandatory fees in advance of enrollment at eligible institutions of higher education.

### **Maryland Stadium Authority**

The Maryland Stadium Authority was created as a body corporate and politic and as an independent unit of the Executive Department of the State of Maryland. The Authority's purpose is to acquire land and to construct, operate and/or manage various capital facilities in the State.

## **Non-major Component Units**

---

### **Other Component Units**

Non-major component units are presented individually in the combining section following the footnotes.

**STATE OF MARYLAND**  
**Notes to the Financial Statements**  
**For the Year Ended June 30, 2010**

**1. Summary of Significant Accounting Policies:**

*A. Reporting Entity*

The accompanying financial statements include the various departments, agencies, and other organizational units governed by the General Assembly and/or Constitutional Officers of the State of Maryland (State).

As required by accounting principles generally accepted in the United States of America (GAAP), these financial statements present the state government (primary government) and its component units (entities for which the State is considered to be financially accountable). The Governmental Accounting Standards Board (GASB) has set forth criteria to be considered in determining financial accountability. These criteria include the State appointing a voting majority of an organization's governing body and (1) the ability of the governing body to impose its will on that organization, or (2) the potential for the organization to provide specific financial benefits to, or impose specific financial burdens on, the State.

*Discrete Component Units*

These component units are entities which are legally separate from the State, but are financially accountable to the State, or whose relationships with the State are such that exclusion would cause the State's financial statements to be misleading or incomplete. The Component Units column of the government-wide financial statements includes the financial data of the following major component units. Individual statements are presented for each component unit.

Higher Education (Proprietary Fund Type) – Higher Education consists of the University System of Maryland, Morgan State University, St. Mary's College of Maryland and Baltimore City Community College and certain of their foundations. Each entity is governed by its own Board of Regents, or Board of Trustees, whose members are appointed by the Governor. The universities and colleges are funded through State appropriations, tuition, Federal grants, and private donations and grants. Because the universities and colleges are similar in nature and function, they have been combined and presented as a single discretely presented component unit. Some of the financial information for foundations affiliated with the universities and colleges has not been included with the financial information of the universities and colleges in accordance with the requirements of GASB Statement No. 14 as amended by GASB Statement No. 39.

The Maryland Prepaid College Trust (Proprietary Fund Type) is a program of the College Savings Plans of Maryland and directed by its Board. The Board consists of five State officials and five members of the public appointed by the Governor. The Maryland Prepaid College Trust provides a means for payment of the cost of tuition and mandatory fees in advance of enrollment at eligible institutions of higher education. If the Trust's contract obligations exceed the market value of Trust assets, State appropriations may be provided.

Maryland Stadium Authority (Proprietary Fund Type) - The Maryland Stadium Authority (Authority) was created as a body corporate and politic and as an independent unit of the Executive Department of the State. The Authority's purpose is to acquire land and to construct, operate and/or manage various capital facilities in the State. The Authority's Board consists of seven members, of which, six are appointed by the Governor, with the advice and consent of the State Senate, and one whom is appointed by the Mayor of Baltimore City, with the advice and consent of the State Senate. The Maryland State Legislature and the Board of Public Works (consisting of the Governor, Comptroller and Treasurer) have approved all of the projects and bond issuances of the Authority.

The non-major component units are comprised of the following proprietary fund type entities.

The Maryland Food Center Authority (Authority) is a body corporate and politic, the governing board of which is composed of twelve members. Four members are State officials, and eight members are appointed by the Governor.

The Authority has statewide jurisdiction to promote the State's welfare by undertaking real estate development and management activities that facilitate the wholesale food industry activity in the public interest. It is subject to State regulations and approvals and has received State subsidies.

The Maryland Environmental Service (Service) was created as a body corporate and politic and is governed by a nine-member Board of Directors. The Board of Directors and the officers of the Service are appointed and/or approved by the Governor. The Service helps private industry and local governments manage liquid, solid and hazardous wastes. In accordance with direction from the Governor, the Service plans and establishes major resource recovery facilities, solid waste management plans and hazardous waste management programs.

The Maryland Industrial Development Financing Authority (MIDFA) was established as a body corporate and politic and a public instrumentality of the State. The Authority consists of nine members, the Secretary of the Department of Business and Economic Development, or his designee, the State Treasurer or the State Comptroller, as designated by the Governor; and seven members appointed by the Secretary of the Department of Business and Economic Development and approved by the Governor. The MIDFA is subject to the authority of the Secretary and subject to State finance regulations. It provides financial assistance to enterprises seeking to locate or expand operations in Maryland.

The Maryland Technology Development Corporation (Corporation) was established as a body corporate and politic and a public instrumentality of the State. The Corporation's Board of Directors consists of 15 individuals, the Secretary of the Department of Business and Economic Development and 14 members appointed by the Governor with the advice and consent of the Senate. Its budget is submitted to and approved by the State, and its major revenue source is State appropriations. The Corporation was created to assist in transferring to the private sector and commercializing the results and products of scientific research and development conducted by the colleges and universities and to assist in the commercialization of technology developed in the private sector. The Corporation administers the Maryland Technology Incubator Program and the Maryland Stem Cell Research Fund.

Complete financial statements of the individual component units and the Local Government Investment Pool of the Investment Trust Fund may be requested from the Comptroller of Maryland, LLG Treasury Building, Annapolis, Maryland 21404.

#### *Related Organizations*

The Maryland Economic Development Corporation (MEDCO), Injured Workers' Insurance Fund and the Maryland Automobile Insurance Fund are related organizations of the State. The Governor appoints a majority of the Board of Directors, but the State does not have the ability to impose its will on the organizations, and there is no financial benefit/burden relationship. As of June 30, 2010, the Economic Development Loan Programs, major enterprise funds, had transactions with MEDCO that included loans, investments and grants totaling \$22,155,000. The Maryland Industrial Development Financing Authority (MIDFA) provides insurance as a credit enhancement for transactions of MEDCO. As of June 30, 2010 the insurance outstanding on MEDCO's transactions insured by MIDFA, other component unit, was \$387,000.

#### *B. Government-wide and Fund Financial Statements*

The State's government-wide financial statements (i.e., the statement of net assets and the statement of activities) report information on all nonfiduciary activities of the primary government and its component units. Interfund activity has been eliminated from these statements except for certain charges for services between activities that would distort the direct costs and program revenues reported for the applicable functions. Governmental activities, which normally are supported by taxes and intergovernmental revenues, are reported separately from business-type activities, which rely to a significant extent on fees and charges for support. Likewise, the primary government is reported separately from certain legally separate component units for which the primary government is financially accountable.

The statement of activities demonstrates the degree to which the direct expenses of a given function or segment is offset by program revenues. Direct expenses are those that are clearly identifiable with a specific function or segment. Expenses reported for functional activities include allocated indirect expenses. Program revenues include 1) charges to customers or applicants

who purchase, use, or directly benefit from goods, services or privileges provided by a given function or segment and 2) grants and contributions that are restricted to meeting the operational or capital requirements of a particular function or segment. Taxes and other items not properly included among program revenues are reported instead as general revenues.

Separate financial statements are provided for governmental funds, proprietary funds, and fiduciary funds, even though the latter are excluded from the government-wide financial statements as those assets are not available to support government programs. Major individual governmental funds and major individual enterprise funds are reported as separate columns in the fund financial statements.

### *C. Measurement Focus, Basis of Accounting, and Financial Statement Presentation*

The government-wide financial statements are reported using the economic resources measurement focus and the accrual basis of accounting, as are the proprietary fund and fiduciary fund (other than the agency funds), financial statements. The agency funds are reported using the accrual basis of accounting, but have no measurement focus. Revenues are recorded when earned and expenses are recorded when a liability is incurred, regardless of the timing of related cash flows. Property taxes are recognized as revenues in the year for which they are levied. Grants and similar items are recognized as revenue as soon as all eligibility requirements imposed by the provider have been met.

Governmental fund financial statements are reported using the current financial resources measurement focus and the modified accrual basis of accounting. Revenues are recognized as soon as they are both measurable and available. Revenues are considered to be available when they are collectible within the current period or soon enough thereafter to pay liabilities of the current period. For this purpose, the State considers all revenues to be available if they are collected within 60 days of the end of the current fiscal period. Expenditures generally are recorded when a liability is incurred, as under accrual accounting. However, debt service expenditures, as well as expenditures related to retirement costs, other post-employment benefits, compensated absences, pollution remediation and claims and judgments, are recorded only when payment is due.

Property taxes, franchise taxes, licenses and interest associated with the current fiscal period are all considered to be susceptible to accrual and so have been recognized as revenues of the current fiscal period. All other revenue items are considered to be measurable and available only when cash is received by the government.

The State reports the following major governmental funds:

#### *General Fund:*

Transactions related to resources obtained and used for those services traditionally provided by a state government, which are not accounted for in other governmental funds, are accounted for in the general fund. These services include, among other items, general government, health and mental hygiene, education (other than higher education institutions), human resources, public safety, judicial, labor, licensing and regulation, natural resources and recreation, housing and community development, environment, agriculture, and business and economic development. Resources obtained from Federal grants and used for general fund activities consistent with applicable legal requirements, are recorded in the general fund.

#### *Special Revenue Fund, Maryland Department of Transportation:*

Transactions related to resources obtained, the uses of which are committed for specific purposes, are accounted for in the special revenue fund. The Maryland Department of Transportation special revenue fund accounts for resources used for operations (other than debt service and pension activities) of the Maryland Department of Transportation, including construction or improvement of transportation facilities and mass transit operations.

#### *Enterprise Funds:*

Transactions related to commercial types of activities operated by the State are accounted for in the enterprise funds. The enterprise funds differ from governmental funds in that the focus is on the flow of economic resources, which, together with the maintenance of equity, is an important financial indicator.

The major enterprise funds are as follows.

1. The Economic Development Loan Programs includes the direct loan programs of the Maryland Departments of Housing and Community Development, Business and Economic Development and Environment.
2. The Unemployment Insurance Program reflects the transactions, assets, liabilities and net assets of the Unemployment Insurance Program and is used to account for the unemployment taxes collected from employers, Federal revenue received and remittance of benefits to the unemployed.
3. The Maryland State Lottery Agency operates the State Lottery.
4. The Maryland Transportation Authority is responsible for the operation and maintenance of toll roads, bridges and tunnels in the State.

*Fiduciary Funds:*

1. The Pension and Other Employee Benefits Trust Fund (Pension Trust Fund) includes the Maryland State Retirement and Pension System, the Maryland Transit Administration Pension Plan, and the Deferred Compensation Plan. The Pension Trust Fund reflects the transactions, assets, liabilities and net assets of the plans administered by the State and is accounted for using the flow of economic resources measurement focus. The Deferred Compensation Plan, which is reported as of and for its period ended December 31, accounts for participant earnings deferred in accordance with Internal Revenue Code Sections 457, 403(b), 401(a), and 401(k). Amounts deferred are invested and are not subject to Federal income taxes until paid to participants upon termination or retirement from employment, death or for an unforeseeable emergency.
2. The Investment Trust Fund reflects the transactions, assets, liabilities and net assets of the Maryland Local Government Investment Pool and is accounted for using the flow of economic resources measurement focus.
3. The Postretirement Health Benefits Trust Fund (OPEB Trust) accumulates funds to assist the State's Employee and Retiree Health and Welfare Benefits Program finance the State's postretirement health insurance subsidy. The OPEB Trust is administered by the Board of Trustees for the Maryland State Retirement and Pension System, and its transactions, assets, liabilities and net assets are accounted for using the flow of economic resources measurement focus. The assets of the Pension and OPEB Trusts are not pooled for investment purposes, and each trust's assets may be used only for the payment of benefits to the trust's members in accordance with the terms of the trust.
4. The agency funds are custodial in nature and do not present the results of operations or have a measurement focus. The State uses agency funds to account for the receipt and disbursement of litigants, patient and prisoner accounts, various taxes collected by the State for distribution to political subdivisions and amounts withheld from employees' payroll.

*D. Change in Accounting Principles and Restatement of Beginning Balances*

As of June 30, 2009, the State reported derivative instruments in accordance with GASB Statement No. 53, *Accounting and Financial Reporting for Derivative Instruments*. This statement requires governments to measure derivative instruments at fair value in their economic resources measurement focus financial statements. The changes in fair value of hedging derivative instruments do not affect investment revenue but are reported as deferrals, whereas the changes in fair value of investment derivative instruments are reported as investment revenue in the current reporting period. Accordingly, the beginning net assets for the Economic Development Loan Programs, an enterprise fund, and the Maryland Stadium Authority, a component unit, are restated as follows (amounts expressed in thousands).

	Economic Development Loan Programs	Maryland Stadium Authority
Beginning net assets, as previously reported	\$2,217,077	\$193,411
Recognition of changes in fair value of derivatives as deferrals	(15,306)	(27,531)
Beginning net assets, as restated	<u>\$2,201,771</u>	<u>\$165,880</u>

*E. New Pronouncements:*

The GASB issued Statement No. 54, *Fund Balance Reporting and Governmental Fund Type Definitions*, in March 2009, effective for financial statements for periods beginning after June 15, 2010. The State has early implemented this statement. In addition, the GASB issued Statement No. 59, *Financial Instruments Omnibus*, in June 2010, effective for financial statements for periods beginning after June 15, 2010, and Statement No. 57, *OPEB Measurements by Agent Employers and Agent Multiple-Employer Plans*, in December 2009, effective for financial statements for periods beginning after June 15, 2011. The State will implement these statements as of their effective dates. While the State is still in the process of determining the effect of implementing these GASB statements, they are not expected to have a material effect on the financial position of the State.

## 2. Significant Accounting Policies - Assets, Liabilities and Net Assets or Equity:

*A. All Funds:*

*Deposits with Financial Institutions and Investments:*

The State Treasurer's Office operates a centralized cash receipt, investment and disbursement function for the majority of the State's funds as required by statute. Certain enterprise activities, pension funds, agency funds and component units are specifically exempted from this function in the law. Individual fund equity in pooled invested cash is reported as an asset on the balance sheets of those funds participating in the centralized cash receipt and disbursement function. Investment earnings accrue to those funds reporting equity in pooled invested cash only if the law specifically provides for the fund's accrual of interest earnings.

The State Treasurer's Office invests short-term cash balances on a daily basis primarily in U.S. Government obligations and money market mutual funds. Under the State Finance and Procurement Article of the Annotated Code of Maryland, Title 6, Subtitle 2, the State Treasurer may only invest in the following:

- Any obligation for which the United States Government has pledged its faith and credit for the payment of principal and interest.
- Any obligation that a United States agency issues in accordance with an act of Congress.
- Repurchase agreements that any of the above obligations secure.
- Certificates of deposits of Maryland financial institutions.
- Banker's acceptances.
- Money market mutual funds.
- Commercial paper.
- Maryland Local Government Investment Pool.
- Securities Lending Collateral.

In addition, bond sale proceeds may be invested in Municipal securities. Collateral must be at least 102% of the book value of the repurchase agreements and must be delivered to the State Treasurer's custodian for safekeeping. Investments are recorded at fair value and changes in fair value are recognized as revenue. Fair values are based on quotations from national security exchanges and security pricing services, or by the respective fund managers for securities which are not actively traded. Money market mutual funds and the Maryland Local Government Investment Pool are operated in accordance with Rule 2a-7 of the Investment Company Act of 1940, as amended. Their fair values are based on a share price of \$1.00 per share. Investments maturing within 90 days of purchase are reported in the financial statements as cash and cash equivalents.

The Maryland State Retirement and Pension System (System), in accordance with State Personnel and Pensions Article Section 21-123 of the Annotated Code of Maryland, is permitted to make investments subject to the terms, conditions, limitations and restrictions imposed by the Board of Trustees of the System. The law further provides that no more than 25% of the assets that are invested in common stocks may be invested in nondividend paying common stocks. In addition, no investment in any one organization may constitute more than 5% of the total assets of the System. The System is authorized by Section 21-116 of the State Personnel and Pensions Article to establish and maintain the investment policy manual, which authorizes investing in all major sectors of the capital market in order to diversify and minimize total investment program risk. Such sectors include, but are not limited to, common stock, preferred stock, convertible securities, warrants and similar rights of U.S. and non-U.S. companies; private equity - direct/partnership/funds; real estate investment trusts; commingled real estate funds; directly owned real estate; fixed income obligations of the U.S. government and its states and local subdivisions, non-U.S. governments and their states and local subdivisions, U.S. and non-U.S. companies, and supra-national organizations; futures and options; foreign exchange forward and future contracts and options; equity index futures; and equity options.

Investments of the System, the Postretirement Health Benefits Trust Fund (OPEB Trust) and the Maryland Transit Administration (MTA) Pension Plan are stated at fair value. The investments of the OPEB Trust and the MTA Pension Plan are held and invested on their behalf by the System and are limited to those allowed for the System. For fixed income securities, fair value is based on quoted market prices provided by independent pricing services. Securities traded on a national or international exchange are valued at the last reported sales price at current exchange rates. Mortgages and mortgage related securities are valued on the basis of future principal and interest payments and are discounted at prevailing interest rates for similar instruments. Fair value for real estate investments is based on estimated current values and independent appraisals. Fair value for private equity investments and mutual funds (other than those funds traded on a national or international exchange) is based on information provided by the applicable fund managers.

State employees are offered participation in deferred compensation plans created in accordance with the Internal Revenue Code, Sections 401(a), 401(k), 403(b) and 457. The Board of Trustees of the Maryland Teachers and State Employees Supplemental Retirement Plans is responsible for the implementation, maintenance and administration of the Plans. The Board has appointed a private company as the Plans' administrator. Assets of the Plans are held in trusts for the exclusive benefit of participating employees and their beneficiaries. Investments of the Plans are valued at cost plus interest credited which approximates fair value for fixed earnings investment contract pools and at fair value based on published quotations at each December 31, or net asset value as provided by the investment custodian, for variable earnings investments.

#### *Retirement Costs:*

Substantially all State employees participate in one of several State retirement systems. (See footnote 15.) The State also provides retirement benefits to teachers and certain other employees of its political subdivisions. Retirement costs have been provided on the accrual basis, based upon actuarial valuations, except that retirement expenditures for governmental funds represent amounts contributed by the State for the fiscal year.

#### *Other Post-Employment Benefit Costs:*

Substantially all State retirees may participate in the various health care plans offered by the State. (See footnote 16.) Post-employment health care costs have been provided on the accrual basis, based upon actuarial valuations, except that other post-employment expenditures for governmental funds represent amounts contributed by the State for the fiscal year.

### *Accrued Self-Insurance Costs:*

The accrued self-insurance costs represent the State's liability for its various self-insurance programs. The State is self-insured for general liability, property and casualty, workers' compensation, environmental and anti-trust liabilities and certain employee health benefits. The State records self-insurance expenses in the proprietary funds and discretely presented component units on an accrual basis and the modified accrual basis for the governmental funds. The long-term accrued self-insurance costs of the governmental funds, which are not expected to be funded with current resources, are reported in the government-wide financial statements.

### *Annual Leave Costs:*

Principally all full-time employees accrue annual leave based on the number of years employed up to a maximum of 25 days per calendar year. Earned annual leave may be accumulated up to a maximum of 75 days as of the end of each calendar year. Accumulated earned but unused annual leave for general government employees is accounted for in the government-wide financial statements. Liabilities for accumulated earned but unused annual leave applicable to proprietary funds and component units are reported in the respective funds.

### *Capital Assets:*

Capital assets, which include property, plant, art and historical treasures, equipment, and infrastructure assets (e.g., roads, bridges, sidewalks, and similar items), are reported in the applicable governmental or business-type activities columns in the government-wide financial statements. Infrastructure acquired prior to June 30, 1980, is not reported. Capital assets are defined by the government as assets with an initial, individual cost of more than \$50,000 and an estimated useful life in excess of two years. Such assets are recorded at historical cost or estimated historical cost if purchased or constructed. Donated capital assets are recorded at estimated fair market value at the date of donation. The costs of normal maintenance and repairs that do not add to the value of the asset or materially extend asset lives are not capitalized. Major outlays for capital assets and improvements are capitalized as projects are constructed.

Capital assets of the primary government, as well as the component units, are depreciated using the straight line method over the following estimated useful lives:

Assets	Years
Buildings	5-50
Building improvements	5-50
Vehicles	3-25
Office equipment	3-10
Computer equipment	3-10
Computer software	5-10
Infrastructure	10-50

### *Long-term Obligations:*

In the government-wide financial statements, and for proprietary fund types in the fund financial statements, long-term debt and other long-term obligations are reported as liabilities in the applicable governmental activities, business-type activities, or proprietary fund type statement of net assets. Bond premiums and discounts, as well as issuance costs, are deferred and amortized over the life of the bonds. Bonds payable are reported net of the applicable bond premium or discount. Bond issuance costs are reported as deferred charges and amortized over the term of the related debt.

In the fund financial statements, governmental fund types recognize bond premiums and discounts, as well as bond issuance costs, during the current period. The face amount of debt issued is reported as other financing sources. Premiums received on debt issuances

are reported as other financing sources while discounts on debt issuances are reported as other financing uses. Issuance costs, whether or not withheld from the actual debt proceeds received, are reported as debt service expenditures.

*Restricted Resources:*

When both restricted and unrestricted resources are available for use, it is the State's policy to use restricted resources first, and then unrestricted resources as they are needed.

*Debt Refinancing:*

The gain or loss associated with debt refinanced is deferred and amortized to interest expense over the remaining life of the old debt or the life of the new debt whichever is shorter.

*Net Assets:*

Net assets are divided into three categories. Net assets invested in capital assets net of related debt is the capital assets less accumulated depreciation and outstanding principal of the related debt. Restricted net assets reflect restrictions on assets imposed by parties outside the State or imposed by the State by constitutional provisions or enabling legislation. Unrestricted net assets are total net assets of the State less net assets invested in capital assets net of related debt and restricted net assets. Unrestricted net assets are comprised mainly of cash, investments, loans and receivables.

*B. Governmental Funds:*

*Inventories and Prepaid Items:*

All inventories are valued at cost using the first-in/first-out (FIFO) method. Inventories of governmental funds are recorded as expenditures when consumed rather than when purchased.

Certain payments to vendors reflect costs applicable to future accounting periods and are recorded as prepaid items in the fund financial statements under the consumption method.

*Grants:*

Revenues from Federal reimbursement type grants are recognized when the related expenditures are incurred and the revenues are both measurable and available. The government considers all grant revenues to be available if they are collected within 60 days of the current fiscal period. Distributions of food stamp benefits are recognized as revenues and expenditures when the benefits are distributed to individual recipients.

*Income Taxes:*

The State accrues the net income tax receivable or records a deferred revenue based on estimated income tax revenues and refunds due relating to the fiscal year, that will not be collected or paid until after the fiscal year end. This accrual is computed based on projected calendar year net tax collections, tax laws in effect, future projections and historical experience.

*Sales and Use Taxes:*

The State accrues June sales taxes that are not remitted at year end as a receivable. These taxes are considered measurable and available since they represent June collections that are remitted to the State in July by merchants who collect the related sales tax.

#### *Property Taxes:*

The State levies an annual tax for the fiscal year beginning July 1 and ending June 30 on all real property subject to taxation, due and payable each July 1 and December 1 (lien dates), based on assessed values as of the previous January 1, established by the State Department of Assessments and Taxation at 100% of estimated market value. Each of the counties, Baltimore City and incorporated municipalities establish rates and levy their own tax on such assessed values. The State tax rate in fiscal year 2010 was 11.2 ¢ per \$100 of assessed value. Unpaid property taxes are considered in arrears on October 1 and January 1, respectively, and penalty and interest of 1% is assessed for each month or fraction of a month that the taxes remain unpaid. Property taxes are accrued to the extent they are collected within 60 days of year end.

#### *Escheat Property:*

Escheat property is property that reverts to the State's general fund in the absence of legal claimants or heirs. The escheat activity is reported in the general fund. An asset is recognized in the period when the legal claim to the assets arises or when the resources are received, whichever occurs first, and a liability is recognized for the estimated amount that ultimately will be reclaimed and paid.

#### *Intergovernmental Expenditures:*

General, special revenue and capital projects fund revenues paid to political subdivisions, and bond proceeds granted to political subdivisions, are recorded as intergovernmental expenditures if such payments do not require mandatory use for specific functions. Direct grants and other payments to, or on behalf of, political subdivisions are recorded as current expenditures.

#### *Capital Assets:*

Expenditures for capital assets are reported as capital outlays in the governmental funds.

#### *Compensated Absences:*

It is the State's policy to permit employees to accumulate earned but unused vacation and sick pay benefits. There is no liability for unpaid accumulated sick leave since the State does not have a policy to pay any amounts when employees separate from service with the government. A liability for vacation pay amounts is reported in governmental funds only if they have matured, for example, as a result of employee resignations and retirements.

#### *Fund Equity:*

Fund balance for governmental funds is reported in categories and classifications that are presented in order of constraints on the specific purposes for which amounts in that fund can be spent. Nonspendable fund balance represents amounts that cannot be spent because they are either (a) not in spendable form or (b) legally or contractually required to be maintained intact. Spendable fund balance is classified as restricted, committed, assigned, or unassigned. Amounts are reported as restricted when spending constraints are (a) externally imposed or (b) imposed by the government by constitutional provisions or enabling legislation. Committed fund balance includes amounts committed for specific purposes by formal action of the government's highest level of decision-making authority. In Maryland, the uses of these funds are established in statute after appropriate action by the General Assembly and the Governor. Assigned fund balance is intended spending expressed by (a) the governing body or (b) a body or official to which the governing body has delegated the authority to assign amounts. The Governor is authorized to assign current year funds for appropriation in the subsequent year's budget pursuant to budgetary policies adopted by the General Assembly. Unassigned fund balance is the residual classification for the general fund.

When an expenditure is incurred for purposes for which committed, assigned, or unassigned fund balance is available, the State considers committed, assigned, and unassigned amounts to have been spent in that order.

### *C. Enterprise Funds, Fiduciary Funds and Component Units:*

#### *Basis of Accounting:*

The accounts of the enterprise funds, fiduciary funds and component units are maintained and reported using the accrual basis of accounting. Under this method, revenues are recorded when earned and expenses are recorded at the time liabilities are incurred. For both the government-wide business-type activities and the enterprise fund financial statements, the State has selected the option to apply all applicable GASB pronouncements and only FASB Statements and Interpretations, Accounting Principles Board (APB) Opinions and Accounting Research Bulletins (ARB) issued on or before November 30, 1989.

Enterprise funds and component units distinguish operating revenues and expenses from non-operating items. Operating revenues and expenses generally result from providing services and producing and delivering goods in connection with a proprietary fund's principal ongoing operations. Operating expenses include the cost of sales and services, administrative expenses, and depreciation on capital assets. All revenues and expenses not meeting this definition are reported as non-operating revenues and expenses.

#### *Cash and Cash Equivalents:*

The enterprise funds consider all highly liquid investments that mature within 90 days of purchase to be cash and cash equivalents for reporting on the statement of cash flows.

#### *Grants:*

Revenues from Federal reimbursement type grants are recorded when the related expenses are incurred.

#### *Capital Assets:*

Capital assets are stated at cost. Depreciation of the cost of capital assets is provided on the straight-line basis over estimated useful lives of 5 to 50 years for depreciable real property and building improvements, and 3 to 10 years for equipment. Construction period interest is capitalized. Repairs and maintenance are charged to operations in the period incurred. Replacements, additions and betterments are capitalized.

#### *Lottery Revenues, Prizes and Related Transfers:*

Revenues and prizes of the Maryland State Lottery Agency (Lottery) are primarily recognized when drawings are held. Certain prizes are payable in deferred installments. Such liabilities are recorded at the present value of amounts payable in the future. State law requires the Lottery to transfer to the State revenues in excess of amounts allocated to prize awards, operating expenses and capital expenditures. The excess revenues from certain select games are transferred to the State's general fund, which then transfers the amounts to the Maryland Stadium Authority for operations and to cover the State's capital lease payments to the Maryland Stadium Authority.

#### *Provisions for Insurance and Loan Losses:*

Current provisions are made for estimated losses resulting from insuring loans and uncollectible loans. Loss provisions are based on the current status of insured and direct loans, including delinquencies, economic conditions, loss experience, estimated value of collateral and other factors which may affect their realization.

#### *Inventories:*

Inventories are stated at the lower of cost or market, using the first-in, first-out method.

### 3. Deposits with Financial Institutions and the U.S. Treasury, Equity in Pooled Invested Cash and Investments:

Cash and cash equivalents, equity in pooled invested cash and investments as shown on the basic financial statements as of June 30, 2010, reconcile to cash deposit and investment disclosures as follows (amounts expressed in thousands).

Government-wide statement of net assets:	
Cash and cash equivalents .....	\$ 422,056
Equity in pooled invested cash .....	3,690,482
Investments.....	2,235,025
Collateral for lent securities .....	247,824
Restricted cash and cash equivalents .....	1,532,101
Restricted equity in pooled invested cash .....	105,315
Restricted investments .....	1,309,523
Statement of fiduciary net assets:	
Cash and cash equivalents .....	1,777,582
Equity in pooled invested cash .....	465,762
Investments.....	35,523,302
Collateral for lent securities .....	4,630,233
Total cash and cash equivalents and investments per basic financial statements .....	51,939,205
Less: Cash and cash equivalents and investments of higher education foundations not subject to disclosure .....	864,234
Total cash and cash equivalents and investments per Note 3 .....	\$51,074,971
Note 3 of the financial statements:	
Cash deposits:	
Governmental funds .....	\$ 247,275
Enterprise funds.....	519,794
Fiduciary funds.....	266,610
Component units.....	90,625
Investments:	
Governmental funds .....	4,793,812
Enterprise funds.....	2,590,180
Fiduciary funds.....	41,664,505
Component units.....	902,170
Total cash deposits and investments .....	\$51,074,971

Cash and cash equivalents for financial statement presentation include short-term investments maturing within 90 days of purchase. Investments for financial statement presentation include certificates of deposit maturing 90 days or more from date of purchase.

#### A. Cash Deposits:

As of June 30, 2010, the carrying value for the bank deposits of the governmental funds, enterprise funds, fiduciary funds and component units were \$247,275,000, \$519,794,000, \$266,610,000 and \$90,625,000, respectively. The bank balances were \$247,275,000, \$530,956,000, \$266,610,000, and \$94,471,000, respectively.

*Custodial Credit Risk.* Custodial credit risk is the risk that, in the event of a bank failure, the government's deposits may not be returned. Deposits are exposed to custodial credit risk if they are not covered by depository insurance and the deposits are (a) uncollateralized, (b) collateralized with securities held by the pledging financial institution, or (c) collateralized with securities held by the pledging financial institution's trust department or agent but not in the government's name. State law permits the Treasurer to deposit in a financial institution in the State, unexpended or surplus money in which the Treasurer has custody if (a) the deposit is

interest bearing; (b) the financial institution provides collateral that has a market value that exceeds the amount by which a deposit exceeds the deposit insurance; and (c) a custodian holds the collateral.

The Economic Development Loan Programs, Higher Education component unit, and Maryland Stadium Authority do not have a deposit policy for custodial credit risk. As of June 30, 2010, \$37,000, \$21,271,000, and \$73,000, respectively, of their bank balances were exposed to custodial credit risk as uninsured and uncollateralized. The Maryland Prepaid College Trust does not have a policy for custodial credit risk. As of June 30, 2010, \$12,863,000, of its bank balances were exposed to custodial credit risk as uninsured and collateralized with securities held by the pledging financial institution's trust department or agent but not in the Trust's name.

#### B. Investments:

The State discloses investment risks as follows:

*Interest Rate Risk.* Interest rate risk is the risk that changes in interest rates will adversely affect the fair value of an investment.

*Credit Risk.* Credit risk is the risk that an issuer or other counterparty to an investment will not fulfill its obligations.

*Concentration of Credit Risk.* Concentration of credit risk is the risk of loss attributed to the magnitude of a government's investment in a single issuer.

*Custodial Credit Risk.* Custodial credit risk is the risk that, in the event of the failure of the counterparty, the government will not be able to recover the value of its investments or collateral securities that are in the possession of an outside party. Investment securities are exposed to custodial credit risk if the securities are uninsured, are not registered in the name of the government and are held by either (a) the counterparty or (b) the counterparty's trust department or agent but not in the government's name.

*Foreign Currency Risk.* Foreign currency risk is the risk that changes in exchange rates will adversely affect the fair value of an investment.

#### 1. Investments-Governmental Funds:

The State Treasurer's Office is authorized to make investments as stated in footnote 2.A.

Investments are stated at fair value that is based on quoted market prices. The investments and maturities as of June 30, 2010, for the governmental funds of the primary government are as follows (amounts expressed in thousands).

Investment Type	Fair Value	Investment Maturities (in Years)		
		Less than 1	1 - 3	More than 3
U.S. agencies (a) .....	\$ 2,814,275			\$2,814,275 (b)
Repurchase agreements .....	1,510,903	\$1,498,082		12,821
Local Government Investment Pool .....	<u>220,810</u>	<u>220,810</u>		
Total investments.....	4,545,988	1,718,892		2,827,096
Collateral for lent securities .....	<u>247,824</u>	<u>247,824</u>		
Total investments and collateral for lent securities .....	\$4,793,812	\$1,966,716	\$ -	\$2,827,096

(a) Investments held by broker dealers under securities lending program are \$177,917,000.

(b) Bonds in the amount of \$2,145,820,000, mature February 2014 to June 2015, but are callable July 2010 to June 2012.

*Interest Rate Risk.* The State Treasurer's Office's investment policy states that to the extent possible, it will attempt to match its investments with anticipated cash flow requirements. Unless matched to a specific cash flow, the Treasurer's Office will not directly invest in securities maturing more than five years from the date of purchase. Sinking fund investments with guaranteed earnings to redeem term bonds beginning in fiscal year 2016 were \$12,821,000.

*Credit Risk.* State law requires that the governmental funds' repurchase agreements be collateralized by U.S. Treasury and agency obligations. In addition, investments are made directly in U.S. agency obligations. Obligations of the Federal National Mortgage Association, Federal Farm Credit Bank, and Federal Home Loan Mortgage Corporation are rated Aaa by Moody's and AAA by Standard & Poor's and Fitch. Obligations of the Federal Home Loan Bank are rated Aaa by Moody's and AAA by Standard & Poor's. Obligations of the Federal Agricultural Mortgage Corporation are not rated. The Local Government Investment Pool is rated AAAM by Standard & Poor's.

*Concentration of Credit Risk.* The State Treasurer's Office's investment policy limits the amount of repurchase agreements to be invested with a particular institution to 30% of the portfolio. There is no other limit on the amount that may be invested in any one issuer. More than 5 percent of the governmental funds' investments are in the Federal National Mortgage Association, the Federal Home Loan Mortgage Corporation, the Federal Agricultural Mortgage Corporation, and the Federal Home Loan Bank. These investments are 56.0%, 17.0%, 12.8%, and 8.6% of the governmental funds' total investments, respectively.

## 2. Investments - Enterprise Funds:

The enterprise funds' bond indentures and investment policies, with the exception of the Economic Development Loan Programs, authorize the investment of assets related to the indentures and other funds in obligations in which the State Treasurer may invest. The Economic Development Loan Programs are authorized to invest in obligations of the U.S. Treasury, U.S. government agencies, obligations of U.S. political subdivisions, bankers' acceptances, commercial paper, repurchase agreements, guaranteed investment contracts, corporate debt securities and mutual funds.

Investments of the enterprise funds are stated at fair value, which is based on quoted market prices.

The investments and maturities as of June 30, 2010, for the enterprise funds of the primary government are as follows (amounts expressed in thousands).

Investment Type	Fair Value	Investment Maturities (in Years)				
		Less than 1	1 - 5	6-10	11-15	More than 15
U.S. Treasury obligations .....	\$ 470,792	\$ 15,416	\$ 547	\$6,077	\$4,284	\$444,468
U.S. Government agency obligations .....	894,275	488,040	397,484	2,484		6,267
Repurchase agreements .....	35,547	17,397				18,150
Guaranteed investment contracts.....	20,677			20,677		
Money market mutual funds .....	<u>1,002,456</u>	<u>1,002,456</u>				
Total.....	\$2,423,747	\$1,523,309	\$398,031	\$29,238	\$4,284	\$468,885

In addition to the investments scheduled above, as of June 30, 2010, the enterprise funds' investments also include the fair value of direct equity investments, \$52,752,000.

The State Lottery Agency, a major enterprise fund, invests in U.S. Treasury obligations and annuity contracts that provide for guaranteed payouts to jackpot prize winners and, therefore, have no interest rate risk to the Lottery. At June 30, 2010, the fair value of these investments was \$113,334,000 and \$347,000, respectively. Of these investments, U.S. Treasury obligations held by broker dealers under the securities lending program were \$64,771,000.

*Interest Rate Risk.* The enterprise funds' policy for managing their exposure to fair value loss arising from increasing interest rates is to manage investment maturities so that they precede or coincide with the expected need for funds.

*Credit Risk.* The investment policies of the enterprise funds require that repurchase agreements are collateralized by U.S. Treasury and agency obligations. The policies also require that money market mutual funds contain only U.S. Treasuries or agencies or repurchase agreements secured by these or that they receive the highest possible rating from at least one nationally recognized securities rating organization and that commercial paper be rated A-1, P-1. According to the indenture and investment policy of the Economic Development Loan Programs, investments must be rated no lower than the rating on the Loan Programs' bonds or F1/P1 for the issuer's short-term accounts or securities. The rating on the Loan Programs' bonds as of June 30, 2010, was Aa by Moody's and AA by Fitch.

As of June 30, 2010, the enterprise funds had the following investments and quality ratings (amounts expressed in thousands).

Investment Type	Fair Value	Quality Rating	Rating Organization	Percentage of Total Investments
U.S. Government agency obligations.....	\$ 894,275	AAA/Aaa	S&P/Moody's	34.53%
Money market mutual funds .....	1,002,456	AAAm/Aaa	S&P/Moody's	38.70
Repurchase agreements-underlying securities .....	35,547	AAA/Aaa	S&P/Moody's	1.37
Total.....	\$1,932,278			74.60%

*Concentration of Credit Risk.* The enterprise funds place no limit on the amount they may invest in any one issuer of U.S. Government agency obligations. More than 5% of the enterprise funds' investments are in obligations of the Federal Home Loan Bank and Federal Home Loan Mortgage Corporation. These investments are 13.8% and 9.8% of the enterprise funds' total investments.

### 3. Investments - Fiduciary Funds:

The Pension and OPEB Trust Funds are authorized to make investments as stated in footnote 2.A.

The Maryland Local Government Investment Pool is authorized by Article 95, Section 22G, of the Annotated Code of Maryland to invest in any instrument in which the State Treasurer may invest. Investments of the Pool are stated at fair value. Securities are valued daily on an amortized cost basis which approximates market value. Money market funds are valued at the closing net asset value per share on the day of valuation.

The investments and maturities as of June 30, 2010, for the fiduciary funds of the primary government are as follows (amounts expressed in thousands).

Investment Type	Fair Value	Investment Maturities (in Years)			
		Less than 1	1-5	6-10	More than 10
U.S. Treasury notes and bonds .....	\$ 3,195,166	\$ 484,956	\$ 1,091,696	\$ 856,867	\$ 761,647
U.S. Treasury strips.....	16,426			2,444	13,982
U.S. Government agency obligations.....	1,758,141	1,529,916	141,117	74,960	12,148

(a) These investments are stated at contract value at December 31, 2009. The fair value as of December 31, 2009, was \$736,258,000, and the wrapper value was \$2,302,000.

In addition to the investments scheduled above, as of June 30, 2010, the fiduciary funds' investments also include the fair value of stock mutual funds, \$2,546,470,000, corporate equity securities, \$15,430,583,000, private equity, \$1,585,865,000, real estate, \$1,229,987,000, annuity contracts, \$112,712,000, insurance contracts, \$3,952,000, and other investments, \$1,609,149,000.

*Interest Rate Risk.* At June 30, 2010, the System had \$1.2 billion invested in mortgage pass-through securities. These investments are moderately sensitive to changes in interest rates because they are backed by mortgage loans in which the borrowers have the option of prepaying.

The Deferred Compensation Plans (Plans) invest in annuity contracts and insurance contracts that provide for guaranteed payouts to participants and, therefore, have no interest rate risk to the Plans. As of June 30, 2010, the fair value of these investments was \$112,712,000 and \$3,952,000, respectively.

The State Treasurer's Office manages the Local Government Investment Pool. The State Treasurer's investment policies state that no direct investment by the Pool may have a maturity date of more than 13 months after its acquisition.

*Credit Risk.* The investment policy of the System regarding credit risk is determined by each investment manager's mandate. The Local Government Investment Pool may invest in banker's acceptances and commercial paper rated only Tier 1 by at least one nationally recognized securities rating organization. As of June 30, 2010, the fiduciary funds' investments were rated by Standard and Poor's and/or an equivalent national rating organization and the ratings are presented below using the Standard and Poor's rating scale (amounts expressed in thousands).

*Foreign Currency Risk.* The majority of the System's foreign currency-denominated investments are in equities, which the System's asset allocation policy limits to 15%. The System has an overlay program to minimize its currency risk.

The System's exposure to foreign currency risk as of June 30, 2010, is as follows (amounts expressed in thousands).

Currency	Equity	Fixed Income	Cash	Alternative Investments	Mutual Funds	Total
Australian dollar .....	\$405,826	\$ 58,032	\$ 3,076			\$ 466,934

#### Derivatives:

Each System investment manager's guidelines determine the extent to which derivatives are permissible. Futures and other derivatives are permitted to the extent that they are used in a manner that does not materially increase total portfolio volatility or relate to speculative activities. Unleveraged derivatives are permitted for the purpose of hedging investment risk, to replicate an investment that would otherwise be made directly in the cash market or to modify asset exposure in tactical portfolio shifts. Use of derivatives is not permitted to materially alter the characteristics, including the investment risk, of each manager's account. The investment managers are to have in place, and use, procedures that subject derivative based strategies to rigorous scenario and volatility analysis. Futures and short option positions must be hedged with cash, cash equivalents or current portfolio security holdings.

A list of derivatives aggregated by investment type is as follows (amounts expressed in thousands).

		<u>Changes in Fair Value</u>		<u>Fair Value at June 30, 2010</u>	
	Classification	Amount(1)	Classification	Amount (2)	Notional*
Commodity futures long	Investment revenue	\$ (8,159)	Futures	\$ (12,041)	\$ 66,678

Warrants	Investment revenue	139	Common stock	4,020	1,435
Totals		\$195,802		\$ 67,074	

\*Notional may be a dollar amount or size of underlying for futures and options, negative values refer to short positions.

*Credit Risk.* The System is exposed to credit risk on derivative instruments that are in asset positions. To minimize its exposure to losses related to credit risk, the investment managers use counterparty collateral in their non-exchange-traded derivative instruments. Netting arrangements are also used when entering into more than one derivative instrument transaction with a counterparty. At the present time the System does not have a formal policy relating to counterparty collateral or netting arrangements.

The aggregate fair value of derivative instruments in asset positions as of June 30, 2010 was \$683,501,000. This represents the maximum loss that would be recognized at the reporting date if all counterparties failed to perform. The maximum loss would, however, be reduced by the counterparty collateral and the liabilities included in netting arrangements with counterparties.

The following tables list the fair value of credit exposure per ratings of Standard & Poor's (S&P), Moody's and Fitch for the counterparties (amounts expressed in thousands).

<u>Fair Value</u>	<u>S&amp;P Rating</u>	<u>Fair Value</u>	<u>Moody's Rating</u>	<u>Fair Value</u>	<u>Fitch Rating</u>
\$411,103	AA	\$ 31,445	Aaa	\$515,481	AA

Deutsche Bank AG London	1%	A	AA	Aa

#### 4. Investments - Component Units:

Investment accounts established by higher education institutions relate principally to endowments and trust accounts required by debt instruments and are invested in accordance with the investment policies adopted by the Board of Trustees. In general, endowment resources can be invested in debt and equity securities, and trust accounts can be invested only in debt securities. These investments include U.S. Treasury and agency obligations, corporate debt and equity securities, asset-backed securities and mutual funds that invest in government securities. The investments of the higher education foundations are not included in the GASB Statement No. 40 disclosures below because the foundations are not required to and do not follow the statements of GASB.

In July 2005, one of the institutions, the University System of Maryland, transferred title to its endowment investments to its foundation in exchange for an equivalent proportionate interest in the long-term investment portfolio managed by the foundation. The agreement is for a term of five years, with renewable two-year extensions at the option of the institution, unless notice of intent to terminate the arrangement is provided prior to the expiration of the term. If the agreement is terminated, funds invested with individual investment managers that have commitments from the foundation to maintain investments for certain minimum time periods may not be returned to the institution until those constraints have been satisfied. For reporting purposes, the foundation's investments have been reduced by the amount of the institution's investments with the foundation.

The Maryland Stadium Authority is restricted by the trust indenture for each bond issue as to the investments which can be made. Authorized investments under the indentures include U.S. Treasury and agency obligations, municipal obligations, banker's acceptances, and repurchase agreements.

Investments of the component units are stated at fair value, which is based on quoted market prices.

The investments and maturities as of June 30, 2010, for the component units are as follows (amounts expressed in thousands).

Investment Type	Investment Maturities (in Years)					
	Fair Value	Less than 1	1-5	6-10	11-15	More than 15
U.S. Treasury obligations.....	\$ 35,315	\$ 827	\$ 18,322	\$10,428		\$ 5,738
U.S. Government agency obligations.....	148,487	41,516	54,495	3,746	\$3,577	45,153
Bond mutual funds.....	11,034	11,034				
Corporate debt securities .....	88,570	5,283	31,214	15,660	677	35,736
Municipal bonds.....	4,456		341	658	418	3,039
Money market mutual funds .....	<u>118,596</u>	<u>118,596</u>				
Total.....	\$406,458	\$177,256	\$104,372	\$30,492	\$4,672	\$89,666

In addition to the investments scheduled above, as of June 30, 2010, the component units' investments include the fair value of stock mutual funds, \$184,662,000, corporate equity securities, \$104,784,000, real estate, \$29,059,000, and the share of assets invested with the foundation, \$177,207,000.

*Interest Rate Risk.* The policy of the higher education institutions for managing their exposure to fair value loss arising from increasing interest rates is to comply with their investment policy, which sets maximum maturities for various fixed income securities.

*Credit Risk.* The policies of the higher education institutions for reducing their exposure to credit risk is to require minimum quality ratings for fixed income securities. The investment policy of the Maryland Prepaid College Trust requires the average rating in each portfolio to be "AA" or better. The trust indenture for each bond issuance by the Maryland Stadium Authority requires money market investments to be rated in the highest category by two nationally recognized securities rating organizations.

As of June 30, 2010, the component units had the following investments and quality ratings (amounts expressed in thousands).

Investment Type	Fair Value	Rating	Rating Organization	Percentage of Total Investments
U.S. agencies.....	\$ 3,070	AAA/Aaa	S&P & Moody's	0.34%
U.S. agencies.....	145,417	Not rated		16.13%
Money market mutual funds .....	97,365	Aaa	Moody's	10.80%
Money market mutual funds .....	21,231	Not rated		2.35%
Bond mutual funds.....	11,034	Not rated		1.22%
Corporate debt securities .....	10,545	AAA/Aaa	S&P & Moody's	1.17%
Corporate debt securities .....	12,868	AA/Aa	S&P & Moody's	1.43%
Corporate debt securities .....	19,333	A	S&P & Moody's	2.14%
Corporate debt securities .....	33,419	Less than A	Moody's	3.70%
Corporate debt securities .....	118	BBB	S&P & Moody's	0.01%
Corporate debt securities .....	12,287	Not rated		1.36%
Municipal bonds.....	<u>4,456</u>	Aaa	Moody's	<u>0.49%</u>
Total.....	\$371,143			41.14%

*Concentration of Credit Risk.* The component units place no limit on the amount they may invest in U.S. Government issuers.

In addition to the Maryland Prepaid College Trust, the College Savings Plans of Maryland consists of the Maryland College Investment Plan, a fiduciary component unit. As of June 30, 2010, the Plan has \$1,851,223,000 of investments held in trust for individuals and organizations.

### C. Securities Lending Transactions:

#### 1. Governmental and Enterprise Fund Types:

Under Section 2-603 of the State's Finance and Procurement Article, the State lends U.S. Government securities to broker-dealers and other entities (borrowers). The State Treasurer's Office controls the program and authorizes all transactions. These transactions may involve certain investments held in the State treasury for the benefit of State agencies. The State's custodial bank manages the securities lending program by contracting with a lending agent who receives cash as collateral. The lending agent may use or invest cash collateral in accordance with the reinvestment guidelines approved by the State Treasurer's Office. Additionally, under the terms of the lending agreement, the lending agent indemnifies the State against any credit loss arising from investment of the collateral. The collateral will be returned for the same securities in the future. Cash collateral is initially pledged at greater than the market value of the securities lent and additional cash collateral has to be provided by the next business day if the aggregate value of the collateral falls to less than 100 percent of the market value of the securities lent.

Securities on loan at year-end are owned by the general fund and the Maryland State Lottery Agency and are included in the preceding Investments Note 3.B. At year-end, the State has no credit risk exposure to borrowers because the amounts the State owes the borrowers exceed the amounts the borrowers owe the State. As of June 30, 2010, the fair value of the loaned securities and the related collateral were as follows (amounts expressed in thousands).

	Fair Value		Percent Collateralized
	Lent Securities	Collateral Received	
Securities-General fund.....	\$ 177,917	\$ 182,000	102.3%
Securities-Lottery Agency.....	<u>64,771</u>	<u>65,824</u>	<u>101.6</u>
Total.....	\$ 242,688	\$ 247,824	102.1%

Either the State or the borrower may terminate the lending agreements on demand. Lending agreements are usually short in duration. The duration of lending agreements is matched with the term to maturity of the investment of the cash collateral by investing only in repurchase agreements. Such matching existed at year-end. Investments made with cash received as collateral are included in the preceding Investments-Governmental Funds Schedule in 3.B.1.

The State's custodial bank is obligated to indemnify the State against liability for any suits, actions or claims of any character arising from or relating to the performance of the bank under the contract, except for liability caused by acts or omissions of the State.

The State did not experience any losses on their securities lending transactions for the year ended June 30, 2010.

## 2. Fiduciary Funds:

The Pension Trust Funds (Funds) participate in a securities lending program as permitted by the investment policies as approved by the Board of Trustees. The Funds' custodian lends specified securities to independent brokers in return for collateral of greater value. The preceding Investments – Fiduciary Funds Schedule in 3.B.3 includes (1) securities lent at year-end for cash collateral; (2) securities lent for securities collateral; and (3) investments purchased with cash collateral.

Borrowing brokers must transfer in the form of cash or other securities, collateral valued at a minimum of 102% of the fair value of domestic securities and international fixed income securities, or 105% of the fair value of international equity securities on loan. Collateral is marked to market daily. If the fair value of the pledged collateral falls below the specified levels, additional collateral is required to be pledged by the close of the next business day. In the event of default by a borrowing broker, the Funds' custodial bank is obligated to indemnify the Funds if, and to the extent that, the fair value of collateral is insufficient to replace the lent securities. The Funds have not experienced any loss due to credit or interest rate risk on securities lending activity since inception of the program. As of June 30, 2010, the Funds had no credit risk exposure to borrowers because the fair value of collateral held for securities lent exceeded the fair value of the related securities, as follows (amounts expressed in thousands).

Securities Lent	Fair Value	Cash Collateral Received or Non-Cash Collateral Value	Percent Collateralized
Lent for cash collateral:			
Fixed income securities .....	\$ 2,331,720	\$ 2,383,436	102.3%
Domestic equities .....	1,680,536	1,734,086	103.2
International equities .....	<u>484,724</u>	<u>512,711</u>	105.8
Subtotal .....	4,496,980	4,630,233	
Lent for noncash collateral:			
Fixed income securities .....	25,890	26,146	101.0
Domestic equities .....	11,956	16,458	137.7
International equities .....	<u>3,542</u>		
Total securities lent.....	\$ 4,538,368	\$ 4,672,837	103.0%

During fiscal year 2010, the Funds maintained the right to terminate securities lending transactions upon notice. Cash collateral is invested in one of the lending agent's short-term investment pools, which as of June 30, 2010, had a weighted average maturity of 33 days and an average expected maturity of 73 days. Because the relationship between the maturities of the investment pools and the Funds' security loans is affected by the maturities of the loans made by other entities that use the agent's pools, the Funds cannot match maturities. The Funds cannot pledge or sell collateral securities received unless and until a borrower defaults.

#### 4. Receivables:

Taxes receivable, as of June 30, 2010, consisted of the following (amounts expressed in thousands).

	Major Governmental Funds		Non-Major Governmental Funds	Total Governmental Funds
	General	Special Revenue		
Income taxes .....	\$ 550,918			\$ 550,918
Sales and use taxes.....	389,252			389,252
Transportation taxes, principally motor vehicle fuel and excise.....		\$73,281		73,281
Other taxes, principally alcohol and property.....	40,736		\$ 26,329	67,065
Less: Allowance for uncollectibles.....	<u>42,260</u>			<u>42,260</u>
Taxes receivable, net.....	\$ 938,646	\$ 73,281	\$ 26,329	\$1,038,256

Tax revenues are reported net of uncollectible amounts. Total uncollectible amounts related to tax revenues of the current period are \$5,469,000.

Other accounts receivable in the governmental funds of \$526,031,000, including \$70,658,000 due in excess of one year, consist of various miscellaneous receivables for transportation costs, collection of bills owed to the State's collection unit, Medicaid reimbursements, and child support and public assistance overpayments.

Other accounts receivable for the enterprise funds of \$386,298,000, primarily consist of \$220,647,000 due to the Maryland Unemployment Program from employers and for benefit overpayments, and \$29,245,000, due to the Maryland State Lottery Agency for lottery ticket sale proceeds.

## 5. Deferred Revenue:

Governmental funds report deferred revenue in connection with receivables for revenues that are not considered to be available to liquidate liabilities of the current period. Governmental funds, enterprise funds and component units also defer revenue recognition in connection with resources that have been received, but not yet earned.

As of June 30, 2010, the various components of deferred revenue reported in the governmental funds and enterprise funds were as follows (amounts expressed in thousands).

	Unavailable	Unearned	Total
Tax receivables for revenues not considered available to liquidate liabilities of the current period (general fund).....	\$217,688		\$217,688
Other receivables for revenues not considered available to liquidate liabilities of the current period (general fund) .....	208,607		208,607
Other receivables for revenues not considered available to liquidate liabilities of the current period (special revenue fund).....	50,254		50,254
Other receivables for revenues not considered available to liquidate liabilities of the current period (other governmental funds) .....	47		47
Receipts that have been received, but not earned (general fund) .....		\$375,984	375,984
Revenue in connection with resources that have been received, but not earned (special revenue fund).....		16,462	16,462
Revenue in connection with resources that have been received, but not earned (enterprise funds) .....		<u>19,794</u>	<u>19,794</u>
Total deferred/unearned revenue for governmental funds and enterprise funds .....	\$476,596	\$412,240	\$888,836

## 6. Loans and Notes Receivable and Investment in Direct Financing Leases:

### A. Loans and Notes Receivable:

Loans and notes receivable, as of June 30, 2010, consisted of the following (amounts expressed in thousands).

	Primary Government				Component Units		
	General	Special Revenue Department of Transportation	Non-major Governmental Funds	Enterprise	Higher Education	Stadium Authority	Other
Notes receivable:							
Political subdivisions:							
Water quality projects .....			\$ 2,887	\$ 847,484			
Public school construction.....			351				
Other .....		\$ 1,466	18				
Volunteer fire & rescue companies .....	\$ 8,275						
Permanent mortgage loans.....				3,042,242			
Student and health profession loans .....					\$78,495		
Shore erosion loans .....	6,369						
Other .....	<u>257</u>				<u>5,224</u>	<u>\$ 4,470</u>	<u>\$674</u>
Total .....	14,901	1,466	3,256	3,889,726	83,719	4,470	674
Less: Allowance for possible loan losses....				<u>270,074</u>	<u>13,865</u>		<u>34</u>
Loans and notes receivable, net .....	14,901	1,466	3,256	3,619,652	69,854	4,470	640
Due within one year.....	<u>2,074</u>	<u>300</u>	<u>551</u>	<u>130,022</u>	<u>8,186</u>	<u>401</u>	<u>79</u>
Due in more than one year.....	\$12,827	\$ 1,166	\$ 2,705	\$3,489,630	\$61,668	\$ 4,069	\$ 561

Certain notes receivable for advances of general obligation bond proceeds bear interest at rates ranging from 4.4% to 8.8% and mature within 23 years.

Water quality project loans consist of loans to various local governments and other governmental entities in the State for wastewater and drinking water projects under the United States Environmental Protection Agency's (EPA) Capitalization Grants for State Revolving Funds' Federal assistance program. The permanent mortgage loans consist of financing for single and multi-family projects, rental projects, small businesses, industrial sites and various other purposes. Student and health profession loans are made pursuant to student loan programs funded through the U.S. Government.

*B. Investment in Direct Financing Leases:*

*Enterprise Funds:*

As of June 30, 2010, the Maryland Transportation Authority (Authority) has direct financing leases with the State's Department of Transportation, the Washington Metropolitan Area Transit Authority (WMATA), and the general fund. The present value of the direct financing leases as of June 30, 2010, was \$398,906,000. As of June 30, 2010, the Authority held \$48,589,000 to be spent to complete assets under these direct financing leases. Lease payments receivable, including unearned interest for each of the five succeeding fiscal years and thereafter, including repayment of amounts to be spent, consist of the following amounts (expressed in thousands).

2011 .....	\$ 25,024
2012 .....	26,189
2013 .....	27,294
2014 .....	28,484
2015 .....	18,119
2016-2020 .....	98,236
2021-2025 .....	110,500
2026-2030 .....	81,175
2031-2035 .....	<u>28,040</u>
Total.....	443,061
Unearned interest income .....	<u>4,434</u>
Total lease payments .....	447,495
Restricted investments related to unexpended bond proceeds .....	<u>48,589</u>
Net investments in direct financing leases .....	<u>\$398,906</u>

*Component Units:*

As of June 30, 2010, the Maryland Stadium Authority (Authority) has direct financing leases with the State. The present value of the direct financing leases as of June 30, 2010, is \$228,628,000. As of June 30, 2010, the Authority held \$7,857,000 to be spent to complete assets under these direct financing leases. Lease payments receivable, including unearned interest for each of the five succeeding fiscal years and thereafter, including repayment of amounts to be spent, consist of the following amounts (expressed in thousands).

2011 .....	\$ 31,652
2012 .....	31,822
2013 .....	31,835
2014 .....	31,924
2015 .....	30,688
2016-2020 .....	123,584
2021-2025 .....	47,290
2026-2030 .....	<u>6,432</u>
Total.....	335,227
Less: Unearned interest income .....	<u>98,742</u>
Total lease payments .....	236,485
Restricted investments related to unexpended bond proceeds .....	<u>7,857</u>
Net investments in direct financing leases .....	<u>\$228,628</u>

## 7. Restricted Assets:

Certain assets of the governmental activities, business-type activities and component units are classified as restricted assets on the Statement of Net Assets. The purpose and amount of restricted assets as of June 30, 2010, are as follows (amounts expressed in thousands).

Amount	Purpose
<b>Governmental Activities:</b>	
\$ 27,437	Represents money restricted for completion of transportation construction projects maintained in a trust account per Certificates of Participation agreements
1,126	Represents investments restricted for debt service payments according to bond agreements
147,813	Represents State property taxes restricted to pay debt service on general obligation debt
<u>2,929</u>	Represents certificates of deposit linked to funds loaned under the State's housing loan program
<u>\$179,305</u>	
<b>Business-type Activities:</b>	
\$3,718,470	Assets of the Community Development Administration and the State Funded Loan Programs are restricted for various mortgage loans for low-income housing and local governments' public facilities
668,917	The purpose of the restricted assets is to secure the revenue bonds of the Maryland Water Quality Administration made for waste-water treatment systems and bay restoration
677,635	Restricted assets represent deposits with the U.S. Treasury and amounts due from employers to pay unemployment compensation benefits in accordance with Federal statute
145,426	This cash is held in separate annuity contracts and coupon bonds in the Maryland State Lottery Agency for winning lottery ticket payouts and escrow deposits from video lottery terminal license applicants
787,467	Cash and investments have been restricted in accordance with revenue bond debt covenants of the Maryland Transportation Authority for completion of capital projects and debt service
<u>\$5,997,915</u>	
<b>Component Units:</b>	
\$ 160,095	Restricted assets of higher education include funds held by the trustee for future construction projects and to pay debt service and cash restricted for endowment purposes
21,358	Restricted assets of Maryland Stadium Authority include cash and investments that relate to revenue bond indentures and master equipment lease financing agreements
14,861	Restricted assets include investments that relate to revenue bond indentures and to restricted project advances for the provision of water supply and waste-water treatment by the Maryland Environmental Service
<u>\$ 196,314</u>	

## 8. Interfund Receivables and Payables:

Interfund balances, as of June 30, 2010, consisted of the following (amounts expressed in thousands).

Receivable Fund	Payable Fund	Amount
General Fund	Non-major governmental funds	\$ 54,830 (b)
	Enterprise Funds -	
	Economic Development Loan Programs	2,011 (c)
	Maryland State Lottery Agency	39,026 (a)
		<u>\$95,867</u>
Special Revenue Fund	General Fund	\$ 91,075 (d)
	Enterprise Funds -	
	Maryland Transportation Authority	33,955 (e)
		<u>\$125,030</u>
Non-major governmental funds	General Fund	<u>\$ 2,425 (f)</u>
Enterprise Funds -		
Economic Development Loan Programs	General Fund	\$ 20,985 (h)
Unemployment Insurance Program	General Fund	2,967 (h)
Maryland Transportation Authority	Special Revenue Fund	12,889 (g)
		<u>\$ 36,841</u>
Agency Fund -		
Local Income Taxes	General Fund	\$ 350,000 (i)

The receivable and payable transactions between the governmental funds and the enterprise funds are reported as due from and due to other funds. The receivable and payable transactions between the agency fund and the general fund are reported as accounts receivable from State treasury by the agency fund and due to other funds by the general fund.

The receivable and payable transactions between the Primary Government and Component Units, as of June 30, 2010, consist of the following (amounts expressed in thousands).

Receivable Fund	Payable Fund	Amount
General Fund	Higher Education Fund	<u>\$ 702</u>
Component Units -		
Maryland Stadium Authority	General Fund	\$3,764

- (a) The amounts represent monies collected by the Maryland State Lottery in June, 2010, and paid to the general fund in July, 2010.
- (b) This amount represents an overdraft in the non-major governmental funds' share of pooled invested cash.
- (c) The amount represents short term advances from the general fund for principal and interest payments.
- (d) The amount represents income tax subsidies and return of health insurance costs from the general fund.
- (e) The Maryland Transportation Authority collects fees for the special revenue fund. The money will be used to build and maintain special revenue fund infrastructure, structures and other improvements.
- (f) The amount represents monies collected by the general fund in June, 2010, and paid to the non-major governmental funds in July, 2010.
- (g) The Maryland Transportation Authority receives rent, interest income and fees for services from the special revenue fund.

- (h) These amounts represent receivable balances from general fund subsidies.
- (i) The loan was made in accordance with Section 2-606 of Tax-General Article of the Annotated Code of Maryland from the reserve of unallocated tax revenue that the Comptroller estimates will be claimed and refunded to taxpayers within 3 years of the date that the income tax return was filed. The money will be used to provide funding for public elementary and secondary education. According to the same law, an additional loan from this Agency Fund (reserve) of \$200,000,000 to the General Fund, is required to be made in fiscal year 2011 to assist in funding the Maryland Medicaid Program.

All interfund balances except for (i) above, are expected to be repaid by June 30, 2011. For (i) above, the General Fund is required to pay \$50,000,000 a year in each of fiscal years 2014 through 2020 to the Agency Fund for the \$350,000,000 loan and \$33,333,000 a year in each of fiscal years 2021 through 2026 for the \$200,000,000 loan.

## 9. Interfund Transfers:

Interfund transfers, for the year ended June 30, 2010, consisted of the following (amounts expressed in thousands).

Transfers In	Transfers Out	Amount
General Fund	Special Revenue Fund	\$ 398,284
	Non-major Governmental Funds	192,913
	Enterprise Funds -	
	Maryland State Lottery Agency	510,609
	Economic Development Loan Programs	168,666
	Non-major Enterprise Funds	<u>6,230</u>
		<u>\$1,276,702</u>
Special Revenue Fund	General Fund	<u>\$ 376,856</u>
Non-major Governmental Funds	General Fund	\$ 96,454
	Special Revenue Fund	<u>145,037</u>
		<u>\$ 241,491</u>
Enterprise Funds -		
Loan Programs	General Fund	\$ 36,934
	Non-major Governmental Funds	3,777
Maryland Transportation Authority	Special Revenue Fund	<u>30,000</u>
		<u>\$ 70,711</u>

Transfers are primarily used to 1) transfer revenues from the fund required by statute or budget to collect the revenue to the fund required by statute or budget to expend them, 2) transfer receipts restricted to debt service from the funds collecting the receipts to the non-major governmental funds as debt service payments become due, and 3) provide unrestricted revenues collected in the general fund to finance various programs accounted for in other funds in accordance with budgetary authorizations. In addition, the non-major governmental funds transferred \$185,835,000 of Program Open Space funds, \$185,000 of interest earned on bonds, \$981,000 for expenses for bond sales, \$87,000 return of funds for rescinded pay-as-you-go capital projects, and \$5,825,000 of Shore Erosion loan repayments to the general fund.

The Maryland State Lottery transferred revenue in excess of funds allocated to prize awards, operating expenses and capital expenditure payments in the amount of \$510,609,000, to the general fund. The general fund transferred \$36,934,000 to support the operations of Enterprise Funds – Loan Programs, and the Enterprise Funds – Loan Programs transferred \$168,666,000 of unused funds to the general fund. The special revenue fund also transferred \$30,000,000 to the Enterprise Fund – Maryland Transportation Authority for design, planning and land purchases for the Inter-County Connector Project. Expenditures for capital projects of \$3,777,000 were transferred to Enterprise Funds – Loan Programs.

During the year, the general fund and other governmental funds had expenditures of \$1,642,836,000, and \$264,178,000, respectively, that were for funds provided to supplement revenues and construction costs, respectively, of the higher education

component units. The general fund also had net expenditures of \$19,537,000 that were for funds provided to supplement revenues of the Maryland Stadium Authority. The general fund transferred \$15,743,000 to the non-major component unit, the Maryland Technology Development Corporation, for Maryland Stem Cell Research and other operating grants.

## 10. Capital Assets:

### A. Capital Assets, Primary Government:

Capital assets activity by asset classification net of accumulated depreciation, for the year ended June 30, 2010, was as follows (amounts expressed in thousands).

Governmental activities:					
Classification	Balance June 30, 2009	Additions	Deletions	Transfers In/Out*	Balance June 30, 2010

### General Obligation Bonds -

General obligation bonds are authorized and issued primarily to provide funds for State owned capital improvements, facilities for institutions of higher education and the construction of public schools in political subdivisions. Bonds have also been issued for local government improvements, including grants and loans for water quality improvement projects and correctional facilities, and to provide funds for loans or outright grants to private, not-for-profit cultural or educational institutions. Under constitutional requirements and practice, the Maryland General Assembly, by a separate enabling act, authorizes loans for particular objects or purposes. Thereafter, the Board of Public Works, a constitutional body comprised of the Governor, the Comptroller and the State Treasurer, by resolution, authorizes the issuance of bonds in specified amounts. Bonds are issued and accounted for on a "cash flow" basis rather than a "project" basis and are not sold to specifically fund an enabling act. General obligation bonds are subject to arbitrage regulations. However, there are no major outstanding liabilities in connection with these regulations as of June 30, 2010. Bonds issued after January 1, 1988, are subject to redemption provisions at the option of the State.

General obligation bonds, which are paid from the general obligation debt service fund, are backed by the full faith and credit of the State and, pursuant to the State Constitution, must be fully paid within 15 years from the date of issue. Property taxes, debt service fund loan repayments and general fund and capital projects fund appropriations provide the resources for repayment of general obligation bonds. During fiscal year 2010, the State issued \$1,938,963,000 of general obligations at a premium of \$196,323,000 with related issuance costs of \$9,282,000.

Included in bond issuances were \$798,080,000 to refund certain outstanding general obligation bonds issued between 2004 and 2009. From the refunding bonds and related premium of \$130,455,000, \$924,185,000 was transferred to an escrow account and used to purchase U.S. Government securities. These securities will be used to secure the principal, call premium, and interest

related to the refunded bonds. The interest rates on the refunded bonds range from 4.3% to 5.0%. The purpose of the refunding was to realize savings on debt service costs. The aggregate difference in debt service between the refunded debt and the refunding debt is \$35,134,000. The economic gain on the transaction, that is, the difference between the present value of the debt service streams for the refunding debt and refunded debt, is \$33,527,000.

Refunded bonds of \$899,710,000 maturing in fiscal years 2012-2023 and callable in fiscal years 2011-2017 were considered defeased as of June 30, 2010. Accordingly, the trust account assets and the liability for the defeased bonds are not included in these financial statements.

General obligation bonds issued and outstanding, as of June 30, 2010, are as follows (amounts expressed in thousands).

Issue	Maturity	Interest Rates	Annual Principal Installments	Principal Issued	Principal Outstanding
8/3/00	2004-2016	5.1-5.8%	\$ 15,900	\$ 200,000	\$ 15,900

				\$9,118,436	\$6,523,222

(a) Includes refunding debt

(b) Qualified Zone Academy Bonds for which the purchaser receives Federal tax credits each year the bonds are outstanding

(c) Includes federally taxable Build America Bonds for which the State receives a subsidy payment from the Federal government equal to 35% of interest payments

(d) Qualified School Construction Bonds for which the purchaser receives Federal tax credits each year the bonds are outstanding

General obligation bonds authorized, but unissued, as of June 30, 2010, total \$2,394,985,000.

As of June 30, 2010, general obligation debt service requirements for principal and interest in future years are as follows (amounts expressed in thousands).

Years Ending June 30,	Principal	Interest
2011.....	\$ 515,094	\$ 304,968
2012.....	542,179	278,952
2013.....	564,299	250,866
2014.....	529,389	222,808
2015.....	506,374	196,748
2016-2020.....	2,459,889	612,117
2021-2025.....	<u>1,405,998</u>	<u>139,354</u>
Total.....	\$6,523,222	\$2,005,813

Subsequent to June 30, 2010, on August 10, 2010, general obligation bonds aggregating \$485,175,000 were issued for capital improvements. Serial bonds in the amount of \$440,000,000 with interest rates ranging from 2.0% to 5.0% mature through 2026. Term bonds in the amount of \$45,175,000 with an average interest rate of 4.4% mature in 2026.

Of these bonds, \$120,175,000 were issued as federally taxable bonds. Bonds in the amount of \$75,000,000 are Build America Bonds under the American Recovery and Reinvestment Act of 2009 (ARRA). For these bonds, the State receives a subsidy payment from the Federal government equal to 35% of interest payments. Bonds in the amount of \$45,175,000 are Qualified School Construction Bonds under ARRA. For these bonds, the State receives a subsidy payment from the Federal government equal to 100% of interest payments.

#### *Transportation Bonds -*

Transportation bonds outstanding as of June 30, 2010, are as follows (amounts expressed in thousands).

	Outstanding
Consolidated Transportation Bonds – 3.0% to 5.5%, due serially through 2024 for State transportation activity .....	\$1,593,655
Consolidated Transportation Bonds, Refunding – 5.0%, due serially through 2014 for State transportation activity .....	<u>51,355</u>
Total.....	\$1,645,010

Consolidated Transportation Bonds are limited obligations issued by the Maryland Department of Transportation (Department) for highway, port, airport, rail, or mass transit facilities, or any combination of such facilities. The principal must be paid within 15 years from the date of issue.

As provided by law, the General Assembly shall establish in the budget for any fiscal year a maximum outstanding aggregate amount of these Consolidated Transportation Bonds as of June 30 of the respective fiscal year that does not exceed \$2,600,000,000 through June 30, 2010, and thereafter. The aggregate principal amount of those bonds that was allowed to be outstanding as of June 30, 2010, was \$1,830,010,000. The aggregate principal amount of Consolidated Transportation Bonds outstanding as of June 30, 2010, was \$1,645,010,000. Consolidated Transportation Bonds are paid from the transportation debt service fund. Principal and interest on Consolidated Transportation Bonds are payable from the proceeds of certain excise taxes levied by statute and a portion of the corporate income tax credited to the Department. These amounts are available to the extent necessary for that exclusive purpose before being available for other uses by the Department. If those tax proceeds become insufficient to meet debt service requirements, other receipts of the Department are available for that purpose. The holders of such bonds are not entitled to look to other State resources for payment.

Under the terms of the authorizing bond resolutions, additional Consolidated Transportation Bonds may be issued, provided, among other conditions, that (1) total receipts (excluding Federal funds for capital projects, bond and note proceeds, and other receipts not available for debt service), less administration, operation and maintenance expenses for the preceding fiscal year, equal

at least two times the maximum annual debt service on all Consolidated Transportation Bonds outstanding and to be issued, and that (2) total proceeds from pledged taxes equal at least two times the maximum annual debt service on all Consolidated Transportation Bonds outstanding and to be issued.

The 2009 session of the General Assembly established a maximum outstanding principal amount of \$661,800,000 as of June 30, 2010, for all nontraditional debt of the Department. Nontraditional debt outstanding is defined as any debt instrument that is not a Consolidated Transportation Bond or GARVEE bond (tax-exempt debt backed by annual federal appropriations for federal-aid transportation projects). This debt includes certificates of participation, debt backed by customer facility charges, passenger facility charges, or other revenues, and debt issued by the Maryland Economic Development Corporation or any other third party on behalf of the Department. As of June 30, 2010, the Department's nontraditional debt outstanding was \$674,740,000 and is reported as obligations under capital leases and includes funds held by the bond trustee under these agreements.

Arbitrage regulations are applicable to the transportation bonds payable. The Department estimates there are no material liabilities for arbitrage rebates as of June 30, 2010.

During fiscal year 2010, the Department issued \$140,000,000 of Consolidated Transportation Bonds at a premium of \$631,000, with maturities ranging from June 15, 2013, to June 15, 2025, with interest rates ranging from 2.0% to 4.7%. Of these bonds, \$126,000,000 were issued as federally taxable bonds (Build America Bonds).

As of June 30, 2010, Department bond debt service requirements for principal and interest in future years are as follows (amounts expressed in thousands).

Years Ending June 30,	<u>Consolidated Transportation Bonds</u>	
	Principal	Interest
2011.....	\$ 83,170	\$ 75,492

2014.....	130,620	61,480
2015.....	147,280	55,421
2016-2020.....	696,000	168,717
2021-2025.....	<u>375,755</u>	<u>40,047</u>
Total.....	<u>\$1,645,010</u>	<u>\$539,737</u>

#### *Obligations Under Capital Leases -*

Obligations under capital leases as of June 30, 2010, bore interest at annual rates ranging from .9% to 6.7%. Capital lease obligations with third parties in fiscal year 2010 increased by \$15,073,000 for master equipment and building leases entered into by the general fund and include leases for various transportation related projects entered into by the Maryland Department of Transportation. The capital leases with component units include the general fund's capital leases with the Maryland Stadium Authority, which are being paid with the net proceeds transferred from certain Lottery games, and with other non-major component units. Following is a schedule of annual future minimum payments under these obligations, along with the present value of the related net minimum payments as of June 30, 2010 (amounts expressed in thousands).

Years Ending June 30,	Capital Lease Obligations with	
	Third Parties	Component Units
2011.....	\$ 99,343	\$ 34,046
2012.....	95,167	33,209
2013.....	88,044	32,958
2014.....	84,835	33,059
2015.....	69,324	31,312
2016-2020.....	322,492	124,252
2021-2025.....	278,425	47,290
2026-2030.....	175,640	6,432
2031-2035.....	<u>29,379</u>	
Total future minimum payments.....	1,242,649	342,558
Less: Amount representing interest.....	410,960	99,557
Less: Restricted cash and investments...	<u>33,488</u>	<u>10,239</u>
Present value of net minimum payments.	\$ 798,201	\$ 232,762

The reduction shown for restricted cash and investments in the amounts of \$33,488,000 and \$10,239,000 is monies held by the bond trustee to be used primarily for construction expenditures.

The assets acquired through capital leases are as follows (amounts expressed in thousands).

Asset	Third Parties
	Amount
Construction in progress.....	\$ 51,854
Land and improvements.....	19,102
Buildings and improvements.....	1,043,334
Machinery and equipment .....	263,928
Infrastructure .....	<u>319,383</u>
Total acquired assets.....	1,697,601
Less: Accumulated depreciation .....	<u>480,355</u>
Total capital assets - net .....	\$1,217,246

#### *Pollution Remediation Obligations -*

The State has recognized a pollution remediation obligation on the statement of net assets for governmental activities. A pollution remediation obligation is a liability which addresses the current or potential detrimental effects of existing pollution and may include pre-cleanup activities (site assessment, feasibility study), cleanup activities (neutralization, containment, removal and disposal, site restoration), oversight and enforcement and post remediation monitoring.

Obligating events initiate the recognition of a pollution remediation liability. These events include any of the following.

- There is an imminent danger to the public.
- The State is in violation of a related permit or license.
- The State is identified as a responsible party or potentially responsible party (PRP) by a regulator.
- The State is named or has evidence that it will be named in a lawsuit.
- The State commences, or legally obligates itself to commence, pollution remediation activities.

The pollution remediation obligation is an estimate and subject to changes resulting from price increases or reductions, technology, or changes in applicable laws or regulations. The liability is recognized as it becomes estimable. In some cases, this may be at inception. In other cases, components of a liability (for example, legal services, site investigation or required post remediation monitoring) are recognized as they become reasonably estimable. At a minimum, the liability is reviewed for sufficiency when various benchmarks occur, such as receipt of an administrative order, participation as a responsible party or PRP

in a site assessment, completion of a corrective measures feasibility study, issuance of an authorization to proceed, and as remediation is implemented and monitored.

Measurement of the liability is based on the current value of outlays expected to be incurred using the expected cash flow technique. This technique measures the liability as the sum of probability-weighted amounts in a range of possible estimated amounts - the estimated mean or average. Expected recoveries reduce the pollution remediation expense.

The pollution remediation estimated liability is \$680,697,000 with approximately \$511,280,000 of estimated recoveries from third parties to reduce the liability. Included in this liability are cost estimates for site monitoring and repair, excavation of road and infrastructure and replacement of buildings as a result of site contaminations by hazardous materials under Federal and State law in the amount of \$155,670,000. In these cases, either the State has been named in a lawsuit by a State regulator or the State legally obligated itself under the Environmental Article, Section 7-201, of the Annotated Code of Maryland.

The estimated liability also includes \$12,461,000 for the clean-up of an illegal tire dump for which the State is legally obligated under the Environmental Article, Section 9-2 of the Annotated Code of Maryland. The State is also responsible for the removal and replacement of underground storage tanks and the monitoring of wells, in an estimated amount of \$1,286,000, as a result of not complying with federal requirements under the Clean Water Act and the Resource Conservation Recovery Act.

The cost estimates and assumptions for the pollution remediation due to site contamination from hazardous materials are based on engineering design estimates. The cost estimates and assumptions for the tire dump clean-up are based on estimated unit cost of \$325/ton based on historical data, fuel costs, specific site factors and adjusted by 3% - 4% CPI.

No pollution remediation liability has been recognized for a former landfill on land owned by the highway department that has been identified for cleanup by the EPA. The EPA has invited the agency to participate in a PRP Group as owner-operator of the land. The agency has replied that it transferred the land in question to a local government. The State has not made a final commitment. Cleanup costs have yet to be determined.

For the governmental activities, compensated absences, self insurance, net pension obligations, net other post-employment benefits obligations, obligations under capital leases, and pollution remediation obligations are generally liquidated by the general or special revenue fund as applicable.

#### *B. Long Term Obligations – Business-type Activities:*

Changes in long-term obligations for business-type activities as of June 30, 2010, are as follows (amounts expressed in thousands).

	Balance June 30, 2009	Additions	Reductions	Balance June 30, 2010	Amounts Due Within One Year

*Community Development Administration (Administration) - Revenue Bonds:*

The Administration, an agency of the Department of Housing and Community Development, has issued revenue bonds, proceeds of which were used for various mortgage loan programs. Assets aggregating approximately \$3,717,989,000 and revenues of each mortgage loan program are pledged as collateral for the revenue bonds. Interest rates range from 0.5% to 6.8%, with the bonds maturing serially through June, 2049. The principal amount outstanding as of June 30, 2010, is \$3,136,883,000. Substantially all bonds are subject to redemption provisions at the option of the Administration. Redemptions are permitted at rates ranging from 100% to 101% of the outstanding principal amount. During fiscal year 2010, the Administration issued \$138,205,000 of revenue bonds with interest rates ranging from 0.5% to 5.3% and maturing serially through November, 2041 and \$246,330,000 of revenue bonds at variable short-term rates and maturing on January 1, 2012.

Subsequent to June 30, 2010, the Administration issued a total of \$93,555,000 and redeemed a total of \$69,720,000 revenue bonds.

*Interest Rate Swaps:*

*Objective of the interest rate swap.* As a means to lower its borrowing costs, when compared against fixed-rate bonds at the time of issuance, the Administration entered into interest rate swaps in connection with variable rate revenue bonds totaling \$295,555,000. The intention of the swaps was to effectively change the Administration's variable interest rate on the bonds to fixed rates.

*Terms.* The bonds and the related swap agreements mature from September 1, 2025 through September 1, 2043, and the swaps' notional amount of \$295,555,000 matches the amount of the variable rate bonds. Under the swap agreements, the Administration pays the counterparty a fixed payment of from 3.7% to 4.8% and receives a variable payment computed as either 64% of the London Interbank Offered Rate (LIBOR) plus .2% or .3%. Conversely, the bonds' variable rate is based on the Securities

## Industry and Financial Markets Association Rate.

**Credit risk.** The fair value of the swaps represents the Administration's credit exposure to each counterparty as of June 30, 2010. The fair value of three swaps with one counterparty is (\$8,205,000), the fair value of one swap with a second counterparty is (\$4,560,000), the fair value of three swaps with a third counterparty is (\$17,625,000), and the fair value of one swap with a fourth counterparty is (\$2,240,000). Therefore, the Administration is not exposed to credit risk as of June 30, 2010, because the swaps have a negative fair value. However, should the valuation of the swap change and the fair value turn positive, the Administration would be exposed to credit risk in the amount of the swap's fair value. The first counterparty is rated AA by Standard & Poor's and Aa by Moody's, the second counterparty is rated A by Standard & Poor's and Fitch and Aa by Moody's, the third counterparty is rated Aa by Moody's and AAA by Standard & Poor's and Fitch, and the fourth counterparty is rated Aaa by Moody's and AA by Fitch. To mitigate the potential for credit risk, if the counterparties' credit quality falls below A, the fair value of the swaps will be fully collateralized by the counterparties.

**Basis risk.** The swaps would expose the Administration to basis risk should the relationship between LIBOR and the Securities Industry and Financial Markets Association Rate converge. If a change occurs that results in the rates moving to convergence, the expected cost savings may not be realized.

**Termination risk.** The Administration or the counterparty may terminate the swap if the other party fails to perform under the terms of the contract. The counterparty can terminate the contract if the ratings on the related bonds fall below the credit rating thresholds. If a swap is terminated, the underlying variable rate bonds may be exposed to rising interest rates. If at the time of such termination a swap has a negative fair value, the Administration would be liable to the counterparty for a payment equal to the swap's fair value along with any accrued interest.

**Swap payments and associated debt.** Using rates as of June 30, 2010, debt service requirements of the variable rate debt and net swap payments, assuming current interest rates remain the same for their term, are as follows (amounts expressed in thousands). As rates vary, variable rate bond interest payments and net swap payments will vary.

Years Ending June 30,	Hedged Variable Rate Bonds		Interest Rate Swaps, Net	Total

**Fair value.** Because interest rates have generally decreased since execution of the swaps, the swaps have a fair value of (\$32,630,000) as of June 30, 2010. The swaps' fair value may be countered by a decrease in total interest payments required under the variable rate bonds, creating a lower synthetic interest rate. Because the coupons on the Administration's variable rate bonds adjust to changing interest rates, the bonds do not have a corresponding fair value decrease.

The table below summarizes the total fair values for the Administration's interest rate swaps as of June 30, 2010 and 2009, and the changes in fair values for the year ended June 30, 2010 (amounts expressed in thousands).

	Total Fair Value at June 30, 2009	Total Fair Value at June 30, 2010	Change in Fair Value for the Period
Interest rate swaps:			
Cash flow hedges	\$ (14,149)	\$ (32,630)	\$ (18,481)
Investment derivatives	<u>(15,306)</u>	<u>          </u>	<u>15,306</u>
Total	\$ (29,455)	\$ (32,630)	\$ ( 3,175)

The fair value balances of derivative instruments (interest rate swaps) outstanding as of June 30, 2010, classified by type, and the changes in fair value as presented on the financial statements for the year ended June 30, 2010, are as follows (amounts expressed in thousands).

	<u>Change in Fair Value</u>		<u>Fair Value at June 30, 2010</u>		<u>Outstanding Notional</u>
	Classification	Amount	Classification	Amount	Amounts
Cash flow hedges:					
Pay fixed interest rate swaps	Deferred outflow	\$(18,481)	Debt	\$(32,630)	\$295,555
Investment derivatives:					
Pay fixed interest rate swaps	Investment revenue	\$ 15,306	Investment	\$ -	\$ -

The fair value of the swaps is based on market value and is affirmed by an independent advisor whose valuation method and assumptions are in accordance with accounting guidance issued by GASB. The fair values of the interest rate swaps were estimated using the zero-coupon method. This method calculates the future net settlement payments required by the swap, assuming that the current forward rates implied by the yield curve correctly anticipate future spot interest rates. These payments are then discounted using the spot rates implied by the current yield curve for hypothetical zero-coupon bonds due on each future net settlement on the swaps.

At June 30, 2009, the Administration determined that 2007 Series F, J and M interest rate swaps did not meet the criteria for effectiveness. Therefore, the swap fair values in the amount of \$15,305,000 were reclassified as investment revenue and restated beginning net assets on these financial statements.

*Maryland Water Quality Financing Administration (Administration) - Revenue Bonds:*

The Administration, an agency of the Department of Environment, has issued revenue bonds for providing loans and grants. Interest rates range from 3.3% to 4.1%, payable semiannually, with annual installments from \$2,625,000 to \$12,920,000 to March 1, 2025. The principal amount outstanding as of June 30, 2010, is \$130,416,000. These bonds are payable solely from the revenue, money or property of the Administration.

*Maryland Unemployment Insurance Program - Non-Interest Loan Agreement:*

The Program entered into a new non-interest loan arrangement with the U.S. Department of Labor for a maximum amount of \$300,000,000 to provide liquidity to the Program. During the year, the Program was advanced \$133,841,000 which is still outstanding as of June 30, 2010. The loan is due on December 31, 2010.

Short-term debt activity during fiscal year 2010 is as follows (amounts expressed in thousands).

Outstanding short-term debt as of June 30, 2009.....	\$ -
Issuance.....	133,841
Retirements.....	-
Outstanding short-term debt as of June 30, 2010.....	\$133,841

This amount of short-term debt is included in the revenue bonds payable-current on the Statement of Net Assets.

*Maryland Transportation Authority Bonds:*

Bonds outstanding as of June 30, 2010, are as follows (amounts expressed in thousands).

---

Series 1992 Capital appreciation refunding and financing revenue bonds for the Authority's Transportation Facilities Projects maturing in annual installments of original principal ranging from \$721 to \$5,080 from July 1, 2010, to July 1, 2015, with approximate yields to maturity of 6.3% to 6.4% and an accreted amount.....	\$ 50,520
BWI Consolidated Car Rental Facility Revenue bonds, Series 2002, maturing in annual installments ranging from \$2,145 to \$8,505 from July 1, 2010, to July 1, 2032, with interest rates ranging from 2.7% to 6.7%, payable semiannually .....	105,855
BWI Parking Garage Revenue Bonds, Series 2002 A and B, maturing in annual installments ranging from \$4,315 to \$17,470 from March 1, 2011, to March 1, 2027, with interest rates ranging from 4.0% to 5.3% payable semiannually .....	220,575
BWI Facilities Projects Bonds, Series 2003, maturing in annual installments ranging from \$9,900 to \$11,200 from July 1, 2010, to July 1, 2013, with a current variable rate of .3%, payable semiannually .....	42,300
WMATA Metrorail Parking Projects Bonds, Series 2004, maturing in annual installments ranging from \$1,205 to \$2,780 from July 1, 2010, to July 1, 2028, with interest rates ranging from 3.0% to 5.0%, payable semiannually .....	35,635
Series 2004 Revenue bonds, for construction and improvement of Authority's Transportation Facilities projects, maturing in annual installments of \$1,155 to \$15,235 from July 1, 2010, to July 1, 2032, with interest rates ranging from 4.5% to 5.3% payable semiannually .....	156,855
Calvert Street Parking Project Revenue bonds, Series 2005, maturing in annual installments ranging from \$635 to \$1,415 from July 1, 2010, to July 1, 2032, with interest rates ranging from 3.3% to 4.4% payable semiannually .....	21,960
Grant and Revenue Anticipation Bonds, Series 2007 (GARVEE bonds), maturing in annual installments ranging from \$24,345 to \$34,390 from March 1, 2011, to March 1, 2019, with an interest rate of 4.0% payable semiannually to finance the Intercounty Connector Highway Project.....	257,090
Series 2007 Revenue Bonds, for construction and improvement of Authority's Transportation Facilities projects, maturing in annual installments of \$1,025 to \$12,685 from July 1, 2012, to July 1, 2031, with interest rates ranging from 4.0% to 5.0% payable semiannually .....	300,000
Series 2008 Revenue Bonds, for construction and improvement of Authority's Transportation Facilities projects, maturing in annual installments of \$8,885 to \$31,070 from July 1, 2012, to July 1, 2038, with interest rates ranging from 4.8% to 5.1% payable semiannually .....	573,305
Series 2009 Revenue Bonds, for construction and improvements of the Authority's Transportation Facilities projects maturing in annual installments of \$2,380 to \$14,570 from July 1, 2016 to July 1, 2023 with interest rates ranging from 3.0% to 5.0% payable semiannually .....	549,385
Grant and Revenue Anticipation Bonds, Series 2008 (GARVEE bonds), maturing in annual installments ranging from \$30,295 to \$48,865 from March 1, 2011, to March 1, 2020, with an interest rate of 4.3%, payable semiannually .....	394,705
Unamortized premium .....	52,308
Total.....	\$2,760,493

---

Revenue bonds are payable solely from the revenues of the transportation facilities projects. Capital assets constructed from BWI facilities, WMATA Metrorail and the Calvert Street Parking Project are not capital assets of the Authority. Capital appreciation bonds payable as of June 30, 2010, include an accreted amount of \$33,894,000.

The Authority is authorized to issue Grant and Revenue Anticipation Bonds (GARVEE Bonds) to a maximum amount of \$750,000,000 to build the Intercounty Connector highway project to be built in Montgomery and Prince George's Counties, Maryland. Debt service on these bonds is payable from a portion of Maryland's future Federal highway aid and other pledged moneys. These bonds are not general obligations of the Authority or legal obligations of the Maryland Department of Transportation or the State. The Authority has issued all GARVEE bonds authorized as of June 30, 2010.

During the year ended June 30, 2010, the Authority issued Series 2009 Revenue Bonds of \$549,385,000 for construction and improvements to the Authority's transportation facilities projects, including bonds of \$98,870,000 with interest rates ranging from 3.0%

to 5.0% and maturing serially through July, 2023 and term bonds of \$450,515,000 maturing July 1, 2029 and 2043 with coupons of 5.8% and 5.9% respectively.

*Obligations Under Capital Leases -*

Obligations of business-type activities under capital leases as of June 30, 2010, are as follows (amounts expressed in thousands).

Years Ending June 30,	State Lottery Agency
2011 .....	\$1,286
2012 .....	1,252
2013 .....	1,217
2014 .....	1,216
2015 .....	<u>607</u>
Total minimum lease payments.....	5,578
Less: Imputed interest .....	<u>317</u>
Present value of net minimum lease payments .....	<u>\$5,261</u>

The Lottery has entered into lease agreements for certain on-line gaming system equipment and a computer system. As of June 30, 2010, assets acquired under leases and the related accumulated amortization totaled \$5,882,000 and \$1,626,000 respectively, and are included in capital assets in the Statement of Net Assets, Business-type Activities.

*C. Notes and Revenue Bonds Payable - Component Units:*

*Higher Education -*

Certain State higher education institutions have issued revenue bonds for the acquisition, renovation, and construction of student housing and other facilities. Student fees and other user revenues collateralize the revenue bonds. Interest rates range from 2.0% to 6.1% on the revenue bonds.

Debt service requirements to maturity, excluding debt of the foundations in the amount of \$4,572,000, are as follows (amounts expressed in thousands).

Years Ending June 30,	Notes Payable and Other Long-Term Debt		Revenue Bonds	
	Principal	Interest	Principal	Interest
2011.....	\$ 5,600	\$ 3,878	\$ 75,725	\$ 47,305

Accumulated accreted interest and other deferred costs.....			<u>28,033</u>	
Total.....	<u>\$104,627</u>	<u>\$40,751</u>	<u>\$1,081,268</u>	<u>\$387,506</u>

The bonds issued are the debt and obligation of the issuing higher education institutions and are not a debt and obligation of, or pledge of, the faith and credit of the State.

As of June 30, 2010, higher education institutions have defeased debt outstanding of \$133,300,000 resulting from the refunding of previously issued debt. Accordingly, the trust account assets and the liability for the defeased bonds are not included in these financial statements.

As of June 30, 2010, cash and cash equivalents and investments were held by the trustees for the higher education institutions in the amount of \$244,120,000 for the University System of Maryland (System), \$626,000 for St. Mary's College of Maryland, and \$5,954,000 for Morgan State University.

For the year ended June 30, 2010, the System issued \$87,320,000 of 2009 Refunding Series C and D Revenue Bonds to refund \$87,105,000 of existing bonds at a premium of \$5,383,000. The refunding bonds bear interest at 2.0% to 4.0% and mature from 2011 to 2023. The purpose of the refunding was to realize savings on debt service costs. The aggregate difference in debt service between the refunded debt and the refunding debt is \$6,732,000. The economic gain on the transaction, that is, the difference between the present value of the debt service streams for the refunding debt and refunded debt, is \$5,828,000.

On April 2, 2010, the System issued \$120,000,000 of 2010 Series A and B Revenue Bonds to finance new educational and auxiliary facilities and for renovations. The bonds bear interest at 2.5% to 5.4% and mature from 2011 to 2030. The bonds were issued with a \$2,854,000 premium.

Obligations under capital leases of \$10,526,000 exist as of June 30, 2010, bearing interest at annual rates ranging from 1.0% to 6.8%.

*Maryland Stadium Authority (Authority) - Revenue Bonds:*

Debt service requirements to maturity for Maryland Stadium Authority revenue bonds and notes payable are as follows (amounts expressed in thousands).

Years Ending June 30,	Principal	Interest
2011.....	\$ 18,069	\$ 15,139

Total .....	\$262,175	\$104,803

The Authority has issued various lease revenue bonds and notes to finance the construction of the baseball and football stadiums, convention center expansions in Baltimore City and the Town of Ocean City and certain other facilities. The outstanding debt is to be repaid through capital lease payments from the State, as the State has entered into capital lease arrangements for the use of the facilities financed with the debt proceeds.

As of June 30, 2010, the Authority had outstanding revenue bonds for the construction, renovation and expansion of certain facilities as follows (amounts expressed in thousands).

Facility	Outstanding Amount	Interest Rates	Maturity Date
Baseball Stadium .....	\$116,234	Variable	July 1, 2022
Football Stadium .....	72,672	Variable	March 1, 2026
Baltimore City Convention Center .....	21,395	Variable	December 15, 2014
Ocean City Convention Center .....	7,595	4.8% to 5.4%	December 15, 2015

Camden Yards Complex .....	<u>2,947</u>	5.6%	January 1, 2018
Total .....	<u>\$262,175</u>		

## 12. Insurance:

The self-insurance liabilities represent the State's liability for its various self-insurance programs. The State is self-insured for general liability, property and casualty, workers' compensation, environmental and anti-trust liabilities and certain employee health benefits. Commercial insurance coverage is purchased for specialized exposures such as aviation hull and liability, steam boiler coverage and certain transportation risks. There were no significant reductions or changes in the commercial insurance coverage from the prior year, and the amount of settlements have not exceeded insurance coverage for any of the past three fiscal years.

All funds, agencies and authorities of the State participate in the self-insurance program (Program). The Program, which is accounted for in the general fund, allocates the cost of providing claims servicing and claims payment by charging a "premium" to each fund, agency or public authority, based on a percentage of each organization's estimated current-year payroll or based on an average loss experienced by each organization. This charge considers recent trends in actual claims experience of the State as a whole and makes provision for catastrophic losses.

The Program's liabilities are reported when it is probable that a loss has occurred and the amount of that loss can be reasonably estimated. Liabilities include an amount for claims that have been incurred but not reported. Because actual claims liabilities depend on such complex factors as inflation, changes in legal doctrines, and damage awards, actual claims paid could differ from these estimates. Claims liabilities are reevaluated periodically to take into consideration recently settled claims, the frequency of claims and other economic and social factors. Non-incremental claims adjustment expenses have been included as part of the liability for claims and adjustments for the general liability, property and casualty, workers' compensation, environmental and anti-trust liabilities. Liabilities for incurred workers' compensation losses to be settled by fixed or reasonably determinable payments over a long period of time are reported at their present value using a 4% discount rate. The workers' compensation and property and casualty costs are based upon separately determined actuarial valuations for the following fiscal years ending. The employee health benefits liability is calculated based on claims subsequently reported and claims trends.

Changes in the self-insurance liabilities during fiscal year 2010 were as follows (amounts expressed in thousands).

	Balance June 30, 2009	Claims and Changes in Estimates	Claim Payments	Balance June 30, 2010	Amount Due Within One Year
Property, casualty and general liability.....	\$ 15,378	\$ 5,270	\$ 5,193	\$ 15,455	\$ 3,906
Workers' compensation.....	265,751	59,761	52,944	272,568	34,605
Employee health benefits.....	<u>80,371</u>	<u>1,082,789</u>	<u>1,073,175</u>	<u>89,985</u>	<u>89,985</u>
Total self-insurance costs.....	<u>\$361,500</u>	<u>\$1,147,820</u>	<u>\$1,131,312</u>	<u>\$378,008</u>	<u>\$128,496</u>

As of June 30, 2010, the Program held \$243,087,000 in cash and investments designated for payments of these claims.

Changes in the self-insurance liabilities during fiscal year 2009 were as follows (amounts expressed in thousands).

	Balance June 30, 2008	Claims and Changes in Estimates	Claim Payments	Balance June 30, 2009	Amount Due Within One Year
Property, casualty and general liability...	\$ 16,334	\$ 5,313	\$ 6,269	\$ 15,378	\$ 3,914
Workers' compensation.....	269,503	57,642	61,394	265,751	33,845
Employee health benefits.....	<u>72,958</u>	<u>929,793</u>	<u>922,380</u>	<u>80,371</u>	<u>80,371</u>
Total self-insurance costs.....	\$ 358,795	\$992,748	\$990,043	\$361,500	\$118,130

As of June 30, 2009, the Program held \$230,987,000, in cash and investments designated for payments of these claims.

### 13. Fund Equity:

The unrestricted deficit for governmental activities on the government-wide statement of net assets is \$6,664,836,000. A portion of the deficit results from the State incurring debt for the purposes of capital acquisition and construction on behalf of local governments and private organizations. Since the incurrence of this debt does not result in capital assets of the State, the debt is not reflected in the net asset category, invested in capital assets, net of related debt, but rather in the unrestricted net assets category. As of June 30, 2010, the State has reported outstanding general obligation bonds and capital leases applicable to these non-State projects of \$4,016,965,000. Without State financing for these capital assets, the State would have reported an unrestricted deficit for governmental activities in the amount of \$2,647,871,000.

The statement of net assets for the primary government reports \$2,435,944,000 of restricted net assets, including \$150,191,000 restricted by enabling legislation.

Detail of the fund balance categories and classifications shown in the aggregate on the governmental funds balance sheet are as follows (amounts expressed in thousands).

	General	Special Revenue Maryland Department of Transportation	Other Governmental Funds	Total Governmental Funds
Fund balances:				
Nonspendable – Prepaid items, inventories and long-term loans and notes receivable.....	\$448,982	\$171,094		\$620,076

Other purposes .....	39,815			39,815
Unassigned .....	<u>(340,964)</u>		<u>(358,796)</u>	<u>(699,760)</u>
Total fund balances .....	\$1,249,092	\$335,722	\$239,816	\$1,824,630

A portion of the general fund's committed fund balance, in the amount of \$614,706,000 as of June 30, 2010, includes the State Reserve Fund, consisting primarily of the Revenue Stabilization Account with a balance of \$611,619,000. The Revenue Stabilization Account, authorized in Section 7-311 of the State Finance and Procurement Article, Annotated Code of Maryland, is designed to retain State revenues for future needs and reduce the need for future tax increases.

Appropriations are required to the Revenue Stabilization Account when the unappropriated general fund surplus of the second preceding fiscal year exceeds \$10,000,000. Appropriations are also required in years when the account balance is less than 7.5% of estimated general fund revenues. If the account balance is at least 3% but less than 7.5%, an appropriation of \$50,000,000 or whatever lesser amount is necessary to bring the account balance to 7.5% of estimated general fund revenues is required; if the account balance is less than 3%, the required appropriation is \$100,000,000. For fiscal years 2011 and 2012, any appropriation is not required if it would result in the loss of Federal funds to the State. Transfer of funds from the account that does not result in a balance below 5% must be authorized by (1) an act of the General Assembly or (2) a specific provision of the State budget bill as enacted. Transfers resulting in a balance below 5% must be authorized by an act of the General Assembly other than the budget bill. The use of a budget amendment for fund transfer is prohibited.

The unrestricted deficit in net assets in other enterprise funds of \$13,992,000 for the Economic Development Insurance Programs occurred because of restrictions for insuring mortgages.

## 14. Segment Information:

The State's Economic Development Loan Program contains two separately identifiable activities that have separately issued revenue bonds outstanding; housing loans of the Community Development Administration and water quality loans and grants of the Maryland Water Quality Administration.

The Community Development Administration (CDA) has issued revenue bonds, the proceeds of which were used for various mortgage loan programs. The assets of the loan program and revenues of each mortgage loan program are pledged as collateral for the revenue bonds. The bond indentures require the CDA to separately account for the identifiable activity's revenues, expenses, gains and losses, assets and liabilities.

The Maryland Water Quality Administration has issued revenue bonds to encourage capital investment for wastewater treatment systems and bay restoration. These bonds are payable solely from, and secured by, the revenue, money or property of the Maryland Water Quality Administration. The bond indentures require separate accounting for the identifiable activity's revenues, expenses, gains and losses, assets and liabilities.

Summary financial information for the two loan programs is presented below.

## 15. Retirement Benefits:

### *Maryland State Retirement and Pension System (System):*

The State is a sole employer in the cost-sharing multiple-employer public employee retirement system established by the State to provide pension benefits for State employees (other than employees covered by the Maryland Transit Administration Pension Plan described below) and employees of 100 participating political subdivisions or other entities within the State. The non-State entities that participate within the System receive separate actuarial valuations in order to determine their respective funding levels and actuarial liabilities. Retirement benefits are paid from the System's pooled assets rather than from assets relating to a particular plan participant. Consequently, the System is accounted for as a single plan as defined in GASB Statement No. 25, "Financial Reporting for Defined Benefit Pension Plans and Note Disclosures for Defined Contribution Plans." The System prepares a separately audited Comprehensive Annual Financial Report, which can be obtained from the Maryland State Retirement and Pension System, 120 E. Baltimore Street, Suite 1600, Baltimore, Maryland 21202-1600.

### *Plan Description:*

The System is administered in accordance with the State Personnel and Pensions Article of the Annotated Code of Maryland and consists of several plans which are managed by the System's Board of Trustees. All State employees and employees of participating entities are covered by the plans.

"Retirement System" - retirement programs for substantially all State employees, teachers, State police and judges who are not members of the State Pension System.

"Pension System" - retirement programs for employees and teachers hired after January 1, 1980, and prior employees who elected to transfer from the Retirement System.

The System provides retirement, death and disability benefits in accordance with State statutes. Vesting begins after 5 years of service. A member terminating employment before attaining retirement age, but after completing 5 years of service becomes eligible for a vested retirement allowance provided the member does not withdraw his or her accumulated contributions. Members of the Retirement System may retire with full benefits after attaining the age of 60, or completing 30 years of service credit, regardless of age. Members of the Pension Systems may retire with full benefits after attaining the age 62, or after completing 30 years of Service Credit, regardless of age. State police members may retire with full benefits after attaining age 50, or completing 22 years of service credit, regardless of age. Members of the Law Enforcement Officers System may retire with full benefits at age 50, or completing 25 years of service credit, regardless of age.

The annual benefit for Retirement System Members is equal to 1/55 (1.8%) of the member's highest three-year average final salary multiplied by the number of years of service credit. A member may retire with reduced benefits after completing 25 years of service, regardless of age. A member of the Pension System will generally receive, upon retirement, an annual service retirement allowance equal to 1.2% of the member's highest three-consecutive year average final salary multiplied by the number of years of service credit on or before June 30, 1998, plus 1.8% of the highest three consecutive year average final salary multiplied by the number of years of service credit after June 30, 1998. The annual benefit for a Pension System member who is employed by a participating governmental unit that does not provide enhanced pension benefits is equal to 0.8% of the member's highest three-consecutive year average final salary multiplied by the number of years of service credit, with a provision for additional benefits for compensation earned in excess of the Social Security Integration Level base. A member of either type of pension system may retire with reduced benefits after attaining age 55 and completing 15 years of service.

The annual retirement allowance for a State Police member is equal to 2.55% of the member's highest three-year average final salary multiplied by each year of service and may not exceed 71.4% of member's three years average final compensation. The annual retirement allowance for a member of the Law Enforcement Officers Pension System is 2.0% of the member's highest three-consecutive year average final salary (AFC) multiplied by each year of service up to a maximum of 30 years plus 1.0% AFC of accumulated credible service in excess of 30 years. Neither the State Police Retirement System nor Law Enforcement Officers Pension System provide for an early retirement.

### *Funding Policy:*

In accordance with the State Personnel and Pensions Article of the Annotated Code of Maryland, employer contribution rates and the actuarial accrued liability are established by annual actuarial valuations using the entry age normal cost method and other actuarial assumptions adopted by the Board of Trustees. Effective July 1, 1980, in accordance with the law governing the Systems, all benefits of the System are funded in advance. The entry age normal cost method is the actuarial cost method used to determine the employers' contribution rates and the actuarial accrued liability. Members of the Retirement System are required to contribute to the System a fixed percentage of their regular salaries and wages, 7.0% or 5.0% depending on the retirement plan selected. Members of the Pension System are required to contribute to the System 5.0% of their regular salaries and wages. Members of the Pension System who are employed by a participating government that does not provide enhanced pension benefits are required to contribute to the System 5.0% of their regular salaries and wages that exceed the Social Security wage base. State Police members are required to contribute 8.0% of their regular salaries and wages to the System. Members of the Law Enforcement Officers Pension System are required to contribute 4% of earnable compensation. All contributions are deducted from each member's salary, and the resulting payments are remitted to the System on a regular and periodic basis.

The contribution requirements of the System members, as well as the State and participating governmental employers, are established and may be amended by the Board of Trustees for the System. Effective July 1, 2002, State law provides that the contribution rates may be more or less than the actuarially determined rates for the Employees' Retirement and Pension Systems and the Teachers' Retirement and Pension Systems. Contributions to these Systems are based on the Modified Corridor Funding Method which establishes a budgetary contribution rate. This method effectively maintains the contribution rate in effect for the Teachers' and Employees' combined systems during the preceding fiscal year (as adjusted for any legislative changes in the benefit structure) as long as such systems remain between 90 percent and 110 percent funded. If either system falls below 90 percent funded (i.e., below the corridor), then the contribution rate in effect for the subsequent fiscal year will be the rate in effect for the preceding fiscal year plus 20 percent of the difference between the current fiscal year full funding rate and the prior fiscal year contribution rate. Conversely, if either system exceeds 110 percent funded (i.e., above the corridor), then the contribution rate in effect for the subsequent fiscal year will be the rate in effect for the preceding fiscal year minus 20 percent of the difference between the current fiscal year full funding rate and the prior fiscal year contribution rate. The methodology for computing the State's employer contribution rates for the Law Enforcement Officers' Pension System, State Police Retirement System and the Judges' Retirement System remain unchanged. For each of these three systems, the employer contribution rate is equal to the sum of the normal contribution and the accrued liability contribution rates.

During fiscal year 2010, the State paid \$1,206,149,000, of the required contribution totaling \$1,427,579,000 which was 12.3% of covered payroll and 84.5% of the required payment. The difference represents an additional pension cost liability in the government-wide statement of net assets. The State makes non-employer contributions to the System for local school system teachers. The covered payroll amount includes amounts for employees for whom the State pays retirement benefits, but does not pay the payroll. As of June 30, 2010, the State's membership includes 171,811 active members, 45,154 vested former members, and 106,776 retirees and beneficiaries.

*Annual Pension Cost and Net Pension Obligation:*

The annual pension cost and net pension obligation as of June 30, 2010, are as follows (amounts expressed in thousands).

	Teachers' Retirement and Pension System	Employees' Retirement and Pension System	State Police Retirement System	Judges' Retirement System	Law Enforcement Officers' Pension System
Annual required contribution. ....	\$ 889,605	\$ 438,176	\$ 37,114	\$ 19,955	\$ 32,359

Net pension obligation, end of year .....	<u>\$ 413,125</u>	<u>\$ 788,381</u>	<u>\$ 35,373</u>	<u>\$ -</u>	<u>\$ -</u>
Amortization period (years rolling).....	20.7	24.8	30	18.8	16.8

Three Year Historical Trend Information for the System is as follows (amounts expressed in thousands).

Plan	Annual Pension Cost As of June 30		
	2010	2009	2008
Teachers' Retirement and Pension System.....	\$891,346	\$758,391	\$ 669,341
Employees' Retirement and Pension System.....	446,361	383,310	357,419
State Police Retirement System.....	37,558	31,217	22,559
Judges' Retirement System.....	19,955	17,520	16,661
Law Enforcement Officers' Pension System .....	32,359	32,234	34,355

Plan	Percentage of Annual Pension Cost Contributed As of June 30,		
	2010	2009	2008
Teachers' Retirement and Pension System.....	92%	89%	94%
Employees' Retirement and Pension System.....	70	71	76
State Police Retirement System.....	68	56	59
Judges' Retirement System.....	100	100	100
Law Enforcement Officers' Pension System.....	100	100	100

Plan	Net Pension Obligation As of June 30,		
	2010	2009	2008
Teachers' Retirement and Pension System.....	\$413,125	\$342,646	\$257,511
Employees' Retirement and Pension System.....	788,381	649,523	529,464
State Police Retirement System.....	35,373	23,280	9,277
Judges' Retirement System.....			
Law Enforcement Officers Pension System.....			

The funded status of each plan as of June 30, 2010, the most recent valuation date, is as follows (amounts expressed in thousands).

Plan	Actuarial Value of Plan Assets	Actuarial Accrued Liability (AAL) Entry Age	(Unfunded AAL) /Excess of Assets over AAL	Funded Ratio	Covered Payroll	(Unfunded AAL) /Excess as a Percentage of Covered Payroll
Teachers' Retirement and Pension System.....	\$20,908,150	\$31,963,421	\$(11,055,271)	65.41%	\$6,411,550	(172.43)%
Employees' Retirement and Pension System .....	9,224,784	15,451,890	(6,227,106)	59.70	3,163,684	(196.83)
State Police Retirement System.....	1,085,281	1,722,564	(637,283)	63.00	83,123	(766.67)
Judges' Retirement System .....	276,643	426,215	(149,572)	64.91	40,654	(367.91)
Law Enforcement Officers' Pension System.....	367,934	715,568	(347,634)	51.42	89,227	(389.61)

The schedule of funding progress, presented as RSI following the notes to the financial statements, presents multiyear trend information about whether the actuarial value of plan assets is increasing or decreasing over time relative to the AAL for benefits. The Schedule of Funding Progress also discloses the relationship between the System's covered payroll (i.e., all elements included in compensation paid to active members on which contributions are based) and the unfunded actuarial accrued liability. This relationship, expressed as a ratio, is a measure of the significance of the unfunded AAL relative to the capacity to pay all contributions required to fund the liability.

The significant actuarial assumptions listed below were used in the actuarial valuation as of June 30, 2010, the most recent valuation date.

Valuation method.....	Individual Entry Age Normal Cost Method
Cost method of valuing assets	Five-year smooth market (maximum 120% and minimum 80% of market value)
Rate of return on investments.....	7.75%
Projected payroll growth .....	3.5% - 12%
Discount rate.....	7.75%
Post retirement benefit increase .....	2.75% to 3.5% (depending on system and provisions)
Amortization method.....	Level Percent of Payroll
Remaining amortization period .....	10 years as of June 30, 2010 for prior UAAL (existing on June 30, 2000)
New layers as of June 30, 2001 – 2010 .....	16 – 25 years as of June 30, 2010 for new UAAL. 30 years is used wherever the equivalent single amortization period exceeds 30 years.
Status of period (Open or Closed).....	Closed

Effective April 2010, the July 2010 cost-of-living adjustment for retirees of the Teachers' Retirement and Pension System, Employees' Retirement and Pension System, State Police Retirement System, and the Law Enforcement Officers' Pension System was determined to be zero with the actual negative adjustment (-.0356) to be offset against a future positive cost-of-living adjustment.

*Maryland Transit Administration Pension Plan (Plan):*

The Plan is a single employer non-contributory plan, which covers all Maryland Transit Administration (Administration) employees covered by a collective bargaining agreement and all those management employees who were employed by the Baltimore Transit Company. In addition, employees who enter the management group as a result of a transfer from a position covered by a collective bargaining agreement maintain their participation. The Maryland Transit Administration was given authority to establish and maintain the Plan under Transportation Article, Section 7-206(b)(2)(ii), of the Annotated Code of Maryland. For the year ended June 30, 2010, the Administration's covered and total payroll was \$145,029,000. The Plan is administered and funded in compliance with the collective bargaining agreements. The Plan prepares separately audited financial statements, which can be obtained from the Maryland Transit Administration Pension Plan, William Donald Schaefer Tower, 8 Saint Paul Street, Baltimore, Maryland 21202.

*Plan Description:*

The Plan provides retirement, normal and early, death and disability benefits. Members may retire with full benefits at age 65 with five years of credited service or age 52 with 30 years of credited service. The annual normal retirement benefit is 1.4% - 1.6% (1.3% prior to September 8, 2002) of final average compensation multiplied by credited service, with minimum and maximum benefit limitations. Participants are fully vested after five years of credited service.

As of June 30, 2010, membership in the Plan includes 2,827 active members, 472 vested former members, and 1,373 retirees and beneficiaries. There were no investments in, loans to, or leases with parties related to the Plan. There were no Plan investments representing 5 percent or more of total Plan assets.

*Funding Policy:*

The Administration's required contributions are based on actuarial valuations. The entry age normal cost method is the actuarial cost method used to determine the employer's contribution rates and the actuarial accrued liability. All administrative costs of the Plan are paid by the Plan.

Employer contributions to the Plan totaling \$37,761,000 (26.0% of covered payroll) for fiscal year 2010 were made in accordance with actuarially determined contribution requirements based on an actuarial valuation performed as of June 30, 2009. This amount consisted of \$4,163,000 normal cost and \$21,988,000 amortization of the actuarial accrued liability (2.9% and 15.2%, respectively, of covered payroll). The liquidation period for the actuarial accrued liabilities, as provided by law, is 9 years from June 30, 2010.

Significant actuarial assumptions used to compute contribution requirements are the same as those used to compute the annual pension cost and net pension obligations. The computation of the annual required contribution for fiscal year 2010 was based on the same actuarial assumptions, benefit provisions, actuarial funding method and other significant factors used to determine pension contribution requirements in the previous year.

*Annual Pension Cost and Net Pension Obligation:*

The Administration's annual pension cost and net pension obligation as of June 30, 2010, are as follows (amounts expressed in thousands).

Annual required contribution (ARC).....	\$ 24,893
Interest on net pension obligation.....	540
Adjustment to ARC.....	<u>718</u>
Annual pension cost .....	26,151
Contributions made .....	<u>37,761</u>
Decrease in net pension obligation .....	(11,610)
Net pension obligation, beginning of year .....	<u>1,168</u>
Net pension obligation, end of year .....	<u><u>\$(10,442)</u></u>
Amortization period .....	13.7 years

Three Year Historical Trend Information for the Plan is as follows (amounts expressed in thousands).

Fiscal Year Ended,	Annual Pension Cost (APC)	Percentage of APC Contributed	Net Pension Obligation
6/30/2010 .....	\$26,151	144%	\$(10,442)
6/30/2009 .....	24,659	111	1,168
6/30/2008 .....	24,635	99	3,763

*Funded Status and Funding Progress:*

As of June 30, 2010, the most recent actuarial valuation date, the plan was 38.2% funded. The actuarial accrued liability for benefits was \$426,041,000 and the actuarial value of assets was \$162,756,000 resulting in an unfunded actuarial accrued liability (UAAL) of \$263,285,000. The covered payroll (annual payroll of active employees covered by the plan) was \$145,029,000 and the ratio of the UAAL to the covered payroll was (181.5)%.

The schedule of funding progress, presented as RSI following the notes to the financial statements, presents multiyear trend information about whether the actuarial value of plan assets is increasing or decreasing over time relative to the actuarial accrued liability for benefits.

The significant actuarial assumptions listed below were used in the actuarial valuation as of June 30, 2010, the most recent valuation date.

Valuation method .....	Entry Age Normal Cost Method
Cost method of valuing assets .....	Smoothing 20% market; 80% actuarial value
Rate of return on investments.....	7.75% Compounded per annum
Discount rate.....	7.75% Compounded per annum
Rate of salary increase.....	4.0% Compounded per annum
Postretirement benefit increase .....	Preceding Year Consumer Price Index, capped at 3%
Amortization method.....	Level percent of payroll
Remaining amortization period.....	9 years from June 30, 2010 for UAAL (existing on June 30, 2002)
New amortization period .....	17 years from June 30, 2010 for new UAAL
Status of period (Open or Closed) .....	Closed

During fiscal year 2010, there were no changes in actuarial assumptions or benefit provisions from 2009 that significantly affected the valuation of the annual pension cost and net pension obligation. No significant changes in these assumptions are planned in the near term.

*Deferred Compensation Plan (Plan):*

The State offers its employees a deferred compensation plan (Plan) created in accordance with Internal Revenue Code Sections 457, 403(b), 401(a) and 401(k). The Plan, available to eligible State employees, permits participants to defer a portion of their salary until future years. Participation in the Plan is optional. The deferred compensation is not available to employees until termination, retirement, death or unforeseeable emergency. State law provides that the Governor appoint the nine member Board of Trustees of the State's Supplemental Retirement Systems. The Board is responsible for the implementation, maintenance and administration of the Plan.

The State of Maryland Match Plan and Trust was established by the State on July 1, 1999. The plan is designed to be a tax-

qualified 401(a) defined contribution matching plan under Internal Revenue Code section 401(a). Under plan provisions, the State contributes to each participant's account an amount equal to each participant's contributions to the State's Supplemental Retirement Plan during the same plan year. By statute, the maximum amount contributed to this plan for each participant is \$600 for each State fiscal year. An employee's interest in his/her account is fully vested at all times. The match program continues to be established and funded in statute. During the year ended December 31, 2009, the State suspended the match contribution. For the plan year ended December 31, 2009, the State contributed \$3,102,000 and participants contributed \$161,570,000 to the Plan.

## 16. Other Postemployment Benefits, Health Benefits (OPEB)

### *State Employee and Retiree Health and Welfare Benefits Program:*

#### *Plan Description:*

The State Employee and Retiree Health and Welfare Benefits Program (Plan) is a single-employer defined benefit healthcare plan established by State Personnel and Pensions Article, Sections 2-501 - 2-516, of the Annotated Code of Maryland. The Plan is self-insured to provide medical, hospitalization, prescription drug and dental insurance benefits to eligible state employees, retirees and their dependents. State law grants authority to establish and amend benefit provisions to the Secretary of the Department of Budget and Management (DBM). In addition, the Secretary shall specify by regulation the types or categories of State employees who are eligible to enroll, with or without State subsidies, or who are not eligible to enroll.

The Postretirement Health Benefits Trust Fund (OPEB Trust) is established as an irrevocable trust under Section 34-101 of the State Personnel and Pensions Article to receive appropriated funds and contributions which will be used to assist the Plan in financing the State's postretirement health insurance subsidy. The OPEB Trust is administered by the Board of Trustees for the State Retirement and Pension System. A separate audited GAAP-basis postemployment benefit plan report is not available for the defined benefit healthcare plan.

#### *Funding Policy:*

The contribution requirements of Plan members and the State are established by the Secretary. Each year the Secretary recommends to the Governor the State's share of the costs of the Plan. Beginning in fiscal year 2008, State law requires DBM to transfer any subsidy received as a result of the federal Medicare Prescription Drug Improvement and Modernization Act of 2003 or similar subsidy to the OPEB Trust to prefund costs of retirees' health benefits. Also, funds may be separately appropriated in the State's budget for transfer to the OPEB Trust. Applicable administrative expenses are payable from the OPEB Trust, but may not exceed \$100,000 annually. The 2009 Budget Reconciliation and Financing Act redirects the subsidy to the Plan for fiscal years 2010-2012.

Generally, a retiree may enroll and participate in the health benefit options if the retiree retired directly from State service with at least five years of creditable service, ended State service with at least 10 years of creditable service and within five years before the age at which a vested retirement allowance normally would begin, or ended State service with at least 16 years of creditable service. As of July 1, 2010, the State's Plan membership includes 82,071 active employees, 4,588 vested former employees, and 57,149 retirees and beneficiaries. Based on current practice, the State subsidizes approximately 50% to 85% of retiree premiums to cover medical, dental, prescription and hospitalization costs, depending on the type of insurance plan. The Plan assesses a charge to retirees for post-employment health care benefits, which is based on health care insurance charges for active employees. For the fiscal year ended June 30, 2010, retiree plan members contributed \$69,520,000 or approximately 17% of total retiree premiums, and the State contributed \$332,985,000. In fiscal year 2010, the State transferred \$999,000 from the federal Medicare drug subsidy to the OPEB Trust to prefund future OPEB costs. The State also contributed \$2,425,000 of additional funding to the Trust.

#### *Annual OPEB Cost and Net OPEB Obligation:*

The State's annual OPEB cost (expense) is calculated based on the annual required contribution (ARC) of the employer, an amount actuarially determined in accordance with the parameters of GASB Statement No. 45. The ARC represents a level of funding that, if paid on an ongoing basis, is projected to cover normal cost each year and amortize any unfunded actuarial liabilities over a period not to exceed 30 years. The following table shows the components of the State's annual OPEB cost, the amount actually contributed to the Plan and the State's net OPEB obligation as of June 30, 2010 (amounts expressed in thousands).

Annual required contribution (ARC) .....	\$ 1,184,552
ARC adjustment.....	(57,332)
Interest on net OPEB obligation beginning of year .....	63,560
Total Annual OPEB Cost (AOC).....	1,190,780
Less: Contributions made.....	336,408
Increase in net OPEB obligation.....	854,372
Net OPEB obligation - beginning of year .....	1,478,130
Net OPEB obligation - end of year .....	\$ 2,332,502
Percentage of annual OPEB cost contributed .....	28.3%

Historical trend information for the OPEB Plan since inception is as follows (amounts expressed in thousands).

Fiscal Year Ended,	AOC	Percentage of AOC Contributed	Net OPEB Obligation
6/30/10.....	\$1,190,780	28.3%	\$2,332,502
6/30/09.....	1,148,597	31.9	1,478,130
6/30/08.....	1,086,240	35.9	695,921

#### *Funded Status:*

As of June 30, 2010, the most recent actuarial valuation date, the OPEB Trust was 1.1% funded. The actuarial accrued liability for benefits was \$16,098,602,000, and the actuarial value of assets was \$183,388,000, resulting in an unfunded actuarial accrued liability (UAAL) of \$15,915,214,000. The ratio of the actuarial value of assets to the actuarial accrued liability was 1.1%. The covered payroll (annual payroll of active employees covered under the Plan) was \$4,627,379,000, and the ratio of the UAAL to the covered payroll was (343.9)%.

#### *Actuarial Methods and Assumptions:*

Actuarial valuations of an ongoing plan involve estimates of the value of reported amounts and assumptions about the probability of occurrence of events far into the future. Examples include assumptions about future employment, mortality, and healthcare cost trends. Actuarially determined amounts are subject to continual revision as actual results are compared with past expectations and new estimates are made about the future. Projections of benefits for financial reporting purposes are based on the substantive plan (the plan as understood by the employer and the plan members) and include the types of benefits provided at the time of each valuation and the historical pattern of sharing of benefit costs between the employer and plan members to that point. The actuarial methods and assumptions used include techniques that are designed to reduce the effects of short-term volatility in actuarial accrued liabilities and the actuarial value of assets, consistent with the long-term perspective of the calculations.

The accompanying schedules of funding progress and employer contributions following the footnotes present information about the actuarial value of plan assets relative to the actuarial accrued liability for benefits and amounts contributed to the plan.

The actuarial method and significant assumptions listed below were used in the actuarial valuation as of June 30, 2010.

Actuarial cost method.....	Entry Age Normal (percent of pay)
Asset valuation method .....	Five-year smoothed market.
Rate of return on investments.....	4.30% (blended rate)
Aggregate salary growth .....	3.50%
Method to determine blended rate .....	Blended rate of the expected long-term investment returns on plan assets (7.75%) and on the State's own assets (4.25%) calculated based on the

	funded level of the plan at the valuation date.
Healthcare cost trend rate .....	Medical: 8.0% for 2011 trending down to 5.0% by FYE 2019
	Prescription drug: 9.0% for 2011 trending down to 5.0% by FYE 2020
	Dental: 4.5% (0.0% in 2011)
Amortization method .....	Level percentage of projected payroll
Amortization period .....	30 years (open)

*Maryland Transit Administration Retiree Healthcare Benefit:*

The Maryland Transit Administration Retiree Healthcare Benefit (MTA OPEB) provides retiree health care benefits under a collective bargaining agreement to all employees who are members of the MTA pension plan, except transfers from union to management positions who are required to enroll in the State Employee and Retiree Health and Welfare Benefits Program. The MTA currently funds retirees' health care on a pay-as-you-go basis. The MTA does not currently have a separate fund set aside to pay health care costs.

*Plan Description:*

The MTA OPEB provides medical, hospitalization, prescription drug, dental and vision insurance benefits to eligible MTA employees, retirees and their dependents. Members are eligible at age 65 with five years of service or age 52 with 30 years of services provided the member is enrolled in an MTA health plan at normal retirement. Members are also eligible at age 55 if the sum of the participant's age plus years of actual credited service equals at least 85 and the participant is enrolled in an MTA health plan at early retirement. A separate audited GAAP-basis postemployment benefit plan report is not available for the healthcare plan.

As of June 30, 2010, 2,317 active employees and 1,095 retirees and beneficiaries were covered by healthcare insurance provided by MTA.

*Funding Policy:*

Based on current practice, MTA subsidizes approximately 50% to 100% of retiree healthcare premiums depending on the type of insurance plan and whether the retiree receives Medicare. Retirees make the same contribution as active employees, however Medicare is handled separately.

*Annual OPEB Cost and Net OPEB Obligation:*

MTA's annual OPEB cost is calculated based on the annual required contribution of the employer, an amount actuarially determined in accordance with GASB Statement No. 45. The following table shows the components of MTA's annual OPEB cost, the amount actually contributed and MTA's net OPEB obligation as of June 30, 2010 (amounts expressed in thousands).

Annual required contribution (ARC) .....	\$ 45,500
ARC adjustment.....	(4,200)
Interest on net OPEB obligation beginning of year .....	2,900
Total annual OPEB cost (AOC) .....	44,200
Less: Contributions made .....	(10,900)
Less: Interest on contributions .....	(200)
Increase in net OPEB obligation .....	33,100
Net OPEB obligation – beginning of year .....	64,500
Net OPEB obligation – end of year .....	\$ 97,600
Percentage of annual OPEB cost contributed .....	24.7%

Historical trend information for the MTA OPEB since adoption of GASB Statement No. 45 is as follows (amounts expressed in thousands).

Fiscal Year Ended	AOC	Percentage of AOC Contributed	Net OPEB Obligation
6/30/10	\$44,200	24.7%	\$97,600
6/30/09	43,300	23.3	64,500
6/30/08	41,400	23.4	31,500

*Funded Status:*

MTA OPEB is unfunded. As of June 30, 2009, the most recent actuarial valuation date, the actuarial accrued liability (AAL) for benefits was \$431,500,000. The covered payroll (annual payroll of active employees participating in MTA health plans) was \$151,560,000, and the ratio of the AAL to the covered payroll was (284.7)%.

*Actuarial Methods and Assumptions:*

Actuarial valuations of an ongoing plan involve estimates of the value of reported amounts and assumptions about the probability of occurrence of events far into the future. Examples include assumptions about future employment, mortality, and healthcare cost trends. Actuarially determined amounts are subject to continual revision as actual results are compared with past expectations and new estimates are made about the future. Projections of benefits for financial reporting purposes are based on the substantive plan (the plan as understood by the employer and the plan members) and include the types of benefits provided at the time of each valuation and the historical pattern of sharing of benefit costs between the employer and plan members to that point. The actuarial methods and assumptions used include techniques that are designed to reduce the effects of short-term volatility in actuarial accrued liabilities and the actuarial value of assets, consistent with the long-term perspective of the calculations.

The accompanying schedules of funding progress and employer contributions following the footnotes present information about the actuarial value of plan assets relative to the actuarial accrued liability for benefits and amounts contributed to the plan.

The actuarial method and significant assumptions listed below were used in the actuarial valuation as of June 30, 2009.

Actuarial cost method.....	Entry Age Normal
Asset valuation method.....	Fair market value at fiscal year end
Rate of return on investments.....	4.5%
Aggregate salary growth.....	3.5%
Healthcare cost trend rate.....	Medical: 7.9% in 2009, 7.0% in FY 2010 and gradually decreasing to 5.0% in FY 2011 Prescription drug: 5% for all future years Dental and vision: 5.0% for all future years
Amortization method.....	Level annual payments over a fixed number of years
Amortization period.....	25 years (closed)

## 17. Commitments:

Encumbrances for specific purposes for which resources already have been reported as restricted or committed on the governmental funds balance sheet are \$184,413,000 in the general fund and \$447,295,000 in other governmental funds as of June 30, 2010.

The State's governmental funds lease office space under various agreements that are accounted for as operating leases. Many of the agreements contain rent escalation clauses and renewal options. These leases contain termination for convenience clauses providing for cancellation after a certain number of days notice to lessors. In addition, these leases contain appropriation clauses indicating that continuation of the lease is subject to appropriation by the legislature. Rent expenditures for the year ended June 30, 2010, were approximately \$65,833,000.

As of June 30, 2010, the governmental funds, other than the Department of Transportation, had commitments of approximately \$65,764,000 for service contracts.

As of June 30, 2010, the Department of Transportation and Maryland Transportation Authority had commitments of approximately \$3.2 billion and \$1.3 billion, respectively, for construction of highway and mass transit facilities.

Approximately 52% of future expenditures related to the Department of Transportation commitments are expected to be reimbursed from proceeds of approved Federal grants when the actual costs are incurred. The remaining portion will be funded by other financial resources of the Department of Transportation.

The Department of Transportation, as lessor, leases space at various marine terminals, airport facilities and office space pursuant to various noncancelable operating leases with scheduled rent increases. Minimum future rental revenues are as follows (amounts expressed in thousands).

Years Ending June 30,	Amounts
2011 .....	\$124,031
2012 .....	121,286
2013 .....	116,668
2014 .....	112,348
2015 .....	110,250
2016 -2020 .....	211,882
2021 -2025 .....	<u>116,650</u>
Total.....	<u>\$913,115</u>

The cost and accumulated depreciation of the assets as of June 30, 2010, are \$1,477,829,000 and \$606,323,000, respectively.

Total minimum future rental revenues do not include contingent rentals that may be received under certain concession leases on the basis of a percentage of the concessionaire's gross revenue in excess of stipulated minimums. Rental revenue was approximately \$155,501,000 for the year ended June 30, 2010.

As of June 30, 2010, the Maryland State Lottery Agency had commitments of approximately \$375,000,000, for services to be rendered relating principally to the operation of, and advertising for, the lottery games and the video lottery terminal program.

As of June 30, 2010, the enterprise fund loan programs had committed to lend a total of \$269,285,000 in additional loans. The Community Development Administration, also an enterprise fund loan program, has \$339,820,000 of revenue bonds outstanding that are not included in the financial statements of the Administration because the bonds are not guaranteed by the State or any other program of the State or any political subdivision. The revenue bonds are secured solely by the individual multi-family project properties, related revenues, applicable credit enhancements or investments equal to the debt outstanding.

Pursuant to legislation enacted by the Maryland General Assembly in April, 1996, the Maryland Stadium Authority is required to pay \$2,400,000 per year into the Public School Construction Fund over ten years, subject to availability of funds, beginning in fiscal year 2001. The Authority was relieved of its fiscal year 2010 obligation through the approval of the State's budget.

As of June 30, 2010, the higher education fund had commitments of approximately \$382,439,000 for the completion of projects under construction.

## 18. Contingencies:

The State is party to legal proceedings that normally occur in governmental operations. The legal proceedings are not, in the opinion of the Attorney General, likely to have a material, adverse impact on the financial position of the State as a whole.

As of June 30, 2010, economic development loan programs were contingently liable to financial institutions for \$4,587,000 for the repayment of loans for small businesses. Non-major enterprise funds were contingently liable as insurers of

\$168,146,000 of \$394,601,000 mortgage loans made by public and private lenders. Non-major component units were contingently liable as insurers of \$17,510,000 of \$433,221,000 economic development and growth bonds issued by financial institutions.

As of June 30, 2010, there were approved economic development bonds pending settlement which were insured by non-major component units for \$1,415,000.

The State receives significant financial assistance from the U.S. Government. Entitlement to the resources is generally conditioned upon compliance with terms and conditions of the grant agreements and applicable Federal regulations, including the expenditure of the resources for eligible purposes. Substantially all grants are subject to financial and compliance audits by the grantors. Any disallowances as a result of these audits become a liability of the fund which received the grant. As of June 30, 2010, the State estimates that no material liabilities will result from such audits.

## **19. Tobacco Settlement:**

Legislation enacted by the 1999 General Assembly established the Cigarette Restitution Fund for all revenues received from any judgment against or settlement with the tobacco industry. Expenditures from the fund are made by an appropriation in the annual State budget. The law provides that at least 50% of the appropriations shall be made for tobacco or health related purposes and the remaining appropriations may be for any public purpose. During the 2002 legislative session, legislation was enacted providing that for each of fiscal years 2003 through 2006, at least 25% of the appropriations shall be made for the Maryland Medical Assistance Program (Medicaid); the 2005 legislative session increased that percentage to 30% for each year for which appropriations are made. During the 2003 legislative session, legislation was enacted requiring that .15% of the fund be appropriated for enforcing the escrow requirements for nonparticipating tobacco product manufacturers. Transfers of \$165,551,000 were made from the proceeds in the Cigarette Restitution Fund for fiscal year 2010 expenditure of appropriations.

As part of the Master Settlement Agreement between the states and the tobacco companies, Maryland's share during fiscal year 2010 was \$157,064,000, including the award from the arbitration panel for attorney fees. This amount does not include \$12,722,000 the tobacco companies paid to the disputed account pending the outcome of litigation.

It is estimated that the payments made to the State pursuant to the Master Settlement through fiscal year 2015 will total \$2.54 billion of which \$149,873,000 was paid to outside counsel. The actual amount paid each year, however, will reflect adjustments for inflation and cigarette shipment volume. In addition, the State expects to receive \$81,012,000 during that same period pursuant to an award for attorney fees by the national arbitration panel.

## **20. Landfill Closure and Postclosure Care Costs:**

State and Federal laws require the Maryland Environmental Service (the Service) to cover the Midshore Regional Landfill (Midshore), which the current cell is expected to close in December 2010, and to perform certain maintenance and monitoring functions at the Midshore and Easton Landfill (Easton) sites for thirty years after closure. Although closure and postclosure care costs at Midshore will be paid near or after the date the landfill stops accepting waste, the Service reports a portion of these closure and postclosure care costs as a liability based upon the estimated useful life of the landfill. Midshore's current cells are approximately 98 % filled as of June 30, 2010. Total closure and postclosure care costs for the landfill is currently estimated to be \$12,886,000 as determined through engineering studies, and \$11,236,000 has been recognized as a liability on the June 30, 2010, Combining Statement of Net Assets, Non-Major Component Units. Actual costs may be subject to change due to inflation, deflation, technology, and changes in applicable laws and regulations.

A receivable from project participants corresponding to the accrued liability has also been recorded.

Under Federal regulations, the Service has satisfied its financial assurance requirements based upon the local government financial ratio tests of the project participants as of June 30, 2009. The Service expects to satisfy these requirements as of June 30, 2010, using the same criteria.

(b) Other contributing entities consists of the Federal Medicare drug subsidy contributed to the OPEB Trust.

## STATE OF MARYLAND

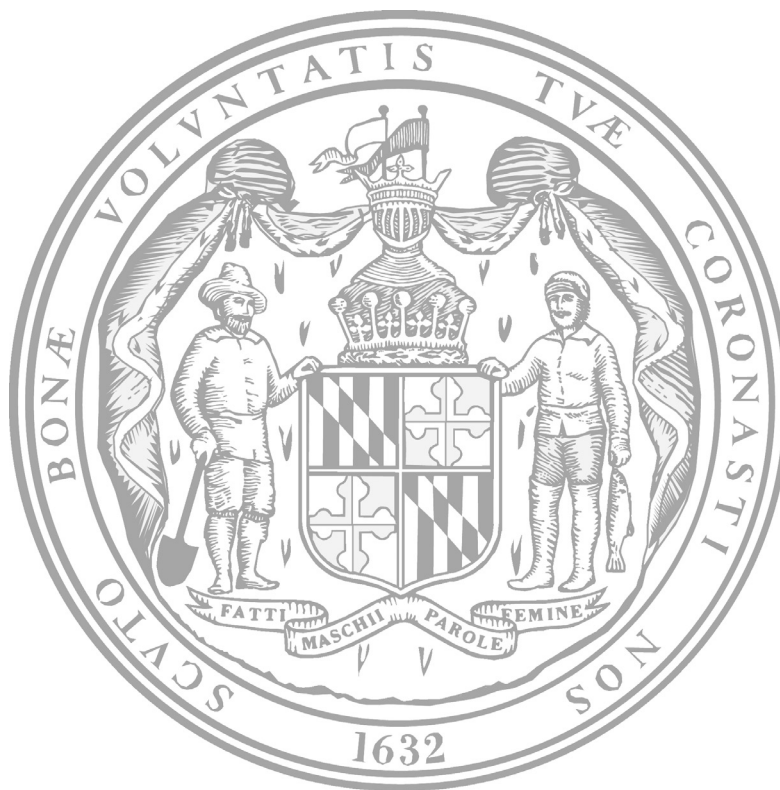

### Notes to Required Supplementary Information For the Year Ended June 30, 2010

#### 1. Budgeting and Budgetary Control:

The Maryland Constitution requires the Governor to submit to the General Assembly an annual balanced budget for the following fiscal year. This budget is prepared and adopted for the General Fund, which includes all transactions of the State, unless otherwise directed to be included in another fund and the Special Fund, which includes the transportation activities of the State, fishery and wildlife funds, shared taxes and payments of debt service on general obligation bonds. In contrast, the GAAP special revenue fund includes only the operations (other than debt service and pension activities) of the Maryland Department of Transportation. The budgetary Federal fund revenue and expenditures are included in the GAAP General and Special Funds as Federal revenues and expenditures by function. An annual budget is also prepared for the Federal Fund, which accounts for substantially all grants from the Federal government, and the current unrestricted and restricted funds of the Universities and Colleges. In addition to the annual budget, the General Assembly adopts authorizations for the issuance of general obligation bonds. The expenditures of the resources obtained thereby are accounted for in the capital projects fund.

All State budgetary expenditures for the general, special and Federal funds are made pursuant to appropriations in the annual budget, as amended from time to time, by budget amendments. The legal level of budgetary control is at the program level for the general, special and Federal funds. State governmental departments and independent agencies may, with the Governor's approval, amend the appropriations by program within the budgetary general fund, provided they do not exceed their total general fund appropriations as contained within the annual budget. Increases in the total general fund appropriations must be approved by the General Assembly. For the fiscal year ended June 30, 2010, the General Assembly approved a net increase in General Fund appropriations of \$195,752,000. Appropriations for programs funded in whole or in part from the special or Federal funds may permit expenditures in excess of original special or Federal fund appropriations to the extent that actual revenues exceed original budget estimates and such additional expenditures are approved by the Governor. Unexpended appropriations from the general fund may be carried over to succeeding years to the extent of encumbrances, with all other appropriations lapsing as of the end of the fiscal year. Unexpended appropriations from special and Federal funds may be carried over to the extent of (a) available resources, and (b) encumbrances. The State's accounting system is maintained by the Comptroller in compliance with State Law and in accordance with the State's Budgetary Funds. It controls expenditures at the program level to ensure legal compliance. The "Agency Appropriation Unencumbered Balance Report," which is available for public inspection at the Office of the Comptroller, provides a more comprehensive accounting of activity on the basis of budgeting at the legal level of budgetary control.

The original and amended budget adopted by the General Assembly for the general, special and Federal funds is presented in the Schedule of Revenues, Expenditures and Encumbrances, and Changes in Fund Balances-Budget and Actual-for the year ended June 30, 2010. The State's budgetary fund structure and the basis of budgeting, which is the modified accrual basis with certain exceptions, differs from that utilized to present financial statements in conformity with generally accepted accounting principles. The budgetary system's principal departures from the modified accrual basis are the classification of the State's budgetary funds and the timing of recognition of certain revenues and expenditures. A summary of the effects of the fund structure differences and exceptions to the modified accrual basis of accounting, as of June 30, 2010, is provided in the "Reconciliation of the Budgetary General and Special Fund, Fund Balances to the GAAP General and Special Revenue Fund, Fund Balances" immediately following the budgetary schedule.

STATE OF MARYLAND  
Comprehensive Annual Financial Report

# COMBINING FINANCIAL STATEMENTS

## STATE OF MARYLAND

# Non-major Governmental Funds

### Debt Service Funds

General Obligation Bonds, Debt Service Fund: Transactions related to resources obtained and used for the payment of interest and principal on general long-term debt obligations are accounted for in the general obligation bonds debt service fund.

Transportation Bonds, Debt Service Fund: Transactions related to resources obtained and used for the payment of interest and principal on transportation long-term debt obligations are accounted for in the transportation bonds debt service fund.

### Capital Projects Fund

Transactions related to resources obtained and used for the acquisition, construction or improvement of certain capital facilities, including those provided to political subdivisions and other public organizations are accounted for in the capital projects fund. Such resources are derived principally from proceeds of general obligation bond issues, Federal grants and operating transfers from the State's general fund. The State enters into long-term contracts for construction of major capital projects and records the related commitments as encumbrances.

## STATE OF MARYLAND

### **Non-major Enterprise Funds**

Transactions related to commercial types of activities operated by the State are accounted for in the enterprise funds. The non-major enterprise funds consist of the economic development insurance programs of the Department of Housing and Community Development and Maryland Correctional Enterprises, which utilizes inmate labor from State correctional institutions to manufacture goods, wares and merchandise to be sold to State agencies, political subdivisions and charitable, civic, educational, fraternal or religious associations or institutions.

## STATE OF MARYLAND

### **Fiduciary Funds**

The Pension and Other Employee Benefits Trust Funds include the Maryland State Retirement and Pension System, the Maryland Transit Administration Pension Plan, and the Deferred Compensation Plan. The Trust Funds reflect the transactions, assets, liabilities and fund equities of the plans administered by the State and the Maryland Transit Administration and are accounted for using the flow of economic resources measurement focus. The Deferred Compensation Plan, which is included with a year end of December 31, accounts for participant earnings deferred in accordance with Internal Revenue Code Sections 457, 403(b), 401(a) and 401(k). Amounts deferred are invested and are not subject to federal income taxes until paid to participants upon termination or retirement from employment, death or for an unforeseeable emergency.

The agency funds are custodial in nature and do not present the results of operations or have a measurement focus. The State uses agency funds to account for the receipt and disbursement of patient and prisoner accounts, various taxes collected by the State for distribution to the Federal government and political subdivisions and amounts withheld from employees' payroll.

STATE OF MARYLAND

## **Non-major Component Unit Financial Statements**

---

### **Non-major Component Units**

Non-major component units are comprised of the following proprietary fund type entities.

#### **Maryland Environmental Service**

The Maryland Environmental Service was created as a body corporate and politic. The Service helps private industry and local governments manage liquid, solid and hazardous wastes. In accordance with direction from the Governor, the Service plans and establishes major resource recovery facilities, solid waste management plans and hazardous waste management programs.

#### **Maryland Industrial Development Financing Authority**

The Maryland Industrial Development Financing Authority was established as a body corporate and politic and a public instrumentality of the State to provide financial assistance to enterprises seeking to locate or expand operations in Maryland.

#### **Maryland Food Center Authority**

The Maryland Food Center Authority is a body corporate and politic which was created to establish and operate a consolidated wholesale food center within the Greater Baltimore Region and is subject to State regulations.

#### **Maryland Technology Development Corporation**

The Maryland Technology Development Corporation was established as a body corporate and politic and a public instrumentality of the State to assist in the commercialization of technology developed in the universities and the private sector. The Corporation administers the Maryland Technology Incubator Program and the Maryland Stem Cell Research Fund.

\*Information for fiscal years prior to fiscal year ended June 30, 2002 is not available.

(1) See the Expenses by Function, Primary Government schedules for detail information on expenses and revenues.

(2) The beginning net assets for fiscal year 2002 were restated due to implementation of GASB Statement No. 34 and for fiscal year 2004 due to implementation of GASB Technical Bulletin No. 2004-1. The beginning net assets for fiscal year 2005 were restated for a change in accounting principles regarding the valuation of investments by the State Lottery Agency. Prior years' balances were not restated. Beginning net assets balances were restated for fiscal year 2009 to recognize pollution remediation obligations for governmental activities and a prior period adjustment for capital assets of the Maryland Transportation Authority in the business-type activities. Beginning net assets were restated for fiscal year 2010 due to implementation of GASB Statement No. 53.

- (1) For general obligation bonds, the debt limit is based on separate enabling acts for particular objects or purposes that are enacted during each legislative session. There is no separately mandated maximum amount for the issuance of general obligation bonds. For transportation bonds, the General Assembly each year establishes a maximum aggregate outstanding amount that does not exceed \$1,500,000,000 up to June 30, 2004, does not exceed \$2,000,000,000 up to June 30, 2007, and does not exceed \$2,600,000,000 through June 30, 2009 and thereafter.
- (2) The 2009 session of the General Assembly established a maximum outstanding principal amount of \$661,800,000 as of June 30, 2010, for all nontraditional debt of the Department. Nontraditional debt outstanding is defined as any debt instrument that is not a Consolidated Transportation Bond or GARVEE bond. This debt includes certificates of participation, debt backed by customer facility charges, passenger facility charges, or other revenues, and debt issued by the Maryland Economic Development Corporation or any other third party on behalf of the Department.

Source: The Secretary's Office of the Department of Transportation.

- (1) Under the terms of the bond authorizing resolutions, additional Consolidated Transportation Bonds (Bonds) may be issued, provided, among other conditions, that
  - (i) total receipts, less administration, operation and maintenance expenditures for the preceding fiscal year equal at least two times maximum annual debt service on all Bonds outstanding and to be issued and that (ii) total proceeds from pledged taxes equal at least two times maximum annual debt service on all Bonds outstanding and to be issued.
- (2) Bonds are payable from certain taxes, principally, motor vehicle excise taxes, motor fuel taxes, and a portion of the corporate income tax. These amounts are available to the extent necessary for that exclusive purpose. Other receipts of the Department are available if necessary.
- (3) In fiscal years 2003 and 2004, \$160,000,000 and \$154,913,000, respectively, of other taxes and fees were transferred to the General Fund per legislation.
- (4) The 2004 Session of the Maryland General Assembly approved legislation increasing Vehicle Registration Fees.
- (5) FY 2007 was the last year for the transfer of \$43 million from Maryland Transportation Authority to the Transportation Trust Fund.
- (6) Legislation was approved to increase the State's Sales Tax and the Vehicle Excise Tax (Tiling) from 5% to 6%, effective Jan. 1, 2008. In addition, effective July 1, the percentage of Tiling Tax retained by the Department was increased from 76% to 86.7%, and the Department now receives 24% of the State's Sales Tax.
